Winning in the game of business

Being successful in business means finding smarter and more efficient ways to communicate. Become a winner by simplifying and broadening your communications; your customers will work better with you, and your employees will work better for you.

We work closely with our customers to understand how they communicate both internally and externally. Our solution represents an investment in your business performance: growth, productivity, cost-reduction, quality and customer satisfaction.

We are focused on meeting your needs by offering you:

- An alternative provider of local phone service.
- A single, customer-focused resource for all your voice, data and Internet needs.
- One billing statement for all your voice, data, Internet and equipment needs.
- An account manager to establish and manage your account.
- Superior customer service.

For more information on our specific services, see our product pages.

Our Story

Cinergy Communications offers a complete line of communications services and products, including local service, long distance, Internet access, web hosting and telephone equipment. Our focus is to help both business and residential customers throughout Indiana, Kentucky, Tennessee and Ohio communicate more effectively.

Cinergy Communications, formerly Community Telephone, was born out of the merger of five companies located in southern Indiana and western Kentucky. They were Wright Businesses and Long Distance Management (Paducah, KY), Telemanagement Systems (Evansville, IN) and Network WCS (Evansville, IN), MarTech Communications (Bowling Green, KY) and Mercury Communications (Hopkinsville, KY).

These companies came together with the goal of collectively providing the cities they served a higher level of service with a local presence. During the last two years we've developed into a full-service, integrated communications company.

Our success then caught the attention of Cinergy Corporation, one of the nation's leading diversified energy companies. In May of 2001, we changed our name based on our affiliation with Cinergy Corporation to better reflect our core business strengths.

We are now unified under a new name, with a new look, but our management remains the same, as well as our commitment to serving Indiana, southern Ohio, western Kentucky and north-central Tennessee.

Our focus now includes an increased emphasis on research and development of new products and services. Our goal isn't simply to be the lowest-priced service, but to be the best service you can get for your money.

A strong past helps build a strong future. With three decades of industry experience, we've built a record that speaks of innovation and

vision. Among our accomplishments:

- First interconnect company (sells and services business telephone systems)in Paducah, KY -- 1969.
- First local company in our region to offer consumers a lower-cost alternative for long distance service -- 1982.
- First Internet Service Provider (ISP) in our region -- 1994.
- Pioneer in online transactional banking -- 1995.
- One of the first phone companies doing business following deregulation of local telephone service under the "Telecommunications Act of 1996."
- Industry leadership in software development for doing business over the Internet.
- Pioneer in IP Telephony -- 2003.

Our future is exciting and full of new endeavors. We are making decisions that will ensure the highest level of customer service, enhance the scope of the products and services we offer and help support the growth and future success of our customers.

Cinergy Communications now offers local telephone service that gives you our most popular enhancements for one low price.

- o **KEEP** your current phone number
- o **FREE** 60 minutes of long distance
- o **FREE** Caller ID with Name
- o **FREE** Call Waiting (with Caller ID)
- o **FREE** 3-way Calling
- o **NO FEE** to switch you over¹

Click [HERE](#) for a list of frequently asked questions about our local phone service.

Sign up now!

Sign up for local telephone service from Cinergy Communications right now through our completely secure sign-up wizard. Start by entering the telephone number you want to switch:

() -

Find out more...

Looking for more information about our local telephone service? Just enter the first six digits of your phone number, including your area code, to find out what services we offer in your area. (We do not record your number.)

() - XXXX

If you do not currently have telephone service and need new service set up in your home, or if you need to add additional lines to your existing service, or have multiple lines to transfer, please call 1-866-304-7208 for details.

If you are switching from another telephone provider and have DSL service that you wish to keep, you cannot sign-up for service online. You must call 1-866-304-7208 to sign-up for telephone service with Cinergy Communications.

Local service from Cinergy Communications is available for as little as **\$21.95² per month!** Yes, that price includes Call Waiting and Caller ID (with name), plus 60 minutes of free Long Distance calling each month and other service features.

With local service from Cinergy Communications, you can choose the package that best fits your needs and your budget!

¹ Most telephone companies charge a conversion fee to switch a customer to their service or switch away from their service (this is a fee that phone companies charge each other when customers change from one provider to another). Cinergy Communications will pay the fee

for you when switching to our service. There may be situations where your home's telephone wiring must be moved from one provider's network (wiring) interface to another. All telephone wiring starting at interface (generally located on the side of your house) and traveling into your house is the responsibility of the homeowner. Cinergy Communications can provide wiring services to move your telephone wiring if necessary. Please call our Customer Service Department at 1-800-599-1000 for pricing and further details.

