KMC Business Line Service

Local Business Telephone Service from Your Local Full-Service Provider

You can select from a range of options that includes everything from a single line to a multi-line service with a lot of features. Our state-of-the-art fiber networks ensure clarity and dependability of your service. What's more, there's no expensive start-up cost and no costly equipment to buy. **KMC Business Line Service** interfaces with your equipment, whether it is a PBX, Key System or an individual phone line. And you can keep your present telephone number!

We offer several types of local service, including **KMC Business Line Service** either a Basic Business Line (Flat Rate and Measured) or a Basic Business Line Hunt (Flat Rate and Measured). We also offer both analog and digital Private Branch Exchange (PBX) trunk service which provides local access for your business. Whether you need Direct Inward Dial (**KMC PBX Trunk Service** DID Trunk) or Outward Dial (**KMC PBX Trunk Service** DOD Trunk) or a combination (**KMC PBX Trunk Service** Combination Trunk), we'll configure the trunk to the requirements of your business.

For ISDN users, KMC offers two flexible, cost-effective solutions designed to meet complex voice and data telecommunications needs:

- **KMC Basic Rate ISDN Service**, and
- **KMC Primary Rate ISDN Service**.

Whichever type of ISDN service you select, you will receive a monthly invoice from KMC Telecom ®.

Madison River compar

Madison River Communications operates two divisions, the Local Telecommunications Division and the Integrated Communications Division. The four local exchange carriers that form the Local Telecommunications Division provide a stable foundation for growth in attractive rural markets in the Southeast and Midwest.

The Integrated Communications Division, also known as Madison River Communications, LLC has deployed an edge out strategy by offering products and services in cities and towns near Madison River's rural telephone properties. The United States Telephone Association lists Madison River Communications as the 18th largest telephone company in the country.

Site Map

Since Madison River's first rural telephone company acquisition in North Carolina, the Local Telecommunications Division has demonstrated improved EBITDA margins and improved operations. Additionally, the Local Telecommunications Division has successfully deployed Private Label long distance product, as well as DSL and dial-up Internet access despite limited competition in Madison River's rural markets as well as a favorable regulatory environment, this division continues to increase its voice connections.

MebTel Communications

- Located between Greensboro and Raleigh in North Carolina
- Acquired in January, 1998
- 13,234* Total Connections

Gallatin River Communications

- Exchanges located in Galesburg, Dixon, and Pekin, Illinois
- Gallatin River Assets were acquired in November 1998
- 85,355* Total Connections

GulfTel Communications

- Located east of Mobile in Foley Alabama
- Acquired in September, 1999
- 64,213* Total Connections

Coastal Communications

- Located southwest of Savannah in Hinesville, Georgia
- Acquired in March, 2000
- 46,727* Total Connections

*Based on a combination of voice and data connections reported on 2002.

Business Lines

Business Lines are often referred to as "Plain Old Telephone Service" (POTS) Lines. Business lines are communication circuits between the local end office and your telephone, key system, fax, or modem.

MCI Business Lines, as its simplest, are the ideal solution for all your routine business telecommunication applications. Whether you use your MCI business line to connect to a telephone, fax machine, modem system, you can be assured that you will have local service you can count on. Business lines allow you to:

- Make and receive calls
- Transmit faxes
- Gain access to the Internet

Which Businesses Can Use MCI Business Lines?

Business Lines are ideal for:

- Small Business customers
- Customers who do not currently require the feature functionality of a PBX
- Customers with fewer than 15 lines

Why MCI Business Lines?

MCI has an impressive array of local features that define and enhance the MCI Business Line offering. Features include:

- **Call Transfer or Three Way Conference Calling.** Permits station users to transfer any call or party to an established connection.
- **Call Forward Busy.** Redirects calls to another station when called station is busy.
- **Call Forward No Answer.** Redirects calls to another station when called station does not answer.
- **Call Forward Variable.** Incoming calls are redirected to another station.
- **Speed Dial (8 or 30 codes).** Allows users to place calls to designated numbers by dialing one or more digits rather than the complete telephone number. Users can program up to 8 or 30 codes.
- **Call Waiting/Cancel Call Waiting.** With the sound of a beep, the user will be alerted that another call is waiting to be answered. It is not necessary to terminate the original call to answer the call, which is a feature of the MCI Business Line.
- **Caller ID w/Name.** Provides the MCI Local Customer the ability to identify the name of (or station) telephone number associated with the calling party. This feature requires a two-line minimum.
- **Caller ID Blocking-Selective, -Complete.** The caller's number can be blocked from the destination on every call.
- **Voice Mail.** Voice Mail offers extensive voice messaging features, packaged in a way that makes it easy to use. Simple prompts help with every step, giving you the option to review messages, record and change passcodes by simply pressing numbers on your touch-tone keypad.
