## ACCESS SERVICE

### 2 - General Regulations (Cont'd)

#### 2.4 Payment Arrangements and Credit Allowances (Cont'd)

##### 2.4.4 Credit Allowance for Service Interruptions (Cont'd)

###### (B) When a Credit Allowance Applies (Cont'd)

(16) For Fast Packet Access Services, a service is considered interrupted when it becomes unusable to the customer because of a failure of a facility component used to furnish service under this tariff. An interruption period starts when the customer reports the interruption to the Telephone Company, and ends when the service is operative. Following are the credit allowances appropriate for Fast Packet Access Services; the credit allowance(s) for an interruption or for a series of interruptions shall not exceed the effective monthly rate for the Fast Packet Access Service.

(a) In case of an interruption to any Fast Packet Access Service (except as specified otherwise in (b) following), the credit allowance for the period of the interruption, if not due to situations set forth in 2.4.4.(C), shall be as follows:

- For Exchange Access Frame Relay Service, Exchange Access and/or Exchange Access ATM Service, no credit shall be allowed (C) for an interruption of less than 30 minutes. The customer shall be credited for an interruption of 30 minutes or more at the rate of 1/1440 of the monthly charges for the facility or service for each period of 30 minutes or major fraction thereof that the interruption continues.

For the service impacted by the service outage, the Fast Packet Access Service rate elements used to determine the credit allowance amount shall be as follows:

- All network interfaces

ACCESS SERVICE

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Optional Payment Plans (Cont'd)

(C) Fast Packet Services Payment Plan

(1) General

- (a) The regulations specified herein are applicable only to specific Fast Packet Access Services as indicated in the rate regulations for such services in Section 21 and Section 23 following.
- (b) The terms of this Fast Packet Services Payment Plan (SPP) apply to such specific Fast Packet Services except as noted in the rate regulations for the given service.
- (c) The Fast Packet SPP allows customers to pay stabilized monthly rates for fixed service periods selected by the customer. The two payment plans offered are as follows:
  - Payment Plan A, service periods may be selected from 12 months to 24 months in length.
  - Payment Plan B, service periods may be selected from 25 months to 48 months in length.
- (d) When the customer renews a Fast Packet SPP arrangement under 2.4.8(C)(7)(d) following and the sum of months is greater than the number of months for which the services is available under a Fast Packet SPP, the current rates for the longest payment plan available for that service will apply. For example, when the customer extends XAFRS beyond 48 months, Payment Plan B rates will apply. (C)
- (e) When the customer orders service to be provided under a Fast Packet SPP arrangement, the customer must designate to the Company the payment plan and the service period desired, e.g., Plan B and 36 months.
- (f) Rates stabilized under a Fast Packet SPP arrangement are exempt from Telephone Company initiated increases, however, decreases for any rate element will automatically flow through to the customer.

EFFECTIVE: MARCH 17, 2006

ACCESS SERVICE

2 - General Regulations (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Optional Payment Plans (Cont'd)

(F) BellSouth Fast Packet Savings Plan (Cont'd)

(2) (Cont'd)

BellSouth DSL Services that are not included in an FSP will not receive BellSouth FSP credits. Monthly recurring billing for such services shall, however, count towards the customer's Total Fast Packet Services Monthly Recurring Billing (referred to as qualifying revenues) for a BellSouth FSP as set forth in 2.4.8(F)(3) following.

- (3) The customer's Total Fast Packet Services Monthly Recurring Billing, referred to hereafter as qualifying revenues, will be utilized to establish the appropriate BellSouth FSP credit schedule which will be applied to the customer's eligible Fast Packet Service billing as set forth in 2.4.8(F)(1) preceding. A customer's qualifying revenues is defined to include their monthly recurring billing<sup>1</sup> for the following services:

- Eligible Fast Packet Services (as set forth in 2.4.8(F)(1))
- BellSouth Exchange Access Frame Relay Service under FPSPP
- BellSouth Exchange Access Asynchronous Transfer Mode Service under FPSPP

(D)