² Just \$21.95 per month for your first 6 months. Offer is for residential service only. Long distance in excess of sixty minutes is billed at 6.9¢ per minute. Local toll, taxes, and other regulatory fees are not included.

Covered by David Hamerly

ITC^DeltaCom, an integrated telephone company, is the competition. The competitive local-exchange carrier (CLEC) serves business customers through 40 offices from New York to Florida. It also wholesales long-distance services to other carriers -- including AT&T, MCI (formerly WorldCom), and Sprint -- through its regional fiber-optic network. The firm owns part of the network and manages the rest, which is owned by Duke Energy, FPL, and Entergy. But the depressed telecom sector forced the company to seek debt relief and it has emerged from Chapter 11 bankruptcy with investment firm Welsh, Carson, Anderson & Stowe owning a 65% equity stake.

Which Businesses Can Use MCI Business Lines?

Business Lines are ideal for:

- Small Business customers
- Customers who do not currently require the feature functionality of a PBX
- Customers with fewer than 15 lines

Why MCI Business Lines?

MCI has an impressive array of local features that define and enhance the MCI Business Line offering. Features include:

- **Call Transfer or Three Way Conference Calling.** Permits station users to transfer any call to a party to an established connection.
- **Call Forward Busy.** Redirects calls to another station when called station is busy.
- **Call Forward No Answer.** Redirects calls to another station when called station does not answer.
- **Call Forward Variable.** Incoming calls are redirected to another station.
- **Speed Dial (8 or 30 codes).** Allows users to place calls to designated numbers by dialing one or two digits rather than the complete telephone number. Users can program up to 8 or 30 codes.
- **Call Waiting/Cancel Call Waiting.** With the sound of a beep, the user will be alerted that another call is waiting to be answered. It is not necessary to terminate the original call to answer the call, which is a feature that is not available on standard residential lines.
- **Caller ID w/Name.** Provides the MCI Local Customer the ability to identify the name of (or station number) of the telephone number associated with the calling party. This feature requires a two-line minimum.
- **Caller ID Blocking-Selective, -Complete.** The caller's number can be blocked from the destination on every call.
- **Voice Mail.** Voice Mail offers extensive voice messaging features, packaged in a way that makes it easy to use. Simple prompts help with every step, giving you the option to review messages, record new messages, and change passcodes by simply pressing numbers on your touch-tone keypad.

Network Telephone is a facilities-based provider of advanced integrated telecommunications services, including local and long-distance voice access and broadband Internet, in Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and Tennessee. The company has more than 114,000 lines in service to 13,000 small business customers. Network Telephone also offers Web hosting and Web site development. Chairman Ray Russenberger founded Network Telephone in 1997. Russenberger also founded Network Paging in 1985 and Network USA (now Metacall) in 1988.

NETWORK TELEPHONE

ABOUT NETWORK TELEPHONE CORPORATION

www.networktelephone.net

Overview

Headquartered in Pensacola, Fla., Network Telephone Corporation is a facilities-based, second generation, data-centric competitive exchange carrier providing high speed digital subscriber line (DSL), voice over DSL (VoDSL), local and long distance voice, internet and wireless data services throughout a nine-state southeastern US footprint.

Network Telephone secured government certification to provide local and long distance telecommunications exchange in the state of Florida in July 1998. Since then, the company has embraced forefront technology and enhanced product offerings, corporate and client architecture. Network Telephone is currently FCC certified to provide service to Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee. In addition, more than 300 collocation agreements have been filed with BellSouth, Sprint and GTE and strategic plans include delivery of end-to-end DSL and voice choices to 60+ markets before year-end. Network Telephone concentrates primarily on servicing the small and medium sized business market.

Ray Russenberger founded Network Telephone in 1998, realizing the opportunities that deregulation presented for embracing dynamic technology. Network Telephone immediately began bundling local and long distance voice exchange with data transmission at considerable savings off of incumbent local exchange carrier (ILEC's) rates.

After less than one year in existence, Network Telephone formed a partnership with California-based Copper Mountain Network®™ to deploy their CopperEdge™ DSL concentrators and packet-based integrated access devices, securing delivery of DSL to all of Network Telephone's territories. The move presented full-service telecommunications solutions and advanced technological offerings from one powerhouse source.

