ABOUT NETWORK TELEPHONE CORPORATION

www.networktelephone.net

Overview

Headquartered in Pensacola, Fla., Network Telephone Corporation is a facilities-based, second generation, data-centric competitive exchange carrier providing high speed digital subscriber line (DSL), voice over DSL (VoDSL), local and long distance voice, internet and wireless data services throughout a nine-state southeastern US footprint.

Network Telephone secured government certification to provide local and long distance telecommunications exchange in the state of Florida in July 1998. Since then, the company has embraced forefront technology and enhanced product offerings, corporate and client architecture. Network Telephone is currently FCC certified to provide service to Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee. In addition, more than 300 collocation agreements have been filed with BellSouth, Sprint and GTE and strategic plans include delivery of end-to-end DSL and voice choices to 60+ markets before year-end. Network Telephone concentrates primarily on servicing the small and medium sized business market.

Ray Russenberger founded Network Telephone in 1998, realizing the opportunities that deregulation presented for embracing dynamic technology. Network Telephone immediately began bundling local and long distance voice exchange with data transmission at considerable savings off of incumbent local exchange carrier (ILEC's) rates.

After less than one year in existence, Network Telephone formed a partnership with California-based Copper Mountain Network®™ to deploy their CopperEdge™ DSL concentrators and packet-based integrated access devices, securing delivery of DSL to all of Network Telephone's territories. The move presented full-service telecommunications solutions and advanced technological offerings from one powerhouse source.

Other benchmarks quickly followed. Lucent Technologies feature-rich voice over DSL (VoDSL) PathstarTM technology joined the Network Telephone product delivery menu. Before year-end 1999, Network Telephone launched its Jackrabbit DSL product, with speeds 50 to 100 times greater than analog dial-up service and a dedicated connection at half the cost of former options, like T1 or ISDN usage-based charges. An aggressive sales team began pre-selling customers to Network Telephone's custom-designed fiber-optic circuitry in Pensacola, Fl. with a scheduled date to move to the network in the first quarter 2000.

In January 2000, Network Telephone successfully launched a new \$8 million, customized SavillExpress CLEC and SavillCare comprehensive customer care back-office infrastructure, automating services and accounting, streamlining customer profiling and management.

Since inception, Network Telephone has assembled a senior management staff representing more than 100 years of telecom experience. To date Network Telephone circuits connect approximately 19,000 lines and 4,000 customers.

Network Telephone Extends Reach of Free Powerline DSL™ Broadband Data and Voice Service for Business with T1 Solution from Copper Mountain

Copper Mountain Helps Southeast U.S. Integrated Communications Provider Deliver Affordable T1-Enabled High-Speed Internet Service Bundles to Business Customers Regardless of Distance from CO

PENSACOLA, Fla., July 31, 2001—Network Telephone, providing facilities-based broadband voice and data telecommunications services to businesses, and Copper Mountain Networks (Nasdaq: CMTN), a provider of copper-based broadband access solutions, today announce that Network Telephone is utilizing T1 Line Cards from Copper Mountain to extend the reach of its affordable, business-class, bundled voice, digital subscriber line (DSL) Internet and Web services in the Southeastern U.S.

Network Telephone is installing Copper Mountain's CopperEdge® T1 Line Cards in Copper Mountain 200 Digital Subscriber Line (DSL) Concentrators already activated in 175 sites throughout the Southeastern states. The T1 capability of Copper Mountain's CopperEdge concentrators enables Network Telephone to offer concurrent high-speed Internet, multi-line voice services, and site development and hosting applications to business customers located almost anywhere within the central office (CO) serving area. Network Telephone is providing the T1-enabled access to business customers located behind digital loop carriers (DLCs) or beyond the distance that can be reached using SDSL access. Network Telephone's broadband service bundle is priced to include a 160 Kbps Internet connection for businesses with five to 24 telephone lines, regardless of distance. This means that Network Telephone uses the high speed Internet connection to reach the customer with the high speed Internet connection.

"Network Telephone has been an industry leader in providing affordable broadband data and voice services over SDSL to small and mid-sized businesses throughout the Southeast U.S.," said Rick Gilbert, president and chief executive officer of Copper Mountain Networks. "Now, with the addition of T1-based DSL access, Network Telephone is leading the way in making its value-added solutions available to customers beyond the reach of traditional SDSL access."

"Access to affordable broadband service is increasingly vital to small and medium-sized business operations," said Network Telephone's chief executive officer and founder Ray Russenbaker.

"With Copper Mountain's T1 Line Card, Network Telephone can extend the DSL bundle to business-ready data and voice services to all interested customers in every metro market it serves. Distance from the CO is no longer an issue for Network Telephone or our prospective customers."