- BellSouth ADSL Service and BellSouth Session Based DSL Service
- BellSouth Metro Ethernet Service
- Eligible BellSouth Transport Services (per (a) following):
  - WATS Access Line (WAL) (a.k.a. BellSouth WATS Line) Service
  - DS1 High Capacity (a.k.a. BellSouth SPA DS1) Service
  - High Capacity (a.k.a. BellSouth SPA High Capacity)
  - Alternate Serving Wire Center Service
  - LightGate Service (a.k.a. BellSouth SPA Point to Point Network)
  - Digital Data Access Service (a.k.a. BellSouth SPA DSO Digital Data)
  - Self-healing Multi-nodal Alternate Route Topology Ring (SMARTRing Service) (a.k.a. BellSouth SPA Dedicated Ring)
  - Voice Grade (a.k.a. BellSouth SPA DSO VG) Service
  - Program Audio (a.k.a. BellSouth SPA Program Audio) Service
  - Analog Data Access (a.k.a. BellSouth SPA DSO VG) Service
  - SMARTPath Service (a.k.a. BellSouth SPA DS1 Shared Ring)
  - SMARTPath DS3 Transport Service (a.k.a. BellSouth SPA DS3 Shared Ring)
  - SMARTGate Service (a.k.a. BellSouth SPA Managed Shared Ring Network)

Note 1: While nonrecurring charges for eligible services receive discounts under an FSP agreement, nonrecurring charge billing does not count as "qualifying" revenue towards a customer's minimum monthly revenue commitment.

## ACCESS SERVICE

### 2 - General Regulations (Cont'd)

#### 2.6 Definitions (Cont'd)

(Deleted)

(D)

#### Exchange Access Frame Relay Service (a.k.a. BellSouth Exchange Access Frame Relay Service)

The term "Exchange Access Frame Relay Service "(a.k.a. BellSouth Exchange Access Frame Relay Service) denotes a connection oriented packet-switched data service for the interconnection of local area networks (LANs) or other compatible customer equipment.

#### Expected Measured Loss

The term "Expected Measured Loss" denotes a calculated loss which specifies the end-to-end 1004-Hz loss on a terminated test connection between two readily accessible manual or remote test points. It is the sum of the inserted connection loss and test access loss including any test pads.

#### Fast Packet Access Services

The term "Fast Packet Access services" denotes high speed connectivity over a wide geographic area. Fast packet services use digital transmission facilities and switching technology to provide high speed information transfers for users with large bandwidth requirements. Fast Packet technology divides data into blocks (packets) with fixed maximum lengths. These packets are transported through the Company's network. Each packet contains the necessary information to ensure accurate data transfer to its destination.

#### Facility Signaling Point of Interconnection (FSPOI)

The term FSPOI denotes a Telephone Company-designated ordering point within a Telephone Company LATA to which customers may order CCS7 Signaling Connections.

#### Federal Observed Holiday

The term "Federal Observed Holiday" denotes public holidays for Federal employees as established by Federal Law (5 U.S.C. 6103).

## ACCESS SERVICE

### 21 - Fast Packet Access Services

The Telephone Company will provide four types of Fast Packet Access Services: (C)  
Exchange Access Frame Relay Service (XAFRS) (a.k.a. BellSouth Exchange Access (C)  
Frame Relay Service) as described in Section 21.1 following, BellSouth  
Exchange Access Asynchronous Transfer Mode Service (XAATMS) as described in (C)  
21.3 following, BellSouth Managed Shared Frame Relay Service (MSFRS) as  
described in 21.4 following and BellSouth Managed Shared Asynchronous Transfer (C)  
Mode Service (MSATMS) as described in 21.5 following. Switch locations  
supporting Fast Packet Access Services are as specified in the National  
Exchange Carrier Association (N.E.C.A.) Tariff F.C.C. No. 4.

