ACCESS SERVICE

21 - Fast Packet Access Services

21.6 BellSouth Network Visibility Service (Cont'd)

21.6.1 General Description (Cont'd)

Access to the BellSouth NVS graphical interface is available via a Web Interface; alternatively, a dial or dedicated method described in section 7.4.12, FlexServ service (a.k.a. BellSouth SPA Customer Reconfiguration), may also be used to access the NVS graphical interface. Additionally, NVS may be accessed via a Remote Message Interface for the collection of raw data. For security reasons, customers are required to identify themselves via a username and password. The username and password are assigned at the time the account is established. Following are descriptions and requirements for each type of Management Access Interface: (C)

1. Web Interface - This interface allows customers to access the BellSouth NVS graphical interface via the Web using a standard web browser. This type of access requires a Security Card. (C)

Security Card - This card provides the customer a unique password identification code which will electronically change periodically.

If the customer has purchased a Security Card in conjunction with another feature or service offered by BellSouth, that Security Card may also be used in conjunction with NVS. It is the customer's responsibility to notify BellSouth of an existing Security Card so BellSouth can ensure that the card is validated for multiple features and/or services.

2. Dial Interface access to the BellSouth NVS graphical interface - See section 7.4.12 (C)
3. Dedicated Interface access to the BellSouth NVS graphical interface - See section 7.4.12 (C)
4. Remote Message Interface - This interface will allow SSH-IP connectivity to BellSouth NVS from other compatible Network Management systems for the collection of raw data. The customer must have SSH access to the NVS platform. Connectivity must be via a Frame Relay PVC to the Company network. Technical details and limitations on the Remote Message Interface can be found in BellSouth Technical Reference TR-73587. (N)

The customer is responsible for providing and maintaining all terminal equipment necessary to access BellSouth NVS.

A customer may subscribe to BellSouth NVS on a monthly basis. An account is established which will include the XAFRS (a.k.a. BellSouth Exchange Access Frame Relay Service) and XAATMS Network Interfaces and the MSFRS and MSATMS Connections designated by the customer to have BellSouth NVS capability. Customers may choose to subscribe to BellSouth NVS for all Network Interfaces/Connections in their BellSouth Fast Packet network or choose BellSouth NVS for only a portion.

ACCESS SERVICE

21 - Fast Packet Access Services

21.6 BellSouth Network Visibility Service (Cont'd)

21.6.5 Rate Categories

The following rate categories apply to BellSouth NVS:

- (A) Service Establishment Charge
The Service Establishment Charge is a nonrecurring charge which applies per customer account. This charge covers the initial establishment and set-up of the customer account in the BellSouth NVS database. A username(s) and password(s) will be assigned for use by the customer in accessing their account. At the time the account is established, a customer may also choose to establish sub accounts.
- (B) Fault Management and On Demand Statistics
A monthly charge applies for each Network Interface/Connection in the customer's network with BellSouth NVS capability. A nonrecurring charge is applicable per Network Interface/Connection at the time of installation.
- (C) Fault Management, On Demand Statistics and Performance Reports
A monthly charge applies for each Network Interface/Connection in the customer's network with BellSouth NVS capability. A nonrecurring charge is applicable per Network Interface/Connection at the time of installation.
- (D) Subsequent Modification Charge
The Subsequent Modification Charge is a nonrecurring charge which applies per Network Interface/Connection when a BellSouth NVS customer requests that existing BellSouth NVS Network Interfaces/Connections or PVCs be modified. Examples of this charge include change of customer name and movement between packages. This charge is not applicable:
 - when a new PVC is added to an existing BellSouth NVS Network Interface/Connection and BellSouth NVS is requested for the new PVC, or
 - for a request to change a password.
- (E) Management Access Interface
All customers must have a Management Access Interface. This connection allows the customer to monitor their network. A monthly charge applies for each Web Interface and each Remote Message Interface; a nonrecurring charge is applicable per Web Interface and per Remote Message Interface at the time of installation. A Security Card described below is required for web access. See section 7.5.18 preceding for the rates and charges for a Management Access Interface using a dial or dedicated access option.
 - Security Card – The Security Card charge is a nonrecurring charge applicable for the issuance of the initial card or for the issuance of additional cards for additional users or to replace a lost, damaged or expired card.