About the CopperEdge® T1 Line Card

Copper Mountain's 12-port CopperEdge T1 Line Card is hot-swappable in CopperEdge DSL concentrators, and can be deployed concurrently with Copper Mountain's CopperEdge Fx ADSL, G.lite, IDSL, and SDSL Line Cards. The CopperEdge T1 Line Card enables broadband service providers to leverage CopperEdge concentrators' robust Internet Protocol (IP) service intelligence—Copper Mountain's IP IQ™—to deliver cost-effective broadband voice and high-speed data services, even to customers located beyond the reach of conventional SDSL or who are served by Digital Loop Carrier (DLC) equipment. The CopperEdge T1 Line Card is interoperable with Copper Mountain's CopperRocket® 508T Integrated Access Device (IAD) as well as industry-standard T1 customer premise equipment (CPE).

About Network Telephone Corp.

Headquartered in Pensacola, Fla., Network Telephone Corp. is a facilities-based broadband Integrated Communications Provider (ICP) using voice over digital subscriber line (VoDSL) technology to deliver local and long-distance, high-speed Internet, Web site hosting, and site development services to small and medium-size businesses throughout the Southeast. The company employs almost 500 at its headquarters and 20 regional offices. More than 100 lines are in service to date. For more information about Network Telephone, visit the company Web sites, <http://www.networktelephone.net> and <http://www.powerlinedsl.com>.

About Copper Mountain Networks

Copper Mountain Networks, Inc. (Nasdaq: CMTN) manufactures intelligent DSL and aggregation equipment for central office, digital loop and multi-tenant unit (MTU) broadband networks worldwide. Its DSL solutions enable carriers and service providers to deliver cost-effective performance data and voice services over existing copper telephone wiring. Its CopperEdge® 200 DSL Concentrator is deployed in some of the world's largest public networks, and its environmentally hardened CopperEdge® RT (remote terminal) DSL Concentrator extends the reach of DSL to the millions of customers served by digital loop carriers (DLCs). Copper Mountain's OnPrem™ MTU Concentrator offers a cost-effective and scalable platform for service providers. With IP IQ™, Copper Mountain's robust Internet Protocol (IP) service intelligence, service providers can maximize bandwidth utilization, support value-added broadband services, and scale to meet the demands of hundreds of thousands of subscribers. Copper Mountain's CopperRocket® CPE family and CopperCompatible® program ensure Copper Mountain DSL concentrators are interoperable with the broadest range of customer premise equipment (CPE). Customers wanting more information about Copper Mountain products or office locations worldwide can visit the company's World Wide Web site at <http://www.coppermountain.com>. For investor relations information, contact us at IR@coppermountain.com.

Safe Harbor Warning

Portions of this release contain forward-looking statements regarding future events based on current expectations, and are subject to risks and uncertainties, such as the rate of installation of the Copper Edge® T1 line cards in Network Telephone's CopperEdge® 200 DSL Concentrators. Copper Mountain wishes to caution you that there are some factors that could cause actual results to differ materially from the results indicated by such statements. These factors include, but are not limited to: the ability to expand addressable markets for high-value services like quality and multi-line voice in the broadband industry; quarterly fluctuations in operating results attributable to the timing and amount of orders for our products; our ability to keep pace with rapidly changing product requirements of its customers; market acceptance of our products; concentration of our revenue in a small number of customers; factors and market conditions affecting the telecommunications market, the demand for DSL technologies, the market for DSL service providers, and economic conditions generally which are beyond Copper Mountain's control. We refer you to the documents Copper Mountain files from time to time with the Securities and Exchange Commission, specifically the section titled Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2000 and other reports and filings.

with the Securities and Exchange Commission.

Other Monthly Charges

Local Co

In addition to the monthly fee for your basic phone line, the following fees and surcharges will appear on your local bill.

All states:

Interstate Access Surcharge- (\$4.00-\$9.20 Varies by state)

This charge covers the cost of connections to the local telephone network, allowing you to make both local and long distance calls. This fee covers the cost of telephone wires, poles and other facilities that connect long distance carriers to local telephone companies. Customers are charged a monthly fee for each telephone line they use.

Local Number Portability- (\$.52 Local Number Portability surcharge will be eliminated during the beginning of February 2004)

Number portability allows you to move almost anywhere within your local calling area and keep the telephone number you have today. You can also keep your telephone number if you switch your local service provider. The local number portability surcharge allows telephone companies like Sprint to recover some of the costs for providing this service. All customers regardless of whether they move their telephone number or not must pay this FCC-approved surcharge.

Universal Service Fund- (varies by community)

This surcharge recovers some of the costs Sprint incurs to keep basic telephone service affordable in rural and high cost areas. This fund also makes it possible for telephone companies like Sprint to assist low-income customers that qualify, through lifeline assistance programs. It also provides support for telecommunications services used by schools, libraries and rural health care providers. In some areas, state governments may also require a similar surcharge for special programs within their communities.

Florida:

Touch-tone Service- Touch Tone Service was included in the access line in Florida as of 03/01/2003

Touch-tone service allows you to use Sprint network calling features as well as the interactive customer service features of other companies like banks, airlines, etc. With touch-tone service a phone emits signals or tones (instead of clicks) that automated service systems are able to interpret and process.