## ACCESS SERVICE

### 21 - Fast Packet Access Services

#### 21.1 Exchange Access Frame Relay Service (XAFRS) (a.k.a. BellSouth Exchange Access Frame Relay Service) (Cont'd)

##### 21.1.2 Service Description

###### (1) Installation of Service

Nonrecurring charges apply to each UNI or NNI on each XAFRS (a.k.a. BellSouth Exchange Access Frame Relay Service) installed, except as set forth in 21.1.8 following.

Nonrecurring charges for the Network Interface elements are set forth in 21.1.10(A) following.

###### (2) Installation of Optional Features

Nonrecurring charges apply to the installation of optional features as set forth in 21.1.10(B) following.

###### (3) Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in a change in the minimum period requirements as set forth in 5.6(E) preceding. Changes which result in the establishment of new minimum period obligations are treated as disconnects and starts. A change which results from a transfer of service is described and charged as set forth in (4) and 21.1.10(D) following.

- (a) Requests for PVC rearrangements may result in the service being unavailable during the time that such rearrangements are performed/provisioned by the Telephone Company.

Customer requests for PVC rearrangements that are submitted with a due date, specified worktime (in Eastern Time), contact name and contact phone number will be performed on the due date at the time requested by the customer.

Customer requests for PVC rearrangements that are submitted with a due date but without the specified worktime (in Eastern Time), contact name and contact phone number will be performed on the due date plus one day, between Midnight and 4:00 A.M. Eastern Time.

ACCESS SERVICE

21 - Fast Packet Access Services

21.1 Exchange Access Frame Relay Service (XAFRS) (a.k.a. BellSouth Exchange Access Frame Relay Service) (Cont'd)

21.1.2 Service Description (Cont'd)

(6) Service Level Agreements (Cont'd)

(c) (Cont'd)

- the customer's premises equipment,
- unavailability of the customer's facilities and/or equipment, and
- customer oversubscription of the UNI/NNI beyond 200% (i.e., the sum of the total CIR of all PVCs carried by any UNI or NNI may not be greater than 200% of the UNI/NNI Network Interface speed).

(d) SLA credits for missed commitments do not apply for situations when the customer's service is out of operation as a result of 1) scheduled maintenance windows as set forth in 21.1.2(5) preceding and 2) customer requests for rearrangements which resulted in that service being unavailable as set forth in 21.1.2(3)(a) and (b) preceding. Time from such activity does not count towards the time a service is considered as unavailable during a calendar month for purposes of measuring for the Network Availability SLA. (C) (C)

(e) Service Level Commitments

SLA commitments for the specific aspects of the Frame Relay network's performance set forth in (a) preceding are measured on a specific calendar month basis. The specific network performance commitments provided and how their performance is measured through the NVS system for a calendar month are as follows:

(1) Network Availability Commitment: 99.9%

- The Network Availability commitment is provided on the customer's total Frame Relay network. Network Availability will measure the percentage of time during a calendar month that the customer's Frame Relay network is available.
- Network availability will be measured through the NVS system for the customer's total Frame Relay network and for each individual Frame Relay UNI/NNI for a whole calendar month.
- For the purpose of measuring Network Availability, times during which a Frame Relay UNI/NNI is out of operation in association with maintenance windows (as set forth in 21.1.2(5)) and in association with situations over which the Company does not have control (as set forth in 21.1.2(6)(c)) are counted as "available" time.

## ACCESS SERVICE

### 21 - Fast Packet Access Services

#### 21.2 (Deleted) (Cont'd)

(D)

### 21.3 BellSouth Exchange Access Asynchronous Transfer Mode Service (XAATMS)

#### 21.3.1 General Description

BellSouth Exchange Access Asynchronous Transfer Mode (ATM) Service (XAATMS) is a connection-oriented data service based on ATM cell-based switching technology. BellSouth XAATMS allows for the interconnection of ATM compatible customer equipment by providing efficient throughput at high speeds of transmission. BellSouth XAATMS provides the switching of symmetrical duplex transmissions of fixed-length ATM cells (herein referred to as ATM cells).

