<sup>1</sup> In the Matter of July 2006 Annual Access Charge Tariff Filings Order in WCB/Pricing File No. 06-15, DA 06-649, released on March 24, 2006 (*"July 2006 Annual Access Charge Tariff Filings Order"*).

<sup>2</sup> In the Matter of Material to be Filed in Support of 2006 Annual Access Tariff Filings, Tariff Review Plans in WCB/Pricing File No. 06-15, DA 06-650, released on March 24, 2006 (*"Tariff Review Plan Instructions"*).

## **2.0 APPENDIX A**

### **2.1 EXOGENOUS COST CHANGES**

BellSouth has calculated its Exogenous Cost Changes pursuant to Section 61.45(d) of the Commission's Rules. The Exogenous Cost Changes included in this filing are:

1. Investment Tax Credit (ITC) Amortization
2. 2006 Telecommunications Relay Services (TRS) Fees Adjustment

As specified in Section 61.45(d)(3), BellSouth apportioned its Exogenous Cost Changes on a cost-causative basis between price cap services and non-price cap services, as described herein. Total Exogenous Cost Changes attributed to price cap services are recovered from services other than those used to calculate the Average Traffic Sensitive (ATS) rate. Exogenous Cost Changes were calculated using 2005 base period operations where applicable. Total Exogenous Cost Changes for the BellSouth Region are \$1,617,105. The Price Cap basket allocation of the Total Exogenous Costs Changes is \$1,156,032 to CMT, \$38,845 to Traffic Sensitive, \$783 to Interexchange and \$421,445 to Special Access. These basket amounts are displayed on Exhibit A-1, and reported on Form EXG-1 of the Tariff Review Plan (TRP).

### **2.2 Investment Tax Credit (ITC) Amortization**

The ITC Amortization Exogenous Cost Change was developed by determining the difference between actual ITC Amortization amounts for the current tariff period (7/05-6/06) and actual ITC Amortization amounts for the new tariff period (7/06-6/07) resulting in an Exogenous Cost Change of \$2,550,900. Part 36 Rules were used to determine interstate costs. Interstate costs were apportioned between non-price cap services and price cap services. The costs apportioned to price cap services were distributed among the price cap baskets as reported on TRP Form EXG-1, Page 1, Column D. Exhibit A-2 displays total company and interstate amounts for the base period calendar year 2005, the apportionment to price cap services, the method of basket allocation, the exogenous cost change calculation and tax rates used in the calculation.

## **2.3 2006 TELECOMMUNICATIONS RELAY SERVICE (TRS) ADJUSTMENT**

On June 28, 2005, the FCC released a final 2005 TRS factor of .00564 for the July 2005 through June 2006 tariff period.<sup>3</sup> This factor was used to compute BellSouth's 2006 TRS Adjustment. BellSouth's 2006 TRS Exogenous Cost Adjustment amount of \$(933,795) was developed by taking the difference between the price cap service allocation of BellSouth's 2006 TRS Fund and the price cap service allocation of BellSouth's 2005 TRS Fund from BellSouth's Transmittal No. 928. The calculation of the TRS Exogenous Cost Adjustment amount is displayed on Exhibit A-3. BellSouth distributed the price cap portion of the 2006 TRS Adjustment to the baskets containing end user revenue based on the percentage of end user revenue for price cap services, as displayed on Exhibit A-3, Line 8 through Line 15. The 2006 TRS Exogenous Cost Change Adjustment is reported on TRP Form EXG-1, Page 1, Column H.

## **2.4 SUPPORTING DOCUMENTATION**

Exhibit A-4, provides the initial BellSouth FCC 492A Report for calendar year 2005 and the final BellSouth FCC 492A Report for calendar year 2004.

## **3.0 APPENDIX B – TRP SUPPORTING WORKPAPERS**

Appendix B contains Workpapers CL-1, calculation of the "g" factor; TPT-1, development of ATS LEC-Transport minutes of use; and IND-1, which contains transmittal references of existing price cap indices. Workpaper CL-1 calculates the growth in MOU per line for BellSouth by determining the 2005 MOU per line and comparing it to the 2004 MOU per line. Workpaper TPT-1 develops the pricing flexibility LEC-Transport MOU necessary to calculate the Average Traffic Sensitive rate. The minutes of use are derived from LEC only interconnection minutes of use and meet-point billed minutes of use. These minutes of use are then adjusted for the pricing flexibility relief that BellSouth has previously been granted by the FCC. Workpaper IND-1 provides a transmittal number reference of existing price cap indices.

Excluded Services

In order to remove excluded services from Price Cap regulation in accordance with the FCC Price Cap plan, data in this report has been adjusted for the removal of excluded service offerings amounting to \$7,017. Earnings associated with these services have been removed at the same rate as total interstate services.

A tariff was filed to remove interexchange toll revenue from Price Caps in December 1999. For purposes of this report, interexchange toll revenue amounting to \$2,059 for the year 2005 is no longer part of price cap regulation.

On December 15, 2000 and November 22, 2002, the FCC granted BellSouth pricing flexibility relief for Special Access and Dedicated Transport services in certain MSAs, including the removal of these services from Price Cap regulation. Accordingly, this report is adjusted to remove annual revenues associated with the services for which relief was granted amounting to \$2,270,686.

In accordance with the CALLS Order released on May 31, 2000, BellSouth removed all federal Universal Service Fund (USF) contribution recovery from Price Cap regulation effective July 2000 and established new end user charges outside of Price Caps to recover these contributions. The revenue associated with these charges amounted to \$245,460 for the year 2005.