Hearing Speech Surcharge- (\$.13)

This fee provides funding for telecommunications devices and relay service to be furnished to hearing and speech impaired individuals. The relay service is the service of relaying messages from a hearing impaired customer with a TDD (telecommunications device for the deaf) to someone else who does not have a TDD and/or vice-versa. The surcharge applies to all residential and business phone lines.

Indiana:

Hearing Speech Surcharge- (\$.06)

This fee provides funding for telecommunications devices and relay service to be furnished to hearing and speech impaired individuals. The relay service is the service of relaying messages from a hearing impaired customer with a TDD (telecommunications device for the deaf) to someone else who does not have a TDD and/or vice-versa. The surcharge applies to all residential and business phone lines.

Kansas:

No additional

Minnesota:
No additional**Missouri:****Extended Local Calling Charge**

This charge reflects the additional cost of expanding your local calling area to include former long distance or local toll destinations. These charges vary by community and apply only in areas where local calling has been expanded.

Relay Surcharge-(\$.10)

This fee provides funding for telecommunications devices and relay service to be furnished to hearing and speech impaired individuals. The relay service is the service of relaying messages from a hearing impaired customer with a TDD (telecommunications device for the deaf) to someone else who does not have a TDD and/or vice-versa. The surcharge applies to all residential and business phone lines.

North Carolina:**Touch-tone Service- Touch Tone is included in the access line in North Carolina**

Touch-tone service allows you to use Sprint network calling features as well as the interactive customer service features of other companies like banks, airlines, etc. With touch-tone service a phone emits signals or tones (instead of clicks) that automated service systems are able to interpret and process.

Nebraska:**Hearing Speech Surcharge-(\$.07)**

This fee provides funding for telecommunications devices and relay service to be furnished to hearing and speech impaired individuals. The relay service is the service of relaying messages from a hearing impaired customer with a TDD (telecommunications device for the deaf) to someone else who does not have a TDD and/or vice-versa. The surcharge applies to all residential and business phone lines.

Extended Local Calling Charge

This charge reflects the additional cost of expanding your local calling area to include former long distance or local toll destinations. These charges vary by community and apply only in areas where local calling has been expanded.

New Jersey:**Touch-tone Service-(\$.75)**

Touch-tone service allows you to use Sprint network calling features as well as the interactive customer service features of other companies like banks, airlines, etc. With touch-tone service a phone emits signals or tones (instead of clicks) that automated service systems are able to interpret and process.

Nevada:

No additional.

Ohio:**Intrastate Access Fee**

The Intrastate Access Fee was added to customer invoices on July 3, 2001. This fee is simply a more direct method of billing for charges that were formally included in customer long distance charges. Customers have been paying this fee all along, but the charge was included in their long distance rates before July 3, 2001. To help as many customers as we can offset this fee, Sprint eliminated Local Toll and Usage Charges on more than 500 calling routes throughout the state."

Oregon:**Residential Service Protection Fund-(\$.13)**

This fee provides funding for telecommunications devices and relay service to be furnished to hearing and speech impaired individuals. The relay service is the service of relaying messages from a hearing impaired customer with a TDD (telecommunications device for the deaf) to someone else who does not have a TDD and/or vice-versa. The surcharge applies to all residential and business phone lines.

Extended Local Calling Charge

This charge reflects the additional cost of expanding your local calling area to include former long distance or local toll destinations. These charges vary by community and apply only in areas where local calling has been expanded.

Pennsylvania:

No additional.

South Carolina:

No additional

Tennessee:**Touch-tone Service-(\$1.00)**

Touch-tone service allows you to use Sprint network calling features as well as the interactive customer service features of other companies like banks, airlines, etc. With touch-tone service a phone emits signals or tones (instead of clicks) that automated service systems are able to interpret and process.

Texas:**Extended Local Calling Charge**

This charge reflects the additional cost of expanding your local calling area to include former long distance or local toll destinations. These charges vary by community and apply only in areas where local calling has been expanded.

Virginia:

No additional.

Washington:**Extended Local Calling Charge**

This charge reflects the additional cost of expanding your local calling area to include former long distance or local toll destinations. These charges vary by community and apply only in areas where local calling has been expanded.

Wyoming:**Hearing Speech Surcharge-(\$.10)**

This fee provides funding for telecommunications devices and relay service to be furnished to hearing and speech impaired individuals. The relay service is the service of relaying messages from a hearing impaired customer with a TDD (telecommunications device for the deaf) to someone else who does not have a TDD and/or vice-versa. The surcharge applies to all residential and business phone lines. This charge appears on the bill as "Relay/TAP Surcharge".

