

Nevada Bell Telephone Company (NBTC)
2nd Quarter Federal Universal Service Fund Adjustments
DESCRIPTION AND JUSTIFICATION
FCC No. 1, Transmittal No. 123
March 17, 2006

1. Introduction

2. Federal Universal Service Fund Adjustments

- **Exhibit 1**
- **Exhibit 2**

1. Introduction

Nevada Bell Telephone Company (NBTC) is proposing the following with this filing:

- Revise USF recovery charges billed to residential and business customers to reflect the new USF contribution factor used to calculate NBTC's 2nd Quarter 2006 USF assessment.

2. 2nd Quarter Federal Universal Service Fund Adjustments

The 2nd Quarter 2006 contribution factor, 10.9%, is provided in the Commission's Public Notice, DA 06-571, released March 13, 2006. Recovery of this contribution is allowable pursuant to C.F.R. 69.158. The methodology used to calculate end user charges assessed to recover this liability is detailed below.

Calculation of the Federal Universal Service Fund Flat Rate End User Charge

To ensure compliance with the Commission's *Interim Contribution Methodology Order*, NBTC recovers its USF obligation associated with switched access services through various flat-rate end user charges¹. The charges are assessed with respect to the interstate end user service that generates the USF obligation. NBTC assesses two general types of USF charges (Basic and Non-Recurring) for switched access customers. These charges are calculated using the following methodology as shown on *Exhibit 1* and *Exhibit 2*.

¹See Federal-State Joint Board on Universal Service, 1998 Biennial Regulatory Review – Streamlined Contributor Reporting Requirements Associated with Administration of Telecommunications Relay Service, North American Numbering Plan, Local Number Portability, and Universal Service Support Mechanisms, Telecommunications Services for Individuals with Hearing and Speech Disabilities, and the Americans with Disabilities Act of 1990, Administration of the North American Numbering Plan and North American Numbering Plan Cost Recovery Contribution Factor and Fund Size, Number Resource Optimization, Telephone Number Portability, CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170, Report and Order and Second Further Notice of Proposed Rule Making, 17FCC RCD 24952 (2202) (Interim Contribution Methodology Order).

Basic USF Recovery Charges

These charges are assessed to switched access lines, to recover the USF obligation associated with the assessment of End User Common Line (EUCL), End User Port charges.

1. Residential/Single Line Business (SLB)

NBTC develops the Basic USF charge for residential and single line business customers by adding together EUCL charges assessed to these customers to obtain the basic interstate end user charges. The total basic interstate end user charges are multiplied by the relevant contribution factor released by the Commission. The calculation for the Basic FUSF Residential/Single Line Business rate is demonstrated on *Exhibit 1*.

2. BRI ISDN

NBTC develops the Basic USF charge for BRI ISDN and BRI ISDN Port customers by adding together EUCL, BRI ISDN / Centrex Port charges assessed to these customers to obtain the basic interstate end user charges. The total basic interstate end user charges are multiplied by the relevant contribution factor released by the Commission. The calculation for the Basic FUSF BRI ISDN rate is demonstrated on *Exhibit 1*.

3. Multi-line Business, PRI ISDN, and Centrex

NBTC elected to utilize the provisions granted in the *Commission's Order* and *Second Order on Reconsideration* regarding Centrex customers². A portion of the unrecovered obligation created from using the PICC equivalency ratios for Centrex customers is applied to Multi-line business customers. However, due to the constraints included in the *Commission's Order*, NBTC averages the obligation associated with End User Common Line (EUCL) charges for Centrex customers.

NBTC determines the basic USF recovery rate for business customers using the method detailed below.

² See Federal-State Joint Board on Universal Service, 1998 Biennial Regulatory Review – Streamlined Contributor Reporting Requirements Associated with Administration of Telecommunications Relay Service, North American Numbering Plan, Local Number Portability, and Universal Service Support Mechanisms, Telecommunications Services for Individuals with Hearing and Speech Disabilities, and the Americans with Disabilities Act of 1990, Administration of the North American Numbering Plan and North American Numbering Plan Cost Recovery Contribution Factor and Fund Size, Number Resource Optimization, Telephone Number Portability, CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-116,, 98-170, Order and Second Order on Reconsideration, FCC 03-58, para. 3(rel.March 14, 2003).

Establish the Basic Multi-line Business Rate

Step 1 – Determine total revenue using access lines as of December 2005 for these customers, generated from EUCL assessments, by multiplying the EUCL rate by the number of lines.

Step 2 – Multiply the result from Step 1 by the contribution factor to obtain the obligation associated with the customer base.

Step 3 – Divide the obligation developed in Step 2 by the number of billable lines (using lines as of December 2005). The line base is adjusted using PICC equivalency ratios as defined in Part 69.153. The result is the Basic MLB rate per line.

Step 4 – Add to the Basic MLB rate, all other USF recovery associated with the customer type. Step 4 is calculated by customer type for Multi-line business, PRI ISDN, and Centrex customers as shown in *Exhibit 2*. The final rates per customer type are detailed on both *Exhibit 1* and *Exhibit 2*. These final rates preclude any recovery necessary from non-recurring interstate end user charges.

Other Non-Recurring USF Surcharges

Non-Recurring USF surcharges are assessed to interstate end user non-recurring charges, which generate a USF obligation. NBTC calculates Other Non-Recurring USF charges by multiplying the non-recurring charge by the contribution factor. These USF recovery charges will only be assessed per occurrence of the interstate end user non-recurring charge. The calculations for these charges are detailed in *Exhibit 1*. For billing purposes, the USF recovery charge may be added to the existing interstate end user charge, which generates the obligation.

NBTC assesses Lifeline customers the Non-Recurring USF charges when they are assessed the non-recurring charge that generates the obligation. NBTC also assesses Interexchange Carriers (ICs) the Presubscribed Interexchange Change (PIC) USF Charge when the IC is assessed the PIC change charge.

Other Recurring Federal Universe Fund Surcharges

NBTC will continue to recover its Other Recurring (i.e. Special Access and True Internet Protocol to Public Switched Telephone Network (TIPToP) Service) USF obligations through a percentage-based USF recovery charge applied to interstate end user billed revenues. This percentage-based USF recovery charge is set equal to the Commission's contribution factor released via Public Notice.
