At least fifty percent (50%) of the total number of nodes on the ring must be located at customer designated premises or Telephone Company wire centers that are within the New Jersey portion of MSA #1. In determining the minimum number of nodes that must be located within MSA #1, always round up to the next node when the calculation results in a fraction of a node. For example, if the IDSR is configured with a total of fifteen (15) nodes, at least eight (8) nodes must be located within the New Jersey portion of MSA #1 (50% of 15 nodes = 7.5 nodes and rounded to 8 nodes); and