XSPEDIUS TO ACQUIRE E.SPIRE FOR \$68 MILLION

LAKE CHARLES, LA. (June 3, 2002) – Xspedius Management Corp. LLC ("XMC") today announced that it has received bankruptcy court approval to acquire substantially all of the assets of e.spire Communications, Inc. ("e.spire") pursuant to a sale order by the US Bankruptcy Court in e.spire's ongoing bankruptcy proceedings. XMC will acquire e.spire's competitive local switching and fiber assets in 36 markets spanning 19 states as well as e.spire's ACSI Network Technologies fiber and conduit assets located in California, Florida, Georgia, Maryland, Texas, Virginia and the District of Columbia. The purchase consideration includes \$18 million of cash, a \$50 million note secured by the assets of ASCI Network Technologies, and an ongoing ownership interest in XMC. The e.spire assets and operations to be acquired by XMC have an original invested capital basis of \$1.6 billion and generated \$164 million of annualized revenue as reflected in 1Q 2002 results.

XMC is an affiliate of Xspedius Holdings Corp. ("Xspedius"), a competitive communications carrier based in Lake Charles, Louisiana, that operates in the southeastern U.S. XMC (founded by former Brooks Fiber executives James Allen & Mark Senda) and Xspedius are both affiliated with Thermo Telecom Partners LLC ("Thermo"), The 1818 Fund III, L.P. (a limited partnership managed by Brown Brothers Harriman) and the Meritage Private Equity Funds. Brown Brothers Harriman & Co advised XMC and Xspedius in this transaction.

James C. Allen, Chairman of Xspedius Corp., will also serve as Chairman of Xspedius Management Co. Mr. Allen has a distinguished track record of success in the competitive telecommunications industry. Mr. Allen co-founded Brooks Fiber Properties, Inc. and served as its Chief Executive Officer and Vice Chairman until its sale to Worldcom for \$3.4 billion. Commenting on the acquisition of e.spire, Mr. Allen said "The acquisition of e.spire represents a significant opportunity for Xspedius and its stakeholders. e.spire, as a company, is approximately the same size as Brooks Fiber when we sold it to WorldCom in 1998. It represents the finest collection of debt-free local fiber assets in the United States today. We look forward to applying the same management skills we used at Brooks Fiber to improve the quality and extent of service offerings to our customers."

Mark W. Senda, President & Chief Executive officer of Xspedius Corp., will serve Xspedius Management Co. in that same capacity. Mr. Senda has been a leader in the competitive telecommunications industry for the past two decades. Prior to joining Xspedius, Mr. Senda served in executive positions with AT&T Canada, MFS Communications, and Brooks Fiber Properties, Inc. Commenting on the transaction, Mr. Senda stated "Our desire to pursue e.spire in this proceeding is based upon our belief that it offers the finest collection of networks, customers and employees available today within the competitive communications industry."

About e.spire

e.spire Communications, Inc., an integrated communications provider, offers traditional local and long distance, dedicated Internet access, and advanced data solutions, including ATM and frame relay. e.spire's subsidiary, ACSI Network Technologies, Inc., provides third parties, including other communications concerns, municipalities, and corporations, with turnkey fiber-optic design, construction, and project management expertise. More information about e.spire is available at e.spire's Web site, www.espire.net.

Anonymous Call Rejection (ACR)

[Back to Top](#)

Anonymous Call Rejection (ACR) can be activated and/or deactivated at the Customer's discretion. ACR is provisioned in an inactive status and must be initially turned on by the Customer. See charts for activation and deactivation codes and confirmation tones:

SERVICE	ACTIVATION CODE	DEACTIVATION CODE
TOUCH-TONE	*77	*87
PULSE/ROTARY	1177	1187

Automatic Call Back (ACB)

[Back to Top](#)

Automatic Call Back (ACB) must be activated by the Customer. ACB is provisioned in an inactive status and must be initially turned on by the Customer. See charts for activation codes and confirmation messages:

SERVICE	ACTIVATION CODE
TOUCH-TONE	*69
PULSE/ROTARY	1169

ACTION	CONFIRMATION MESSAGE
*69 Activated	A confirmation message that repeats the telephone number of the last incoming call will be heard upon activation.
Subscriber is prompted	The recording advises the subscriber to enter the additional digit #1 (rotary, pulse or touch-tone) to continue with feature activation or hang up to end activation

Automatic Recall

[Back to Top](#)

Automatic Recall is activated by a customer dialed code, which automatically redials the last number attempted.