A user network interface (UNI) is available with BellSouth XAATMS. The UNI is a standard interface used to connect the customer to the BellSouth XAATMS switch. It receives the ATM cells into the ATM switch and verifies that the addressing and traffic parameters are valid (according to BellSouth XAATMS technical specifications as referenced in Section 21.3.3 following) before relaying the ATM cells to the specified destination. The UNI is offered at transmission speeds of 1.536 Mbps, 3.072 Mbps, 4.608 Mbps, 6.144 Mbps, 7.680 Mbps, 9.216 Mbps, 10.752 Mbps, 12.288 Mbps, 18 Mbps, 24 Mbps, 30 Mbps, 36 Mbps, 44.210 Mbps, 149.760 Mbps and 599.040 Mbps. Additionally, Back-Up Network Interfaces are available to provide Back-Up Capability on an optional basis. Back-Up Capability provides the ability to have a back-up logical port configured to meet a customer's needs in the event that the customer's primary connection is disabled.

EFFECTIVE: MARCH 17, 2006

21.3.2 Service Description (Cont'd)

(N)

(C) Service Rearrangements (Cont'd)

(N)

- (b) Requests for an existing XAATMS service to be rearranged to  
utilize a different XAATMS switch (e.g., to allow the customer  
to order feature/functions not technically available out of the  
current XAFRS switch) will result in the service being  
unavailable during the time that such rearrangement activity is  
performed/provisioned by the Telephone Company; this time will  
not be considered as down time for SLA Network Availability  
purposes.

(N)

(N)

(N)

(N)

(N)

(N)

(N)

(N)

Following are the appropriate charges for such a service  
rearrangement:

(N)

(N)

- When the XAATMS Network Interface is requested to be  
provisioned off another XAATMS switch in the same Telephone  
Company Central Office as the existing switch being used, no  
nonrecurring charges shall be applicable.

(N)

(N)

(N)

(N)

- When the XAATMS Network Interface is requested to be  
provisioned off another XAATMS switch in a different Telephone  
Company Central Office from the existing switch being used, the  
request shall be treated as a disconnect of the existing  
service. The service requested to be provided out of the new  
switch located in a different Telephone Company Central Office  
shall be treated as a new connect with full nonrecurring  
charges being applicable.

## ACCESS SERVICE

### 21 - Fast Packet Access Services

#### 21.3 BellSouth Exchange Access Asynchronous Transfer Mode Service (XAATMS) (Cont'd)

##### 21.3.2 Service Description (Cont'd)

###### (F) Service Level Agreements

###### (3) (Cont'd)

- the customer's premises equipment,
- unavailability of the customer's facilities and/or equipment, and
- customer oversubscription of the ATM UNI beyond 200%, calculated as the total VBR equivalent bandwidth on all PVCs carried by the ATM UNI (after the CBR bandwidth is subtracted) may not be greater than 200% of the ATM UNI Network Interface speed.

- (4) SLA credits for missed commitments do not apply for situations when the customer's service is out of operation as a result of 1) scheduled maintenance windows as set forth in 21.3.2(E) preceding and 2) customer requests for rearrangements which resulted in that service being unavailable as set forth in 21.3.2(C)(a) and (b) preceding. Time from such activity does not count towards the time a service is considered as unavailable during a calendar month for purposes of measuring for the Network Availability SLA. (C) (C)

###### (5) Service Level Commitments

SLA commitments for the specific aspects of the ATM network's performance set forth in (1) preceding are measured on a specific calendar month basis. The specific network performance commitments provided and how their performance is measured through the NVS system for a calendar month are as follows:

###### (a) Network Availability Commitment: 99.9%

- The Network Availability commitment is provided on the customer's total ATM network. Network Availability will measure the percentage of time during a calendar month that the customer's ATM network is available.
- Network availability will be measured through the NVS system for the customer's total ATM network and for each individual ATM UNI for a whole calendar month.
- For the purpose of measuring Network Availability, times during which an ATM UNI is out of operation in association with maintenance windows (as set forth in 21.3.2(E)) and in association with situations over which the Company does not have control (as set forth in 21.3.2(F)(3)) are counted as "available" time.

