

ACCESS SERVICE

8. Billing Name and Address (BNA) Service8.1 General Description

Billing Name and Address Service, hereinafter referred to as BNA, is the provision of a name and address within the Telephone Company records to which billing is rendered. BNA is normally associated with a telephone number assigned to a customer and can have one or more telephone numbers consolidated with the BNA for billing purposes. BNA may or may not be the listed name and address or the location of the customer's exchange telephone service.

8.2 Undertaking of the Telephone Company

The Telephone Company will, subject to procedures established for Customer Account Record Exchange, hereinafter referred to as CARE, furnish the BNA except as described below; (1) when available in the Telephone Company data base and (2) whenever a customer initiates a request through such procedures. (C)

The Telephone Company will provide a copy(ies) of the CARE publication, as revised or amended, to each customer upon request or when notification to the Telephone Company is made regarding establishment of a presence within its operating territory.

The Telephone Company will not provide BNA information for unlisted and nonpublished end users who request nondisclosure. Unlisted and nonpublished end users who request nondisclosure of their BNA information will be excluded from making third party or receiving collect calls. (C)

8.3 Liability of the Telephone Company

Approval of language by the FCC does not constitute a determination by the Commission that the limitation of liability imposed by the Company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of any exculpatory clauses.

Notwithstanding the provisions of Section 2 of this tariff regarding liability, no liability for damages to the customer or any other person or entity shall attach to the Telephone Company for its action or conduct of its employees in providing BNA in the absence of willful misconduct.

(This page filed under Transmittal No. 651)

Issued: February 23, 1994

Effective: April 9, 1994

Senior Vice President
201 East Fourth Street
Cincinnati, Ohio 45202

ACCESS SERVICE

8. Billing Name and Address (BNA) Service (Cont'd)8.4 Obligations of the Customer

The customer shall order BNA through the established Telephone Company CARE procedures, as amended or revised. (C)

The customer shall accord proprietary treatment to listings. Anyone acquiring BNA access from the Telephone Company must use BNA only for billing and collecting and it may not be used for marketing purposes. Customers are prohibited from disclosing BNA except to governmental law enforcement agencies, authorized billing and collection agents and as described above.

8.5 Rate Regulations

For each customer BNA request, indicated through the CARE procedure, the rate set forth in 8.6 following applies. The charge applies for all inquiries including but not limited to record not found, duplicate request, invalid request, and invalid information.

The minimum charge for BNA service usage during a month is \$50.00 (C)
For example:

1. A customer submits 3 BNA requests in a given month
(3 x \$0.97 = \$2.91). The customer would pay the minimum charge of \$50.00.
2. A customer submits 112 BNA requests in a given month.
The monthly charge would be \$99.16. ((100 x \$.97) + (12 x \$.18)) = \$99.16. The minimum charge would not be assessed since the per BNA cost is greater than \$50.00.

If BNA service is not used during the month, no charges are assessed. (C)

8.6 Rates and Charges

	<u>Nonrecurring Charge</u>
Start Up Charge	\$ 500.00(R)
<u>Requests per Month*</u>	<u>Rate per Customer Request</u>
1 - 100	\$ 0.97
101 - 500	0.18
501 - 1000	0.064
over 1000	0.04

* \$50.00 Minimum Monthly charge if BNA service used. (C)

ACCESS SERVICE

9. Directory Assistance Service

The Telephone Company will provide Directory Assistance (DA) Service to a customer from Directory Assistance Service locations (DA location).

9.1 General Description

DA Service provides Directory Access Service to DA locations, use of DA access equipment, and use of DA operators to provide telephone numbers.

9.2 Undertaking of the Telephone Company

- (A) A Telephone Company DA operator, when furnished a name and locality, will provide or attempt to provide the telephone number listed in the Telephone Company DA records associated with the name given at the rates and charges as set forth in 9.6 following. The Telephone Company's contact with the customer's end user shall be limited to that effort necessary to process a customer's end user's request for a telephone number; and the Telephone Company will not transfer, forward or redial a customer's end user call to any other location for any purpose other than provision of DA Service.
- (B) A maximum of two (2) requests for telephone numbers will be accepted per call to the DA operator.
- (C) A telephone number which is not listed in DA records will not be available to the customer's end user.
- (D) The Telephone Company will specify the DA location which provides the DA Service for each numbering plan area code (NPA). The DA locations are as shown in NATIONAL EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 4. (T)

When it becomes necessary, as determined by the Telephone Company, to change a DA location, the Telephone Company will notify the involved customers six months prior to the change. For such changes, the regulations as set forth in 2.1.7 preceding apply.