Other benchmarks quickly followed. Lucent Technologies feature-rich voice over DSL (VoDSL) Pathstar™ technology joined the Network Telephone product delivery menu. Before year-end 1999, Network Telephone launched its Jackrabbit DSL product, with speeds 50 to 100 times greater than analog dial-up service and a dedicated connection at half the cost of former options, like T1 or ISDN usage-based charges. An aggressive sales team began pre-selling customers to Network Telephone's custom-designed fiber-optic circuitry in Pensacola, Fl. with a scheduled date to move to the network in the first quarter 2000.

In January 2000, Network Telephone successfully launched a new \$8 million, customized SavillExpress CLEC and SavillCare comprehensive customer care back-office infrastructure, automating services and accounting, streamlining customer profiling and management.

Since inception, Network Telephone has assembled a senior management staff representing more than 100 years of telecom experience. To date Network Telephone circuits connect approximately 19,000 lines and 4,000 customers.

Network Telephone Extends Reach of Free Powerline DSL™ Broadband Data and Voice Service for Business with T1 Solution from Copper Mountain

Copper Mountain Helps Southeast U.S. Integrated Communications Provider Deliver Affordable T1-Enabled High-Speed Internet Service Bundles to Business Customers Regardless of Distance from CO

PENSACOLA, Fla., July 31, 2001—Network Telephone, providing facilities-based broadband voice and data telecommunications services to businesses, and Copper Mountain Networks (Nasdaq: CMTN), a provider of copper-based broadband access solutions, today announce that Network Telephone is utilizing T1 Line Cards from Copper Mountain to extend the reach of its affordable, business-class, bundled voice, digital subscriber line (DSL) Internet and Web services in the Southeastern U.S.

Network Telephone is installing Copper Mountain's CopperEdge® T1 Line Cards in Copper Mountain's 200 Digital Subscriber Line (DSL) Concentrators already activated in 175 sites throughout the Southeastern states. The T1 capability of Copper Mountain's CopperEdge concentrators allows Network Telephone to offer concurrent high-speed Internet, multi-line voice services, and site development and hosting applications to business customers located almost anywhere within the central office (CO) serving area. Network Telephone is providing the T1-enabled access to business customers located behind digital loop carriers (DLCs) or beyond the distance that can be reached using SDSL access. Network Telephone's broadband service bundle is priced to include 160 Kbps Internet connection for businesses with five to 24 telephone lines, regardless of distance. This means that Network Telephone uses to reach the customer with the high speed Internet connection.

"Network Telephone has been an industry leader in providing affordable broadband data and voice services over SDSL to small and mid-sized businesses throughout the Southeast U.S.," said Rick Gilbert, president and chief executive officer of Copper Mountain Networks. "Now, with the addition of T1-based DSL access, Network Telephone is leading the way in making its value-added solutions available to customers beyond the reach of traditional SDSL access."

"Access to affordable broadband service is increasingly vital to small and medium-sized business operations," said Network Telephone's chief executive officer and founder Ray Russenberr.

"With Copper Mountain's T1 Line Card, Network Telephone can extend the DSL bundle to business-ready data and voice services to all interested customers in every metro market served. Distance from the CO is no longer an issue for Network Telephone or our prospective customers."

About the CopperEdge® T1 Line Card

Copper Mountain's 12-port CopperEdge T1 Line Card is hot-swappable in CopperEdge DSL concentrators, and can be deployed concurrently with Copper Mountain's CopperEdge Family ADSL, G.lite, IDSL, and SDSL Line Cards. The CopperEdge T1 Line Card enables broadband service providers to leverage CopperEdge concentrators' robust Internet Protocol (IP) service intelligence—Copper Mountain's IP IQ™—to deliver cost-effective broadband voice and high-speed data services, even to customers located beyond the reach of conventional SDSL or who are served by Digital Loop Carrier (DLC) equipment. The CopperEdge T1 Line Card is interoperable with Copper Mountain's CopperRocket® 508T Integrated Access Device (IAD) as well as industry-standard T1 customer premise equipment (CPE).

About Network Telephone Corp.

Headquartered in Pensacola, Fla., Network Telephone Corp. is a facilities-based broadband Integrated Communications Provider (ICP) using voice over digital subscriber line (VoDSL) technology to deliver local and long-distance, high-speed Internet, Web site hosting, and site development services to small and medium-size businesses throughout the Southeast. The company employs almost 500 at its headquarters and 20 regional offices. More than 100 lines are in service to date. For more information about Network Telephone, visit the company Web sites, <http://www.networktelephone.net> and <http://www.powerlinedsl.com>.