SERVICE	ACTIVATION CODE
TOUCH-TONE	*66
PULSE/ROTARY	1166

If	Then
The line is not busy	<ul style="list-style-type: none"> • The call will complete
The line is busy	<ul style="list-style-type: none"> • The Customer will hear a confirmation tone and hang up • Once the Customer hangs up, the network will monitor the busy/idle status of both lines every 45 seconds for up to 30 minutes • The network will begin 30 minute queuing process
Both lines are idle	<ul style="list-style-type: none"> • The Customer receives ring back tone (short, short, long) • Customer picks up receiver • Network completes call
Subscriber doesn't answer or is on another call	<ul style="list-style-type: none"> • The network attempts to ring back every 5 minutes for the remainder of the 30 minute queuing process
Subscriber still wants to place the call and the line stays busy for over 30 minutes	<ul style="list-style-type: none"> • Customer should dial the telephone number once again • Hang up receiver • Dial *66 (1166 - Pulse/Rotary)

Call Block

[Back to Top](#)

Call Block can be activated and/or deactivated at the Customer's discretion. Call Block is provisioned in an inactive status and must be initially turned on by the Customer. See charts for activation and deactivation codes:

SERVICE	ACTIVATION CODE	DEACTIVATION CODE
TOUCH-TONE	*60	*80
PULSE/ROTARY	1160	1180

To Activate/Deactivate Call Block, follow the steps below:

Step	Action
1	Hang up from unwanted call
2	Pick up telephone to get dial tone
3	Dial *60 (1160 Pulse/Rotary dial)
4	Dial 3 to activate your call block list (first entry only) (If done again, Call Block service will deactivate)
5	Listen for announcement followed by beep tone
6	Dial #01# (1201 Pulse/Rotary dial)
7	This number will be considered a private entry and will be read back as Private (See Note)
8	Either continue to edit the list or hang up

To Activate Call Block and edit numbers for the screening list, follow the steps below:

Step	Action
1	Pick up the telephone and listen for dial tone
2	Dial *60 (1160 Pulse/Rotary dial)
3	To activate Call Block with existing screening list, hang up
4	To establish or change screening list, listen for announcement with instructions followed by beep tone

Call Forward Busy

[Back to Top](#)

Call Forward Busy is an optional feature which automatically forwards calls to an alternate telephone number should the line be busy or off-hook. The Customer specifies the number to which the calls are forwarded at the time the feature is ordered and requires no action. Another service order would be required to change the forward to number.

The feature is in operation on a continuous basis and can not be activated or deactivated by the Customer.

Call Forwarding Don't Answer[Back to Top](#)

Call Forwarding Don't Answer is an optional feature which automatically forwards unanswered incoming calls to an alternate telephone number. The Customer specifies the number to which calls are forwarded to and the approximate number of ringing cycles at the time the feature is ordered. A service order is required to change the forward to number and/or the ringing cycle. This may be used to forward calls in connection with Voice Message Services.

The feature is in operation on a continuous basis and can not be activated or deactivated by the Customer.

Call Forward Don't Answer/Busy[Back to Top](#)

Call Forward Don't Answer/Busy: Automatically redirects all incoming calls to another telephone number or to e.spire voice mail. This feature is usually activated when a customer wishes not to be disturbed by incoming calls.

The feature is in operation on a continuous basis and can not be activated or deactivated by the Customer.

Call Forwarding Variable[Back to Top](#)

Call Forwarding Variable allows you to have all incoming calls forwarded to another number. The forwarding number may be changed as often as necessary. It is activated and/or deactivated at the Customer's discretion.

See charts for activation and deactivation codes:

SERVICE	ACTIVATION CODE	DEACTIVATION CODE
TOUCH-TONE	72# or *72	73# or * 73
PULSE/ROTARY	72	73

To Activate Call Forwarding Variable, follow the steps below:

Step	Action
1	Pick up the telephone and listen for dial tone
2	Dial the activation code for Call Forwarding Variable (either 72# or *72 (touch-tone) or 72 (rotary))
3	Listen for second dial tone
4	Dial the telephone number to which the calls are to be forwarded to
5	Listen for two (2) short tones
6	When the called party answers, Call Forwarding Variable is in effect

7	<p>The switch will automatically dial the forward to number, and one of the following scenarios will apply:</p> <p>Scenario 1 If there is an answer at the forward to number, the /CFV feature is immediately activated. No confirmation tone is received, and the user should hang up.</p> <p>Scenario 2 If the call goes unanswered, the user must hang up and then repeat Step 2 (*72 or 72#) to complete the activation. The user will then receive a confirmation tone.</p>
---	--

To Activate Call Forwarding Variable when the line is busy or no answer, follow the steps below:

Step	Action
1	Hang up telephone
2	Repeat steps 1 through 5 (See chart above) (On the 2nd attempt, no answer is required and the attempt must be within two (2) minutes of 1st attempt)

To Deactivate Call Forwarding, follow the steps below:

Step	Action
1	Pick up the telephone and listen for dial tone
2	Dial either 73# or *73(touch-tone) or 73 (rotary)
3	Wait for two (2) beep and dial tones

Call Forward Remote Activation

[Back to Top](#)

Call Forward Remote Activation Allows you to access call forwarding from a remote location. Using Remote Activation of Call Forwarding Variable is easy; you just listen to the prompts (instructions) after dialing the REMOTE ACCESS DESIGNATED NUMBER.

Remote Access Designated Number (RADN)

Your RADN is shown in the REMOTE ACCESS DESIGNATED NUMBER reference table above. The password defaults to 0000 or the last four (4) digits of the telephone number on which the feature is provisioned.