- (E) When DA Service is ordered, Directory Access Service will be provided between the customer premises and the DA location by the Telephone Company at rates and charges as set forth in 9.6 following, as follows.

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(1) General

Each Directory Access Service will consist of the following:

- An Interface Group equipped with an available Premises Interface Code at the customer's premise.
- Directory Transport between the premise of the ordering customer and the DA switch location.

When required by the Telephone Company, a separate Directory Access Service trunk group will be provided for DA Service for each NPA. Separate trunk groups will be required when the Telephone Company notifies the customer that the mechanized search of its data base and its mechanized operator practices require a mechanized identification of the NPA code for which the customer's end user desires DA information.

Further, when an access tandem is available and is provided, the Directory Access Service will be provided, at Telephone Company choice, either as a separate Directory Access Service trunk group or in combination with Feature Group B or D Switched Access Service.

(C)

(2) Interface Group and Premise Interface Code

Interface Groups 2, 6 and 9 as set forth in 6.1.3(B)(5) preceding are available for Directory Access Service. When only Directory Access Service is provided, only the following Premise Interface Codes are available:

4DS9-15	6EA2-E	4RV2-O
4DS6-44	6EA2-M	
	4SF3	

(This page filed under Transmittal No. 684)

(E) (Cont'd)

(2) Interface Group and Premise Interface Code (Cont'd)

Such Premise Interface Codes are described in 6.1.3(B)(2) preceding. When Directory Access Service is combined with Feature Group B or D Switched Access Service, the Premise Interface Code for the combination will be the available Premise Interface Code provided for the Feature Group B or D Switched Access Service ordered by the customer. Except as set forth in 9.4(A) following, the Interface Groups and Premises Interface Codes provided under a Special Order for Directory Access Service are subject to the order conditions as set forth in 5. preceding. For purposes of applying the order regulations, a DA switch location is considered to be a customer end user serving wire center. (C)

(3) Directory Transport

Directory Transport provides the transmission facilities and transport termination between the premises of the ordering customer and the DA switch location. For purposes of determining Directory Transport mileage, distance will be measured from the wire center that normally serves the customer premises to the DA location(s).

Directory Transport is a two-way voice frequency transmission path composed of Switched Access transport facilities as set forth in 6.1.3 preceding. The two-way voice frequency path transports calls in the terminating direction (from the premises of the ordering customer to the DA switch location). The following rate elements, which are more fully described in 6.1.3 preceding, are applicable.

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(3) Directory Transport (Cont'd)

- Entrance Facility for the transport of the DA call from the customer's premises to the serving wire center of that premises over dedicated facilities. (N)
- Direct Trunked Transport for the transport of the DA call from the customer's serving wire center to the DA switch location over dedicated facilities.
- Tandem Switched Transport (i.e., Tandem Switched Transmission, and Tandem Switching) for the transport of the DA call from the customer's serving wire center to the DA switch location with switching at a tandem.
- Interconnection Charge for the Switched Transport costs that are not recovered by the Entrance Facility, Direct Trunked Transport, Tandem Switched Transport, Multiplexing or CCSAC Link and port rates.
- Multiplexing DS3 to DS1 Multiplexing charges apply when a High Capacity DS3 Entrance Facility or Direct Trunked Facility is connected with High Capacity DS1 Direct Trunked Transport. The DS3 to DS1 multiplexer will convert a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing.

DS1 to Voice Grade Multiplexing charges apply when a High Capacity DS1 Entrance Facility or Direct Trunked Facility is connected with Voice Grade Direct Trunked Transport. The DS1 to voice multiplexer will convert a 1.544 Mbps channel to 24 Voice Grade channels.

Multiplexing is only available at wire centers identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF FCC NO. 4, WIRE CENTER INFORMATION. (N)

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(3) Directory Transport (Cont'd)

The customer will determine whether the Directory Service is to be routed directly to a DA switch location or through an access tandem switch appropriately equipped for DA measurement and served by DA trunks to the DA switch location when such an access tandem switch is available. The combination of Feature Group B or D Switched Access Service with DA Service will only be provided at such available and appropriately equipped access tandem switches. (C)

When Directory Transport is provided using Direct Trunked Transport DA switch location, no address signaling is provided. When Directory Transport is provided with the use of an access tandem switch, wink start-start pulsing signaling is provided at the access tandem switch. When access tandem routing is provided, the customer shall address each call to the DA switch location using NPA + 555 + 1212 or when required by the Telephone Company, 555-1212. Only NPA codes handled by the DA switch location served by the access tandem switch will be processed.