EFFECTIVE: MARCH 17, 2006

ACCESS SERVICE

21 - Fast Packet Access Services

21.3 BellSouth Exchange Access Asynchronous Transfer Mode Service (XAATMS)  
(Cont'd)

21.3.9 Rate Categories (Cont'd)

(B) PVC Features

The PVC Features rate category provides for the ordering and provisioning of ATM PVCs in association with the BellSouth XAATMS network interface.

The rates for PVC Features may vary by ATM PVC service category and are listed in Section 21.3.10 by applicable ATM PVC service category.

- (1) ATM PVC Segment Charge - An ATM PVC Segment Charge applies for each ATM PVC segment established over a network interface. An ATM PVC Segment Charge applies under all ATM PVC service categories.
- (2) ATM PVC Segment Bandwidth Charge - An ATM PVC Segment Bandwidth Charge is required per ATM PVC segment established under the CBR or VBR ATM PVC service category (but is not applicable to UBR, Flat Rate VBR-rt or Flat Rate VBR-nrt ATM PVCs). ATM PVC bandwidth represents BellSouth XAATMS network resources required for the CBR or VBR ATM PVC and is based on the CBR or VBR ATM PVC's traffic parameters (i.e., PCR, SCR, and MBS). The total charge for this rate element per segment is determined by multiplying the CBR or VBR ATM PVC segment bandwidth by the ATM PVC Segment Bandwidth Charge, either Per Megabit or Per Increment of 64 Kbps (as appropriate per Section 21.3.1(D)).
- (3) UBR Service Activation Charge - A UBR Service Activation is applicable for each network interface over which UBR ATM PVC(s) will traverse. One charge is applicable per network interface regardless of how many UBR ATM PVCs will traverse that network interface.
- (4) Flat Rate VBR-nrt Service Activation Charge - A Flat Rate VBR-nrt Service Activation is applicable for each network interface over which Flat Rate VBR-nrt ATM PVC(s) will traverse. One charge is applicable per network interface regardless of how many Flat Rate VBR-nrt ATM PVCs will traverse that network interface.
- (5) Flat Rate VBR-rt Service Activation Charge - A Flat Rate VBR-rt Service Activation is applicable for each network interface over which Flat Rate VBR-rt ATM PVC(s) will traverse. One charge is applicable per network interface regardless of how many Flat Rate VBR-rt ATM PVCs will traverse that network interface.

21.3 BellSouth Exchange Access Asynchronous Transfer Mode Service (XAATMS)  
(Cont'd)

(N)

(N)

21.3.9 Rate Categories (Cont'd)

(N)

(C) Feature Change Charge

(M)

A Feature Change Charge applies for a customer request to change an existing BellSouth XAATMS PVC Feature from Section 21.3.10 (B) for which there is no nonrecurring charge. (Examples: A Feature Change Charge applies when a customer requests a change in the ATM PVC segment bandwidth required on an existing non-UBR ATM PVC. A Feature Change Charge applies when a customer requests that UBR Service Activation be added to an existing Network Interface which currently is not activated to carry UBR ATM PVCs if the request does not also include an order for a UBR ATM PVC Segment which carries a nonrecurring charge. A customer request to change the service category of an existing CBR ATM PVC to a VBR-RT ATM PVC would not involve a Feature Change Charge but would be treated as a disconnect of the CBR ATM PVC and a new request for a VBR-RT ATM PVC for which there is a nonrecurring charge.)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

(M)

Only one Feature Change Charge applies per customer request that involves changes to multiple existing ATM PVC's of the same ATM PVC service category that are provisioned out of the same BellSouth XAATMS switch. (For example, one Feature Change Charge would apply per customer request to change the ATM PVC segment bandwidth associated with two existing CBR ATM PVCs provisioned out of the same BellSouth XAATMS switch.)