Activate from Remote Location

Step	Action
------	--------

1.	Dial the Remote Access Designated Number
2	Dial your 7-digit office telephone number that has RACFV. The dialed telephone number will be repeated to allow for ensure accuracy.
3	Dial your Personal Identification Number (PIN) and # (See Note 1)
4	Dial the Call Forwarding Variable activation code 72# .
5	Dial the number to which you want your calls forwarded to and #. If you must dial a 1 or area code to reach this number from your home or office, then do so. Then the forwarded to telephone number dialed will be repeated to ensure accuracy. (See NOTE 2)

Deactivate from Remote Location

Step	Action
1.	Dial the Remote Access Designated Number
2	Dial your 7-digit office telephone number that has RACFV. The dialed telephone number will be repeated to ensure accuracy.
3	Dial your Personal Identification Number (PIN) and # (See Note 1)
4	Dial the Call Forwarding Variable deactivation code 73#. Dial 1 to confirm deactivation

Note (1): You have three chances to enter the correct telephone number that has REMOTE ACTIVATION TO CALL FORWARDING VARIABLE and your PERSONAL IDENTIFICATION NUMBER. After three attempts, you will be disconnected. You must hang up and try again.

Note (2): If you forward calls to any number outside your local calling area, you will be charged for any calls forwarded from your number to the distant number.

Activate from Business Location

Step	Action
1.	Dial the Special Access Number from the telephone number that has RACFV. The dialed telephone number will be repeated to ensure accuracy.
2	Dial your Personal Identification Number (PIN) and # (See Note 1)
3	Dial the Call Forwarding Variable activation code 72#.
4	Dial the number to which you want your calls forwarded to and #. If you must dial a 1 or area code to reach this number from your home or office, then do so. Then the forwarded to telephone number dialed will be repeated to ensure accuracy. (See NOTE 2)

Deactivate from Business Location

--	--

Step	Action
1.	Dial the Special Access Number from the telephone number that has RACFV. The dialed telephone number will be repeated to ensure accuracy.
2	Dial your Personal Identification Number (PIN) and # (See Note 1)
3	Dial the Call Forwarding Variable deactivation code 73#. Dial 1 to confirm deactivation

Note (1): You have three chances to enter the correct telephone number that has REMOTE ACTIVATION TO CALL FORWARDING VARIABLE and your PERSONAL IDENTIFICATION NUMBER. After three attempts, you will be disconnected. You must hang up and try again.

Note (2): If you forward calls to any number outside your local calling area, you will be charged for any calls forwarded from your number to the distant number

Call Hold

[Back to Top](#)

Call Hold: Calls can be placed on hold by simply flashing the switch hook once. Only one call per station can be placed on hold at one time. To retrieve the original call flash the switch hook again.

Call Transfer

[Back to Top](#)

Call Transfer : Calls can be transferred to another number without hanging up. This is done by pressing the switch hook, and dialing the number to which the call will be transferred to then hanging up the receiver. Hanging up the receiver will complete the transfer between the two parties.

Call Waiting

[Back to Top](#)

Call Waiting: Provides an audible alert when you receive a second incoming call. It allows you to put your call on hold to answer the incoming call without disconnecting the first call. This is done by flashing the switch hook to put the first call on hold and to answer the second call. It is also possible to hang up and allow the phone to ring to answer the second call. Consecutive flashes allow you to alternatively talk to the original and the new calling parties.

To use Call Waiting follow these steps:

Step	Action
1	Depress the switch-hook once (The first call is put on hold and you will be

	connected to the second call
2	Depress the switch-hook once again (The first call and the second call will be connected)

Caller ID (Number Only)[Back to Top](#)

Caller ID (Number Only) service allows you to view the calling party's telephone number, date and time of the call. After the first full ring, the calling number appears on the Caller ID display unit. The phone must be on the hook when the call is received.

NOTE: The customer is responsible for providing the caller ID display unit. Depending on the CPE unit, the area code plus the 7-digit telephone number, the month, day and time of the call may be displayed and/or stored for future viewing. No interaction is required from the user other than installing the Caller ID unit.

Available for PRI Trunks (Local ISDN CEU) and Business Exchange Lines (Local Service & Local Service Plus)

Caller ID- Deluxe (Name and Number)[Back to Top](#)

Caller ID- Deluxe (Name and Number) service allows you to view the calling party's listed name and telephone number, date and time of the call. After the first full ring, the listed name and calling number appear on the Caller ID display unit. The phone must be on the hook when the call is received.

NOTE: The customer is responsible for providing the caller ID display unit. Depending on the CPE unit, the name, area code plus the 7-digit telephone number, the month, day and time of the call may be displayed and/or stored for future viewing. Not all CPE units can provide name display, read manufacturers information carefully. No interaction is required from the user other than installing the Caller ID unit.

