ACCESS SERVICE

8. SONET Special Access Services (Cont'd)8.2 IntelliLight Broadband Transport (IBT) (Cont'd)(C) Terms and Conditions

- (1) IBT is available for term periods of Month-to-Month, 3-year and 5-year. However, the minimum service period for IBT service is one year. When Verizon Optical Networking customers under a three or five-year commitment period connect their Verizon Optical Networking Ethernet-to-SONET mapped service to IBT, the IBT port must be provided under the same length commitment period. When Verizon Optical Networking customers under a one-year commitment period connect their Verizon Optical Networking Ethernet-to-SONET mapped service to IBT, the IBT port will be provided at month-to-month rates. When Verizon Optical Networking customers under a seven-year commitment period connect their Verizon Optical Networking Ethernet-to-SONET mapped service to IBT, the IBT port will be provided subject to five-year plan rates, and the commitment period for the IBT Port may be extended to be coterminous with the Verizon Optical Networking commitment period. When IBT service connects to an IOTS Optical Transport Channel, the IBT port and the IOTS Optical Transport Channel must be provided under the same length commitment period (i.e., either 3 year or 5 year term plan).
- (2) At the expiration of a 3 or 5-year plan, the rates for the expiring term plan will continue until the customer either cancels service or requests a new term plan for its IBT services.
- (3) All rate elements of a point-to-point service must be in the same rate plan.
- (4) OC3/OC3c, STM1, OC12/OC12c and OC48/OC48c point-to-point IBT service arrangements (without the Multiplexing Capability described in Section 8.2(B)(3)) are provided subject to standard intervals. All other IBT service arrangements are available based on negotiated intervals as described in 5.2.1(B) preceding. (C)
|
(C)
- (5) Additional charges may be billed the customer when the Company is levied charges for space and power required to place ADMs on the Company's side of the network interface.
- (6) The customer is responsible to specify in its order for service what service configuration is to be contained in each service connection. For multiplexed services, the customer must also specify the IBT multiplexing location involved. Any Switched Access, Special Access, or SONET Service derived from the IBT facility to the Collocated Interconnection arrangement is subject to the terms and conditions and rates and charges for the type of service involved.

Note: See Section 19 following for additional information.