About Copper Mountain Networks

Copper Mountain Networks, Inc. (Nasdaq: CMTN) manufactures intelligent DSL and aggregation equipment for central office, digital loop and multi-tenant unit (MTU) broadband networks worldwide. Its DSL solutions enable carriers and service providers to deliver cost-effective performance data and voice services over existing copper telephone wiring. Its CopperEdge 200 DSL Concentrator is deployed in some of the world's largest public networks, and its environmentally hardened CopperEdge® RT (remote terminal) DSL Concentrator extends the reach of DSL to the millions of customers served by digital loop carriers (DLCs). Copper Mountain's OnPrem™ MTU Concentrator offers a cost-effective and scalable platform for service providers. With IP IQ™, Copper Mountain's robust Internet Protocol (IP) service intelligence, service providers can maximize bandwidth utilization, support value-added broadband services, and scale to meet the demands of hundreds of thousands of subscribers. Copper Mountain's CopperRocket® CPE family and CopperCompatible® program ensure Copper Mountain DSL concentrators are interoperable with the broadest range of customer premise equipment (CPE). Customers wanting more information about Copper Mountain products or office locations worldwide can visit the company's World Wide Web site at <http://www.coppermountain.com>. For investor relations information, contact us at IR@coppermountain.com.

Safe Harbor Warning

Portions of this release contain forward-looking statements regarding future events based on current expectations, and are subject to risks and uncertainties, such as the rate of installation of the Copper Edge® T1 line cards in Network Telephone's CopperEdge® 200 DSL Concentrators. Copper Mountain wishes to caution you that there are some factors that could cause actual results to differ materially from the results indicated by such statements. These factors include, but are not limited to: the ability to expand addressable markets for high-value services like quality and multi-line voice in the broadband industry; quarterly fluctuations in operating results attributable to the timing and amount of orders for our products; our ability to keep pace with rapidly changing product requirements of its customers; market acceptance of our products; concentration of our revenue in a small number of customers; factors and market conditions affecting the telecommunications market, the demand for DSL technologies, the market for DSL service providers, and economic conditions generally which are beyond Copper Mountain's control. We refer you to the documents Copper Mountain files from time to time with the Securities and Exchange Commission, specifically the section titled Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2000 and other reports and filings.

with the Securities and Exchange Commission.

VOICE

Local Service

NewSouth Communications' Lucent 5ESS AnyMedia™ digital switches enable us to provide you with the best quality service at the best price.

PBX Trunks

NewSouth Communications offers comprehensive service designed to complement your existing PBX or Hybrid Key system.

Business Exchange Lines

NewSouth Communications' Business Exchange Lines enable you to customize the features and functionality of your telephone.

Extended NewArea

If your business places a large number of calls beyond our expanded local calling area, then Extended NewArea™ is designed for you.

Point-to-Point

NewSouth Communications' Point-to-Point functions as a private line between two or more locations. Your business can have continuous access to 4-digit dialing and high-speed data transfer to those locations you call most often.

Long Distance Service

Whether you're calling across the world or across your state, NewSouth Communications has the right long distance solution for your business.

International Long Distance

NewSouth Communications offers international calling to over 240 countries. Unlike other telecommunications providers, NewSouth Communications aggregates your monthly recurring charges.

800 Access

800 service is an easy and convenient way for your customers to contact you...at no charge to them.

Account Codes

NewSouth Communications' customers can track local and long distance calls by caller, department or client using our advanced Account Code system.

Small Business Solutions

Small Business Solutions enables businesses with as few as two lines to enjoy the savings of a competitive telecommunications provider. Your small business will enjoy savings of 15-20% off your current BellSouth services. Finally, small businesses have a choice.

Voice Mail

NewMessaging™ provides customers a flexible and powerful tool that can answer phone calls, take messages, and store them for review at a later time.

Conference Calling

Harness the power of the conference call for employees, customers and vendors with NewConferencing™ from NewSouth Communications. This service lets you organize a conference call between three or 300 people quickly and easily.

Phone Cards

When you are away from the office, our Phone Card puts all the benefits of NewSouth Communications right in your pocket. Calls can be made from almost anywhere to just about everywhere in the world.

Enhanced Features

Expand your communication capabilities with our suite of advanced voice features. These include an Individualized Dialing Plan, Multi-way Calling, Queuing, and Customer Recovery options.

INTERNET & DATA

Managed Network Security

NewSouth Communications is leading the industry with LANLock, a managed Internet security product that brings the latest in small-business network protection to your small business.
