Transmittal No. 110

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
Washington, D.C. 20554

Attention: Wireline Competition Bureau

The accompanying tariff material issued by John Staurulakis, Inc. ("JSI"), and bearing Tariff F.C.C. No. 1, is sent to you for filing in compliance with the requirements of the Communications Act of 1934, as amended.

The filing, to become effective on October 27, 2005, consists of tariff pages as indicated on the following checksheet:

Tariff F.C.C. No. 1

104th Revised Page 0-1

Issuing carriers for JSI Tariff FCC No. 1 are listed on Attachment A to this transmittal letter along with the respective FRN number for each carrier and JSI.

Page by page proposed changes are indicated on Attachment B to this transmittal.

This filing proposes for Mt. Horeb Telephone Company (Mt. Horeb), an issuing carrier for JSI Tariff FCC No. 1 operating in Wisconsin, introduction of expanded High Speed Internet Access Service offerings under both existing regulations and revised regulations. Newly introduced services include Special Access Metallic Service 100Base-T DSL/High Speed Internet Access Service Connection, Special Access Synchronous Optical Channel Service OC12 Channel Termination and DSL/High Speed Internet Access Service Connection. Additionally, this filing proposes restructuring of the High Speed Internet (HSI) Access Service rate regulations to separate services between those currently offered by Mt. Horeb under a single rate. Under the proposed revisions, the existing current single rate offered by Mt. Horeb will be divided between Monthly Rates Without Discount and HSI Term Pricing Arrangement (HSITPA) rates. HSITPA

discounted rates for will require payment of a single HSITPA Monthly Charge in addition to charges for individual HSI lines ordered.

As part of the restructure, rates are bifurcated between HSI provided on the basis of voice/data lines (i.e., over lines also providing voice service access to the PSTN through the wire center switch) and data-only lines (i.e., where the HSI is provided over a line that does not also provide voice service, sometimes called "Naked-DSL").

With respect to existing Mt. Horeb rates, this filing proposes an increase in the Special Access Metallic Service Channel Termination rate, a reduction in the Special Access High Capacity Service DSL/HSI Access Service Connection rate and an increase in the non-discounted HSI voice/data rate.

In addition to Mt. Horeb, Hargray Telephone Company (Hargray) also provides High Speed Internet (HSI) Access Service under Section 16.6. No changes in rates are proposed for Hargray. However, this filing proposes modification of the terms and organization of Hargray's HSI Access Service rate pages to align with the revised regulations. These changes will have no effect either on the provision of HSI Access Service by Hargray or the rates charged customers. Rather, these changes will ensure that the Hargray HSI Access Service rate section headings and descriptions continue to match the regulations. No other issuing carriers for JSI Tariff FCC No. 1 provide HSI Access Service under Section 16.6.

In addition to tariff revisions for the issuing carriers mentioned above, this transmittal also proposes removal of regulations for Telecommunications Service Provider Service Access (TSPSA) currently contained in Section 16.4. JSI introduced Section 16.4, Telecommunications Service Provider Service Access (TSPSA) under Transmittal No. 54 effective April 6, 2001 on behalf of Fort Bend Telephone Company. Fort Bend Telephone Company cancelled as an issuing carrier effective February 7, 2004 under Transmittal No. 91 filed on January 23, 2005.

A description and justification for this filing is attached. Pursuant to Section 61.39 of the Commission's Rules, supporting cost information for Mt. Horeb will be furnished to interested parties upon reasonable request.

Any questions regarding the filing may be directed to me at the address and telephone number listed above.

Sincerely,