(E) (Cont'd)

(5) Design Layout Report

The Telephone Company will provide to the customer the makeup of the facilities and services provided under this section as Directory Access Service. This information will be provided in the form of a Design Layout Report similar to that as set forth in 6.1.5. Design Layout Reports for Directory Access Service will be provided only when specifically requested by the customer. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updates whenever the facilities provided for the customer's use are materially changed.

(6) Transmission Specifications

Directory Access Service is provided with either Type A or B Transmission Specification. The specifications associated with the parameters are guaranteed to the DA switch location, whether routed directly or via an access tandem. Type B Transmission Specification is provided with Interface Groups 2, 6, and 9 when routed direct to a DA switch location. Type A Transmission Specification is provided with Interface Groups 2, 6, and 9 when routed via an access tandem switch.

When DA Service is combined with Feature Group D Switched Access Service, Type A Transmission Specification is provided. When DA Service is combined with Feature Group B Switched Access Service, Type B Transmission Specification is provided for Interface Groups 2, 6 and 9.

(D)

9. Directory Assistance Service (Cont'd)9.2 Undertaking of the Telephone Company (Cont'd)

(E) (Cont'd)

(7) Acceptance Testing and Testing Capabilities

The acceptance testing and testing capabilities for Directory Access Service traffic routed through an access tandem are the same as those for the associated Feature Group D end office switching. The acceptance testing for Directory Access Service traffic routed directly to or routed in a separate trunk group through an access tandem to the DA location will be as set forth in 6.1.6 preceding. The testing capabilities for Directory Access Service traffic routed directly to or routed in a separate trunk group through an access tandem to the DA location will be as set forth for cooperative scheduled testing or manual scheduled testing in 13. following. (C)

- (F) Trunk side switching is provided at the DA Service access location. The DA Service access location will provide trunk answer and disconnect supervisory signaling.
- (G) The Telephone Company will distribute the calls received over the Directory Access Services to the DA operators using the DA location access equipment.
- (H) In the event that the telephone number is unavailable to the DA operator, no credit applies for the charge for the call to the DA operator. When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure or an incorrect number is provided, a credit as set forth in 9.4(H) following will apply.
- (I) DA Service may, at the option of the customer, be provided for interstate and intrastate communications. When the customer requests such mixed access, the interstate DA Service charges will be determined by the Telephone Company using the data furnished by the customer as set forth in 2.3.14 preceding.
- (J) The Telephone Company does not provide Directory Assistance Service for 500 NXX, 800 NXX or 900 NXX Access Service.

9. Directory Assistance Service (Cont'd)

9.3 Obligations of the Customer

- (A) The customer shall determine and order the trunks and interface (C) type of Directory Access Service it needs for DA Service. (C)
- (B) When DA Service is initially ordered, the customer shall order the service for at least six months. Thereafter, additional service may be ordered for a minimum of six months. Not later than three months prior to the end of the six month period, the customer shall notify the Telephone Company if the service is to be discontinued at the end of the six month period. If no notice is received from the customer the Telephone Company will automatically extend the service for another six months and all appropriate charges as set forth in 9.6 following for another six months will apply.
- (C) The customer facilities at the premises of the ordering customer shall provide the necessary on-hook and off-hook supervision.
- (D) When requested by the Telephone Company, the customer shall order a separate trunk group for DA Service for each NPA. The conditions when the customer will be requested to order separate trunk groups for each NPA are set forth in 9.2(E)(1) preceding.
- (E)
- (F) The customer understands that DA operators will respond to only (T) two (2) telephone number requests per call and will not transfer, forward or redial the call to another location for any purposes other than the provision of DA Service.

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements(A) Minimum Periods

The minimum period for which DA Service and the Directory Access Service is provided and for which charges apply is six months. A minimum period of six months applies for each additional period of service ordered or extended.

If DA Service is discontinued prior to the end of each six month period, the charges that apply for the remaining months are the non-recoverable costs. Such costs include the non-recoverable cost of equipment and material ordered, provided or used, plus the non-recoverable cost of installation and removal including the costs of engineering, labor supervision, transportation, rights-of-way and other associated costs less estimated net salvage.