Available for Business Exchange Lines Only (Local Service & Local Service Plus)

Caller ID w/Call Waiting[Back to Top](#)

Caller ID w/Call Waiting service allows you to view the listed name, telephone number, date and time of a second incoming call while the line is in use, in addition to the normal Caller ID Deluxe feature. This gives the customer the choice of answering or ignoring the second caller. (At this point, the second caller will hear ringing until they hang up. Any 3rd caller will receive a busy signal unless forwarded to another number or voice mail service.)

NOTE: The customer is responsible for providing the caller ID display unit.

Depending on the CPE unit, the name, area code plus the 7-digit telephone number, the month, day and time of the call may be displayed and/or stored for future viewing. Not all CPE units can provide name display or the Call Waiting feature, read manufacturers information carefully. No interaction is required from the user other than installing the Caller ID unit.

Available for Business Exchange Lines Only (Local Service & Local Service Plus)

Control/Cancel Call Waiting (CCW)

[Back to Top](#)

Control/Cancel Call Waiting (CCW) provides the ability to temporarily disengage call waiting for uninterrupted talking before or during a call. When CCW is activated, anyone calling will receive a busy signal and no CW tone will interrupt the customer's call.

To Use Control/Cancel Call Waiting before making a call:

Step	Action
1	Pick up telephone and listen for dial tone
2	Dial *70 (Touch-tone) or 1170 (Pulse/Rotary)
3	Listen for second dial tone
4	Dial the desired telephone number

To use Control/Cancel Call Waiting while a call is in progress:

Step	Action
1	Must be a 3-way Call subscriber
2	Depress the switch-hook to place the call on hold
3	Listen for dial tone
4	Dial *70 (Touch-tone) or 1170 (Pulse/Rotary)
5	Depress the switch-hook once again to return to the original call, pick up telephone, listen for dial tone

Hunting (Rollover Lines)

[Back to Top](#)

Hunting (Rollover Lines) is placed on individual telephone lines that make up a group, also known as a hunt group. Hunt groups are a series of lines organized in such a way that if the first line is busy the next line is hunted and so on until a free line is found. There are two types of hunting, serial and circular.

Serial: Serial hunting searches for available lines from the top of the group down. Each incoming call always starts at the top of this group and is rolled to an available line in that hunt group. If the call reaches the last line in the hunt group sequence it does NOT roll to the first line in the hunt group.

***Note:** The last line in a serial hunt group does not need hunting because the last line does NOT roll to the first line in the hunt group.

Circular: In Circular hunting, the switch has the ability to remember the last

line it connected, and starting there, it hunts down to the next available line. Once the last line in the hunt group is reached, it rolls to the top or the first line in the hunt group. It does NOT continue to roll after completion of loop. Essentially, the available lines are searched for in a circle.

***Note:** All lines in the hunt group **MUST** have hunting on them because Circular hunting rolls to the top or first line again.

Identi-Ring

[Back to Top](#)

Identi-Ring service enables two or three telephone numbers to share one line. A unique ringing pattern is provided for each of the additional numbers. This allows a customer to determine prior to answering a call, which number the calling party has dialed.

Ringing Patterns:

PATTERN	RINGS	CALL WAITING TONE
A	NORMAL	NORMAL
B	SHORT, SHORT	SHORT, SHORT
E (5ESS only)	SHORT, LONG, SHORT (Identi-Ring II only)	SHORT, LONG, SHORT

Speed Dialing (8 or 30)

[Back to Top](#)

Speed Dialing (8 or 30): Allows one or two digit dialing to reach preset numbers. You can set and reset the codes at your discretion. Speed Dial 8 and Speed Dial 30 can be used together or independently.

SPEED DIAL 8:

Step	Action
1	Listen for dial-tone.
2	Dial 74# (touch-tone) or 74 (rotary or pulse)
3	Select a one (1) digit code (2 through 9)
4	Listen for dial-tone
5	Dial the code selected and the telephone number (example: 2 + 1 + 800 + 555-1212)
6	Two beeps confirm your entry. Pick up the telephone and listen for dial tone

SPEED DIAL 30:

Step	Action
1	Listen for dial-tone
2	Dial 75# (touch-tone) or 75 (rotary or pulse)

3.	Select a two (2) digit code (20 through 49)
4.	Listen for dial-tone
5.	Dial the code selected and the telephone number (example: 20 + 1 + 800 + 555-1212)
6	Two beeps confirm your entry

TO CALL A NUMBER SELECTED FOR SPEED CALLING:

Step	Action
1	Dial the desired one or two digit code
2	For touch-tone, add the # symbol when you dial the code

[News & Events](#)
[Contact Us](#)
[Site Map](#)

Three Way Calling[Back to Top](#)

Three Way Calling: Allows a third party to be added to a call already in progress. To add a third party to an existing call, briefly press down the switch hook to place the first party on hold. When you hear the dial tone, dial the telephone number of the party to be added. Press down the switch hook again to establish the three-way connection.

