ACCESS SERVICE

(N)

7 – Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

(N)

7.2 Service Descriptions (Cont'd)

(N)

7.2.18 BellSouth Metro Ethernet Service (Cont'd)

(N)

(R) Automatic Protection Switching (APS) is an optional feature available, except as specified otherwise herein, to customers with a Basic or Premium BellSouth Metro Ethernet Service Connection. The APS feature provides customers with the option of having data channel (i.e., facilities from the customer premises to the BellSouth Metro Ethernet Service wire center) survivability through the use of a secondary transport path that is diverse from the path provided with their primary Metro Ethernet Connection. This secondary transport path (i.e., data channel) is provided for a specific Metro Ethernet Connection (i.e., the primary) with the selection of the APS feature which then provides the customer with complete path protection.

(N)  
(N)  
(N)  
(N)  
(N)  
(N)  
(N)  
(N)  
(N)  
(N)

With APS, the primary Metro Ethernet Connection's data channel is monitored for threshold violations or path failures with a fail-over to the secondary data channel path provided via the APS feature. The APS data channel is checked periodically to ensure its availability if a failure of the primary Metro Ethernet Connection's data channel occurs.

(N)  
(N)  
(N)  
(N)  
(N)

APS may be ordered as a structurally diverse transport path (Structural Protection) or a route diverse transport path (Route Protection).

(N)  
(N)

Structural Protection APS is defined as the APS facility and the primary Metro Ethernet Connection facility being in separate sheaths in separate structures located along the same route (e.g., underground/underground, buried/underground, aerial/underground, aerial/buried, buried/buried, and aerial/aerial), or along different routes at the Telephone Company's discretion.

(N)  
(N)  
(N)  
(N)  
(N)  
(N)  
(N)

Route Protection APS is defined as the APS facility being in a separate sheath within alternate underground, aerial or direct buried structures that are run along separate physical paths from the facilities associated with the primary Metro Ethernet Connection. No precise distance separation is specified between the paths; although the separation is sufficient to preclude one disruptive event from affecting both routes.

7.2 Service Descriptions (Cont'd)

(N)

7.2.18 BellSouth Metro Ethernet Service (Cont'd)

(N)

(R) Automatic Protection Switching (APS) (Cont'd)

(N)

The APS feature is billed based upon the actual total route miles in a customer's specific Structural Protection APS or Route Protection APS design as determined by the Telephone Company. The term "route miles" is defined for this application to be the actual physical distance or length (not airline mileage), rounded up to the next whole mile, of the unique APS facility designed for each individual customer premises. Total route miles are measured between the customer premises and its serving wire center, plus route miles between the serving wire center and any intermittent wire centers in the path designed to reach the BellSouth Metro Ethernet wire center associated with the primary Metro Ethernet Connection (i.e., the wire center where the BellSouth Metro Ethernet switching equipment is located).

(N)  
(N)  
(N)  
(N)

The APS rate element provides the alternate data channel transport and APS equipment in the BellSouth Metro Ethernet Service wire center associated with the primary Metro Ethernet Connection. Actual total route mileage for the customer's APS design is determined from a Service Inquiry. The route mileage determined from this Telephone Company Service Inquiry is used for billing purposes and is the sole determinant of such mileage (i.e., not subject to dispute).

#### ACCESS SERVICE

#### 7 – Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

#### 7.4 Rate Regulations (Cont'd)

#### 7.4.32 BellSouth Metro Ethernet Service (Cont'd)

#### (A) General (Cont'd)

(T)

- (4) Obligations of customer and Telephone Company:
- (a) The Telephone Company is not responsible for the installation, operation or maintenance of any equipment provided by the customer.
  - (b) The customer is responsible for the provision and maintenance of all customer provided equipment and to insure that the operating characteristics of this equipment is comparable with and does not interfere with the service offered by the Telephone Company.
  - (c) At the BellSouth Metro Ethernet Service Connection point the customer's signals must conform to IEEE Standards 802.3, 802.3u or 802.3z. To meet end-to-end delay requirements contained in these aforementioned standards, the customer may be required to provide additional equipment.
- (5) While BellSouth Metro Ethernet Service transport facilities typically connect a customer premises with a BellSouth Metro Ethernet Service wire center, BellSouth Metro Ethernet Service may alternately be utilized with the appropriate Cross Connect elements in Section 13 of this Tariff to connect a customer's collocation service arrangement (as opposed to a customer premises) with a BellSouth Metro Ethernet Service wire center. Rates and charges for the BellSouth Metro Ethernet Service Connection are applicable for such connectivity; collocation service arrangements located greater than 10 miles from the BellSouth Metro Ethernet Service wire center will additionally require BellSouth Metro Ethernet Service Additional Mileage charges.

Additionally, a BellSouth Metro Ethernet Service Connection provided in association with a collocation arrangement may not be provisioned with Automatic Protection Switching.