(B) Minimum Monthly Charge

DA service is subject to a minimum monthly charge. The minimum monthly charge consists of the following elements:

For those rate elements that are billed a flat monthly rate, i.e., Directory Transport options, the minimum monthly charge is the monthly rate as set forth in 9.6 following.

The minimum monthly charge for Directory Assistance Service calls is the charge as set forth in 9.6 following for the actual usage for the month.

(M)

9.4 Payment Arrangements (Cont'd)(D) Cancellation of a Special Order

A customer may cancel a Special Order for DA Service on any date prior to the service date. The cancellation date is the date the Telephone Company receives written or verbal notice from the customer that the Special Order is to be cancelled. The verbal notice must be followed by written confirmation within 10 days.

When a customer cancels a Special Order for DA Service after the order date but prior to the start of service, the appropriate charges as set forth in 5. preceding apply for the Directory Access Service cancelled. In addition, a charge equal to any unrecoverable capital costs incurred by the Telephone Company will apply to the customer.

(E) Changes to Special Orders

When a customer requests changes to a pending order for DA Service, such changes will be undertaken if they can be accommodated by the Telephone Company. The appropriate charges as set forth in 5. preceding apply for the Directory Access Service changed. In addition, a charge equal to any other costs incurred by the Telephone Company because of the change will apply.

(M)

Certain regulations on this page formerly appeared in ECA Tariff F.C.C . No. 1 on 3rd Revised Page 599.

Issued: July 2, 1985

Effective: October 1, 1985

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(F) Moves

A move involves a change in the physical location of the point of termination at the customer premises or of the customer premises. Moves will be treated as set forth in 6.7.7 preceding and all associated nonrecurring charges will apply. Minimum period requirements will be established at the new location as set forth in 6.7.7 preceding. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

(G) DA Service Rearrangements

Nonrecurring charges apply for service arrangements. Service rearrangements are as set forth in 6.7.1(C)(3) preceding. The Service Rearrangement Charges are as set forth in 6.7.1(C)(3) for the type of change provided by the Telephone Company.

(H) Credit Allowance for DA Service

- (1) When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure or an incorrect number is provided and a customer DA call has been answered or forwarded to a DA operator, a credit allowance for a call answered or forwarded to the DA operator equal to the rate for a Directory Assistance Service Call as set forth in 9.6 following will be applied to the customer's charges. (C)

(C)

|
(C)

- (2) In addition to the credit as set forth in (1) preceding, when a DA operator or DA equipment provides an incorrect number for a call and the customer reports such occurrences to the Telephone Company, a credit allowance for such DA call will apply. The credit will be as set forth in (3) following. When the customer reports such a call and the number requested, the number provided and the reason the number provided is incorrect, the number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer.

(This page filed under Transmittal No. 634)

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)9.4 Payment Arrangements (Cont'd)(H) Credit Allowance for DA Service (Cont'd)

(3) When a DA call is not completed due to the failure of Directory Access Service to DA locations, DA access equipment or DA operator activities, a credit allowance for the Switched Access Service portion in the originating LATA of such DA call will apply. When the customer reports such a call and DA number dialed, time of the call and the date of the call, the number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the customer. The credit will be as set forth following:

a)		(D)
		(D)
b)	Credit per call when Feature Group A and/or B Switched Access Service is billed	0.0097 (C)
c)	Credit per call when Feature Group D Switched Access Service is billed	0.0097 (C)

(4) Credit allowances for other service interruptions will be provided as set forth in 2.4.4 preceding.

9.5 Rate Regulations

(A) The Directory Assistance service call charge as set forth in 9.6 (A) following, applies for each call to DA Service. A call is a call which has been answered by or forwarded to a DA operator. The charge applies whether or not the DA operator provides the requested telephone number. The number of calls answered or forwarded to DA operators will be accumulated by Telephone Company measuring equipment. A credit for the provision of an incorrect telephone number will be applied as set forth in 9.4(H) preceding.

ACCESS SERVICE

9. Directory Assistance Service (Cont'd)

9.5 Rate Regulations (Cont'd)

- (B) The mileage for Directory Transport is measured from the serving wire center for the premises of the ordering customer to the DA switch location. Title Page notwithstanding, these two wire centers may be in different LATAs. In addition, the premises of the ordering customer must be in the LATA where DA service is requested or in the LATA where the DA switch location is located. The measurement will be performed as set forth in 6.7.13 preceding.
- (C) The charge per call for Directory Transport, as set forth in 9.6 (B) following, applies for each call to DA service. A call is as set forth in (A) preceding. The number of calls will be accumulated as set forth in (A) preceding.