Toll Restriction[Back to Top](#)

Toll Restriction: A variety of toll restrictions are offered based on our customers needs. These include, but are not restricted to, the following:

- Block NPA 900 & 976
- Block International
- Block NPA 900
- Block NPA 976
- Block NPA 900, 976 & International
- Block NPA 900 & International
- Block NPA 800, 877, & 888
- Allow Only NPA 800, 877, & 888
- No local or long distance calling allowed

 - ▶ Complete Integrated
 - ▶ Data ConneXions
 - ▶ Complete Xchange™
 - ▶ Cities Served
-

Dependable and always there, Xspedius Communications Complete Xchange™ products provide essential voice dial-tone service you can count on. Xspedius offers you a comprehensive portfolio of local calling services which satisfy basic as well as complex voice calling needs.

We currently offer three local calling service options to simplify your buying decision. Complete T is our flat-rated, all-in-one service, which provides 24 lines/trunks delivered over DS1 or PRI facility, which includes many enhanced local calling features for one low monthly fee. And if our Complete T DS1 or PRI service options don't suit your needs, we provide Complete Lines - Lines, Trunks, or Partial PRI - our unbundled local calling service. With Complete Lines - Lines, Trunks, or Partial PRI you select the number of lines and calling features that are best suited to your business needs. Also, in select markets Xspedius offers local service to businesses that do not need a T1 - Complete Xpress™ service is a fully featured line or trunk designed to give you flexibility and convenience for your business needs.

Digital Trunk Service

No matter what your telecommunication needs for trunks are, they can be configured to accept outgoing calls only, incoming calls or to handle both incoming and outgoing call traffic. Also, certain Calling Features can be assigned to your trunks that help your business efficiently manage the call flow. Digital Trunk Service is ideal for businesses that have complex business systems such as PBXs or hybrid key systems.

Enhanced DID Trunk Service

Enhanced DID Trunk Service allows you to provide individual telephone numbers for each of your employees that will improve the efficiency of your day-to-day business operations by reducing administrative and business system costs.

If you are interested in any Xspedius Communications Voice Service, please email our Product Marketing Department or call 1.877.962.1900.

VOICE

Local Service

NewSouth Communications' Lucent 5ESS AnyMedia™ digital switches enable us to provide you with the best quality service at the best price.

PBX Trunks

NewSouth Communications offers comprehensive service designed to complement your existing PBX or Hybrid Key system.

Business Exchange Lines

NewSouth Communications' Business Exchange Lines enable you to customize the features and functionality of your telephone.

Extended NewArea

If your business places a large number of calls beyond our expanded local calling area, then Extended NewArea™ is designed for you.

Point-to-Point

NewSouth Communications' Point-to-Point functions as a private line between two or more locations. Your business can have continuous access to 4-digit dialing and high-speed data transfer to those locations you call most often.

Long Distance Service

Whether you're calling across the world or across your state, NewSouth Communications has the right long distance solution for your business.

International Long Distance

NewSouth Communications offers international calling to over 240 countries. Unlike other telecommunications providers, NewSouth Communications aggregates your monthly recurring charges.

800 Access

800 service is an easy and convenient way for your customers to contact you...at no charge to them.

Account Codes

NewSouth Communications' customers can track local and long distance calls by caller, department or client using our advanced Account Code system.

Small Business Solutions

Small Business Solutions enables businesses with as few as two lines to enjoy the savings of a competitive telecommunications provider. Your small business will enjoy savings of 15-20% off your current BellSouth services. Finally, small businesses have a choice.

Voice Mail

NewMessaging™ provides customers a flexible and powerful tool that can answer phone calls, take messages, and store them for review at a later time.

Conference Calling

Harness the power of the conference call for employees, customers and vendors with NewConferencing™ from NewSouth Communications. This service lets you organize a conference call between three or 300 people quickly and easily.

Phone Cards

When you are away from the office, our Phone Card puts all the benefits of NewSouth Communications right in your pocket. Calls can be made from almost anywhere to just about everywhere in the world.

Enhanced Features

Expand your communication capabilities with our suite of advanced voice features. These include an Individualized Dialing Plan, Multi-way Calling, Queuing, and Customer Recovery options.

INTERNET & DATA

Managed Network Security

NewSouth Communications is leading the industry with LANLock, a managed Internet security product that brings the latest in small-business network protection to your small business.

High-Speed Internet

NewSouth.net, our high-speed Internet product, brings you the World Wide Web with the touch of a button. Your connection is fast and it's secure - the bandwidth you purchase is guaranteed.

Private Networking

Netosphere, can provide your business with a comprehensive, custom-designed private networking solution for high-speed business communications. With a flexible, cost-effective private network, you will mobilize your business by sharing information and applications between sites.

BUNDLES

Suite T

A T1 made to order for your business. You choose the combination of Internet and voice channels, all with the convenience of one flat rate month after month.

Small Business Solutions

Small Business Solutions enables businesses with as few as two lines to enjoy the savings of a competitive telecommunications provider. Your small business will enjoy savings of 15-20% off your current BellSouth services. Finally, small businesses have a choice.