(M)

###### (5) Maintenance

In order to maintain the quality of MSFRS, the Telephone Company reserves the right to perform preventive maintenance and software updates to the network. This could result in MSFRS being unavailable during the time period between 2:00 A.M. and 4:00 A.M. Eastern Time on the specific days as set forth by state in the following chart. The Telephone Company only expects to utilize this maintenance window for any given switch on the average of once a quarter. However, the Telephone Company reserves the right to perform maintenance at any time at its discretion that it believes such maintenance is necessary. The Telephone Company will make a reasonable effort to provide notice to those customers likely to be affected by such maintenance work.

<u>State</u>	<u>Scheduled Maintenance Days</u>
Alabama	Sunday and Monday
Florida	Sunday and Wednesday
Georgia	Sunday and Friday
Kentucky	Sunday and Monday
Louisiana	Sunday and Tuesday
Mississippi	Sunday and Tuesday
North Carolina	Sunday and Saturday
South Carolina	Sunday and Saturday
Tennessee	Sunday and Thursday

Material appearing on this page previously appeared on Second Revised Page 21-30.

All BellSouth marks contained herein and as set forth in the trademarks and service marks section of the BellSouth Tariffs are owned by BellSouth Intellectual Property Corporation.

## ACCESS SERVICE

### 21 - Fast Packet Access Services

#### 21.4 Managed Shared Frame Relay Service (MSFRS) (Cont'd)

##### 21.4.2 Service Description (Cont'd)

###### (6) Service Level Agreements (Cont'd)

###### (c) (Cont'd)

- the customer's premises equipment,
- unavailability of the customer's facilities and/or equipment, and
- customer oversubscription of the UNI/NNI beyond 200% (i.e., the sum of the total CIR of all PVCs carried by any UNI or NNI may not be greater than 200% of the UNI/NNI Connection speed).

- (d) SLA credits for missed commitments do not apply for situations when the customer's service is out of operation as a result of 1) scheduled maintenance windows as set forth in 21.4.2(5) preceding and 2) customer requests for rearrangements which resulted in that service being unavailable as set forth in 21.4.2(3)(a) and (b) preceding. Time from such activity does not count towards the time a service is considered as unavailable during a calendar month for purposes of measuring for the Network Availability SLA. (C) (C)

###### (e) Service Level Commitments

SLA commitments for the specific aspects of the Frame Relay network's performance set forth in (a) preceding are measured on a specific calendar month basis. The specific network performance commitments provided and how their performance is measured through the NVS system for a calendar month are as follows:

###### (1) Network Availability Commitment: 99.9%

- The Network Availability commitment is provided on the customer's total Frame Relay network. Network Availability will measure the percentage of time during a calendar month that the customer's Frame Relay network is available.
- Network availability will be measured through the NVS system for the customer's total Frame Relay network and for each individual Frame Relay UNI/NNI for a whole calendar month.
- For the purpose of measuring Network Availability, times during which a Frame Relay UNI/NNI is out of operation in association with maintenance windows (as set forth in 21.1.2(5)) and in association with situations over which the Company does not have control (as set forth in 21.4.2(6)(c)) are counted as "available" time.

ACCESS SERVICE

(N)

21 - Fast Packet Access Services

(N)

21.5 Managed Shared ATM Service (MSATMS) (Cont'd)

(N)

21.5.2 Service Description (Cont'd)

(N)

(C) Service Rearrangements (Cont'd)

(N)

- (b) Requests for an existing MSATMS Connection to be rearranged to  
utilize a different MSATMS switch (i.e., to allow the customer  
to order features/functions not technically available out of the  
currently assigned MSATMS switch) will result in the service  
being unavailable during the time that such rearrangement  
activity is performed/provisioned by the Telephone Company; this  
time will not be considered as down time for SLA Network  
Availability purposes. The Telephone Company will fulfill such  
a request by rearranging the MSATMS Connection to be provisioned  
off another MSATMS switch (at the Telephone Company's  
discretion) that is in the same Telephone Company Central office  
as the existing switch being used. Nonrecurring charges shall  
not apply for such a rearrangement request.