9.6 Rates and Charges

The rates and charges are:

- (A) Directory Assistance
Service call, each \$0.3000(I)
- (B) Directory Access Service
 - Directory Access Installation Charges are the same
Charge as those set forth in 6.8.2(c) preceding
 - Directory Transport

The following Switched Transport charges set forth in 6.8.2 preceding are also applicable to Directory Transport Service and will be assessed on the same basis as the Switched Transport rate regulations described in 6.1.3 preceding:

- Entrance Facility
- Direct Trunked Transport
- Multiplexing

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements10.1 General

This section covers Access Services that are provided to a customer (C)
for use only by agencies or branches of the Federal Government and
other users authorized by the Federal Government Federal
Government. Services provided to state emergency operations
control communications, including communications for national
security, emergency preparedness and presidential requirements.
They are required to assure continuity of Government in emergency
and crisis situations and to provide for national security. In
addition, this section covers Telecommunications Service Priority (N)
(TSP) System services and procedures as set forth in 10.8.1(D) |
since it is administered by the Federal Government. (N)

Services for command and control communications and for national
security and emergency preparedness sometimes require short notice and
short duration service provisions. These provisions are especially
man-made, or declared emergencies. Requirements of this type cannot be
forecasted and are usually needed for a relatively short period. The
provision of service under these conditions may require the
availability of facilities, such as portable microwave equipment, which
are provided on a temporary basis by the Telephone Company or Customer.

10.2 Emergency Conditions

These services will be provided on the date requested or as soon as
possible thereafter when the emergency falls into one of the following
categories:

- (A) State of crisis declared by the National Command Authorities
(includes commitments made to the National Communications System in
the "National Plan for Emergencies and Major Disasters").

Issued: July 27, 1990

Effective: September 10, 1990

Senior Vice President
201 East Fourth Street
Cincinnati, Ohio 45202

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)

10.2 Emergency Conditions (Cont'd)

- (B) Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad. (Includes space vehicle recovery and protection efforts.)
- (C) Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.
- (D) The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately.
- (E) Political unrest in foreign countries which affect the national interest.
- (F) Presidential Service.

10.3 Intervals to Provide Service

Certain services provided under the provisions of this section of tariff are provided on an individual case basis. Therefore, orders for such service shall be placed under the Negotiated Interval provisions set forth in 5.2.1(B) preceding. (C)

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)10.4 Safeguarding of Service10.4.1 Facility Availability

In order to insure communications during periods of emergency, the Telephone Company will, within the limits of good management, make available the necessary facilities to restore service in the event of damage or to provide temporary emergency service as set forth in 10.8.1(D) and 10.8.3(D) following. (C)

10.4.2 Utilization of Government Owned Facilities

In order to meet the requirements of agencies or branches of the Federal Government, the Telephone Company may utilize government-owned facilities, when necessary to provide service.

10.5 Federal Government Regulations

In accordance with Federal Government Regulations, all service provided to the Federal Government will be billed in arrears. However, this provision does not apply to other customers that obtain services under the provisions of this tariff to provide their services to the Federal Government.

10.6 Mileage Application

Mileage, when used for rate application in this section of the tariff, shall be determined by the V and H Coordinates Method as set forth in the NATIONAL EXCHANGE CARRIER ASSOCIATION, INC., WIRE CENTER AND INTERCONNECTION INFORMATION, TARIFF F.C.C. No. 4 and administered as set forth in 7.4.6 preceding. (C)

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)10.7 Move Charges

When service without a maximum termination liability charge associated with it, as set forth in 10.8.1 and 10.8.2 following, is moved to a new location within the same building or to a different building, all associated nonrecurring charges apply. (C)
(C)

When service with a maximum termination liability charge associated with it, as set forth in 10.8.1 and 10.8.2 following, is moved and is reinstalled at a new location, the customer may elect:

- to pay the unexpired portion of the maximum termination liability charge for the service, if any, with the application of a nonrecurring charge and the establishment of a new maximum termination liability charge for such service at the new location, or
- to continue service subject to the unexpired portion of the maximum termination liability charge, if any, and pay the estimated costs of moving such service, provided that the customer requests these charges be quoted prior to ordering the service move. Charges for moving such service will be based on estimated costs attributable to the move.