7.4.32 BellSouth Metro Ethernet Service (Cont'd)

(A) General (Cont'd)

- (6) In some cases, the Telephone Company and another Incumbent Local Exchange Company (ILEC) may agree to jointly provide a customer Metro Ethernet Service. The rates and charges for the BellSouth Metro Ethernet Service Connection are applicable for such connectivity; charges for BellSouth Metro Ethernet Additional Mileage are also applicable when the mileage from the BellSouth/ILEC meet-point to the BellSouth Metro Ethernet wire center associated with the service is over 10 miles. The Telephone Company is only responsible for the ordering, provisioning, maintaining and billing of such service up to the meet-point (i.e., demarcation point with the ILEC). BellSouth Metro Ethernet Service SLA credits shall only be applicable for the portion of the service provided within the territory of the Telephone Company; such credits are appropriate only for missed commitments determined to be the fault of the Telephone Company.

(B) Rate Categories and Regulations

- (1) The following rate categories apply for BellSouth Metro Ethernet Service. Applicable rates and charges are provided in 7.5.22.

- (a) Basic BellSouth Metro Ethernet Service Connection
- (b) Premium BellSouth Metro Ethernet Service Connection
- (c) Dedicated BellSouth Metro Ethernet Service Connection
- (d) BellSouth Metro Ethernet Service Additional Mileage Charges
- (e) Priority Plus Feature
- (f) Q-Forwarding Feature
- (g) Metro Ethernet Reporting Feature
- (h) Automatic Protection Switching Feature
- (i) Service Reconfiguration Charge
- (j) System Reconfiguration Charge

(N)  
(T)  
(T)

- (2) BellSouth Metro Ethernet Service is available under month-to-month rates or under an optional term commitment plan as follows<sup>1</sup>.

A customer may elect to subscribe to either a BellSouth Fast Packet Services Savings Plan (FSP) as described in Section 2.4.8(F) which provides discounts off the BellSouth Metro Ethernet Service month-to-month rates provided in 7.5.22.(A), or a customer may elect to subscribe to the Transport Payment Plan (TPP) as described in Section 2.4.8(D) to receive the TPP rates provided in 7.5.22.(B)<sup>2</sup>.

Note 1: Customers with an existing BellSouth Premium Service Incentive Plan may receive such discounts on BellSouth Metro Ethernet Service in accordance with the regulations in 2.4.8.(G) that stipulate BellSouth Native Mode LAN Interconnection Service may be included in such a plan. (T)  
(T)

Note 2: Customers subscribing to a TPP may elect to receive further discounts under the BellSouth Transport Advantage Plan (TAP) provided in 2.4.8.(H).

7.4 Rate Regulations (Cont'd)

7.4.32 BellSouth Metro Ethernet Service (Cont'd)

(B) Rate Categories and Regulations (Cont'd)

- (6) A BellSouth Metro Ethernet reconfiguration nonrecurring charge is applicable for a customer request to reconfigure (rearrange) an existing BellSouth Metro Ethernet Connection. The appropriate reconfiguration charge is dependent upon the physical work required to fulfill the request and applies in lieu of other nonrecurring charges.

A Service Reconfiguration Charge is applicable for requests where the work required is a minor change that does not involve changing the physical service type. The Service Reconfiguration Charge is applicable for a request to change an existing connection to a different connection that is the same physical service type, is applicable for a request to change a Premium connection from fixed mode to burst mode (and vice versa) and is applicable for a request to change a Premium connection to add or delete the Priority Plus feature.

(T)  
(T)  
(T)  
(T)

A System Reconfiguration Charge is applicable for requests where the work required involves changing to a different physical service type or involves major support system changes. The System Reconfiguration Charge is applicable for requests to change an existing connection to a different connection that is a different physical service type, to change the network channel terminating equipment (NCTE) interface option from optical to electrical (or vice-versa), and to change the premises powering options from AC power to DC power (or vice-versa).

ACCESS SERVICE

7 – Special Access (a.k.a. BellSouth SPA) Service (Cont'd)

7.4 Rate Regulations (Cont'd)

7.4.32 BellSouth Metro Ethernet Service (Cont'd)

(B) Rate Categories and Regulations (Cont'd)

- (10) A System Reconfiguration Charge is applicable for a customer request to change the premises powering option (AC power to DC power) or NCTE signaling interface option (optical to electrical, or vice-versa) on an existing BellSouth Metro Ethernet Connection. Such a change is not treated as a disconnect and there will be no change in the minimum period requirements.

- (11) A move of a BellSouth Metro Ethernet Service will be as follows (in accordance with Section 7.4.5 and, if applicable, Section 2.4.8(D)(5)).

When the move is to a new location within the same building, the charge for the move will be an amount equal to one-half of the Connection nonrecurring charge. There will be no change in the minimum period requirements.

When the move is to a new location in a different building that is within the same serving wire center, the charge for the move will be the nonrecurring charge for the BellSouth Metro Ethernet Service Connection. New minimum period requirements will be established.<sup>1</sup> (T)

When the move is to a new location in a different building that is not in the same serving wire center, the request is treated as a discontinuance and start of service and all associated BellSouth Metro Ethernet Service nonrecurring charges will apply. New minimum period requirements will be established. (T)

Note 1: Such moves of Metro Ethernet Service with Automatic Protection Switching (APS) shall additionally incur the full nonrecurring charge for establishing the APS feature at the new premises (as a new APS design will be required). The APS monthly recurring charge may change as appropriate based upon the actual route mileage associated with the new premises' APS design. (N)