## ACCESS SERVICE

### 21 - Fast Packet Access Services

#### 21.5 Managed Shared ATM Service (MSATMS) (Cont'd)

##### 21.5.2 Service Description (Cont'd)

###### (F) Service Level Agreements

###### (3) (Cont'd)

- the customer's premises equipment,
- unavailability of the customer's facilities and/or equipment, and
- customer oversubscription of the ATM UNI beyond 200%, calculated as the total VBR equivalent bandwidth on all PVCs carried by the ATM UNI (after the CBR bandwidth is subtracted) may not be greater than 200% of the ATM UNI Connection speed.

- (4) SLA credits for missed commitments do not apply for situations when the customer's service is out of operation as a result of 1) scheduled maintenance windows as set forth in 21.5.2(E) preceding and 2) customer requests for rearrangements which resulted in that service being unavailable as set forth in 21.5.2(C)(a) and (b) preceding. Time from such activity does not count towards the time a service is considered as unavailable during a calendar month for purposes of measuring for the Network Availability SLA. (C)  
(C)

###### (5) Service Level Commitments

SLA commitments for the specific aspects of the ATM network's performance set forth in (1) preceding are measured on a specific calendar month basis. The specific network performance commitments provided and how their performance is measured through the NVS system for a calendar month are as follows:

###### (a) Network Availability Commitment: 99.9%

- The Network Availability commitment is provided on the customer's total ATM network. Network Availability will measure the percentage of time during a calendar month that the customer's ATM network is available.
- Network availability will be measured through the NVS system for the customer's total ATM network and for each individual ATM UNI for a whole calendar month.
- For the purpose of measuring Network Availability, times during which an ATM UNI is out of operation in association with maintenance windows (as set forth in 21.5.2(E)) and in association with situations over which the Company does not have control (as set forth in 21.5.2(F)(3)) are counted as "available" time.

EFFECTIVE: MARCH 17, 2006

ACCESS SERVICE

21 - Fast Packet Access Services

21.5 Managed Shared ATM Service (MSATMS) (Cont'd)

21.5.9 Rate Categories (Cont'd)

(B) PVC Features

The PVC Features rate category provides for the ordering and provisioning of PVCs in association with a MSATMS Connection.

The rates for PVC Features may vary by PVC service category and are listed in Section 21.5.10 by applicable PVC service category.

- (1) PVC Segment Charge - A PVC Segment Charge applies for each PVC segment established over a network interface. A PVC Segment Charge applies under all PVC service categories.
- (2) PVC Segment Bandwidth Charge - A PVC Segment Bandwidth Charge is required per PVC segment established under the CBR or VBR PVC service category (but is not applicable to UBR, Flat Rate VBR-rt or VBR-nrt PVCs). PVC bandwidth represents MSATMS network resources required for the CBR or VBR PVC and is based on the CBR or VBR PVC's traffic parameters (i.e., PCR, SCR, and MBS). The total charge for this rate element per segment is determined by multiplying the CBR or VBR PVC segment bandwidth by the PVC Segment Bandwidth Charge, either Per Megabit or Per Increment of 64 Kbps (as appropriate per Section 21.5.1(D)). (T)
- (3) UBR Service Activation Charge - A UBR Service Activation is applicable for each MSATMS Connection over which UBR PVC(s) will traverse. One charge is applicable per MSATMS Connection regardless of how many UBR PVCs will traverse that MSATMS Connection. (T)
- (4) Flat Rate VBR-nrt Service Activation Charge - A Flat Rate VBR-nrt Service Activation is applicable for each network interface over which Flat Rate VBR-nrt ATM PVC(s) will traverse. One charge is applicable per network interface regardless of how many Flat Rate VBR-nrt ATM PVCs will traverse that network interface. (N)  
(N)  
(N)  
(N)  
(N)
- (5) Flat Rate VBR-rt Service Activation Charge - A Flat Rate VBR-rt Service Activation is applicable for each network interface over which Flat Rate VBR-rt ATM PVC(s) will traverse. One charge is applicable per network interface regardless of how many Flat Rate VBR-rt ATM PVCs will traverse that network interface. (N)
