INTERSTATE INTRALATA MESSAGE TELECOMMUNICATIONS SERVICE

2. Regulations (Cont'd)2.5 Definitions (Cont'd)Interstate IntraLATA Message Telecommunications Service

The term "Interstate IntraLATA Message Telecommunications Service" denotes service crossing the state line, but within the same LATA.

Local Access and Transport Area

The term "Local Access and Transport Area" denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges, which are grouped to serve common social, economic and other purposes. For purposes of this tariff the term LATA denotes the Telephone Company's exchanges not included in a Bell LATA in Oregon and Washington.

(C)
|
(C)

Main Billed Account

The local exchange telephone number associated with a customer name and address and to which IIMTS charges are billed.

Multiline Terminating System

The term "Multiline Terminating System" denotes switching equipment (e.g., PBX, Centrex, ACD, tandem switching equipment) and key telephone type systems which are capable of terminating more than one local central office line, WATS access line, private line service or communications system.

Network Control Signaling

The term "Network Control Signaling" denotes the transmission of signals used in the telecommunications network which perform functions such as supervision (control, status, and charging signals), address signaling (e.g., dialing), calling and called number identification, audible tone signals (call progress signals indicating re-order or busy conditions, alerting, coin denominations, coin collect and coin return tones) to control the operation of switching machines in the telecommunications network.
