## SECTION 1

### **Description**

The Bell Atlantic Telephone Companies<sup>1</sup> hereby submit tariff pages and supporting documentation to make rate changes to its existing IntelliLight® Customer Assurance Network (ICAN) service. Bell Atlantic is proposing ICAN service rate changes to meet market demand for competitively priced advanced services in metropolitan areas. Current pricing models based on sampling of customer network configuration requests were compared to alternative Special Access service solutions. Adjustments to rates for ICAN service networks in the highly competitive New York/Connecticut rate zone will create proper rate positioning and positively effect market demand.

---

<sup>1</sup> The Bell Atlantic telephone companies (“Bell Atlantic”) participating in this tariff are: New York Telephone Company and New England Telephone and Telegraph Company.

## **SECTION 2**

### **COSTS**

The cost documentation originally provided under Transmittal No. 520, filed on September 18, 1998, contain the necessary information required under section 61.38(b)(2) and 61.49(g) and (h) of the Commission's rules to evaluate and support the rate reductions proposed in this filing.