Move charges include the estimated costs of removal, restoration of services or facilities necessitated by the move, transportation, storage, reinstallation, engineering, labor, supervision, materials, administration, and any other specific items of cost directly attributable to the move.

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)10.8 Service Offerings

The following unique services are provided to a customer for use only by agencies or branches of the Federal Government, other authorized users and state emergency operations centers. The rates and charges for certain services shall be developed on an individual case basis and shall be consistent with the rates and charges for services offered in other sections of this tariff. (C)

10.8.1 Type and Description(A) Voice Grade Special Access Services(1) Voice Grade Secure Communications Type I

Approximate bandwidth of 10-50,000 Hertz. Furnished for two-point secure communications on two-wire or four-wire metallic facilities between IC premises and end user's premises. Services are conditioned as follows:

T-3 Conditioning - The absolute loss (referenced to 1 milliwatt) with respect to frequency shall not exceed:

15 dB at 10 Hz
13 dB at 100 Hz
9 dB at 1,000 Hz
20 dB at 10,000 Hz
30 dB at 50,000 Hz

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd) (C)(x)10.8 Service Offerings (Cont'd) (T)(x)10.8.1 Type and Description (Cont'd)(A) Voice Grade Special Access Services (Cont'd)(1) Voice Grade Secure Communications Type I (Cont'd)

Additional conditioning (available in one or two directions on four-wire facilities only) to provide the following characteristics:

The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

0 db at 1,000 Hz
+ 1 dB between 1,000 Hz and 40,000 Hz
+ 2 dB between 10 Hz and 50,000 Hz
(+ means more loss)

The net loss of the conditioned service (with or without additional conditioning) shall not vary by more than four dB at 1,000 Hz from the levels specified above. Voice frequency signaling or supervisory tones can be transmitted.

(2) Voice Grade Secure Communications Type II

Approximate bandwidth 10-50,000 Hz. Furnished on four-wire metallic facilities for duplex operation for two-point secure communications between an IC premises on an end user's premises and an end user's premises. Services are conditioned as follows:

G-1 Conditioning - The absolute loss with respect to frequency and the net loss variation shall be the same as Voice Grade Secure Communications Type I services without additional conditioning. Voice frequency signaling or supervisory tones can be transmitted.

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd) (C)(x)10.8 Service Offerings (Cont'd) (T)(x)10.8.1 Type and Description (Cont'd)(B) Wideband Digital Special Access Service

Service arrangements for secured communications to accommodate the transmission of binary digital baseband signals in a random polar format.

(1) Wideband Secure Communications Type I

For transmission at the rate of 18,750 bits per second.

(2) Wideband Secure Communications Type II

For transmission at the rate of 50,000 bits per second.

(3) Wideband Secure Communications Type III

To accommodate the transmission of restored polar two-level facsimile signals with a minimum signal element width of twenty microseconds at a rate of 50,000 bits per second.

To accommodate the transmission of binary digital baseband signals in a random polar format at the rate of 50,000 bits per second.

(C) Special Routing Access Service

(N)(x)

Special Routing Access Service is furnished only to an		
IC for an agency or branch of the Federal Government.		
This service provides the customer's end users the		
ability to originate and terminate calls to or from the		
customer's premises utilizing a Special Routing Plan. (N)	(x)

Certain regulations previously found on this page can now be found on page 208.2.

(x) Filed under authority of Special Permission No. 86-246 of the Federal Communications Commission.

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)10.8 Service Offerings (Cont'd)10.8.1 Type and Description (Cont'd)(C) Special Routing Access Service (Cont'd)

This service is an optional service which operates in conjunction with Trunk Side Premium Access Service furnished to an IC under provisions of this tariff.

The Telephone Company will record Special Routing Access Service Active Mode Trunk Usage, and will bill the customer in accordance with these records. The hours for each trunk ordered will be summed and then rounded to the nearest hour, except that when the total is less than one hour, one hour will be used to determine the charge.

(D) Telecommunications Service Priority (TSP) System (N)

- (1) Priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services shall be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations.

In addition, TSP System service shall be provided in accordance with the guidelines set forth in "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook" (NCS) H 3-1-2 dated July 9, 1990, and "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service User Manual" (NCS) H 3-1-1.

(x)

(x)

The TSP System is a service, developed to meet the requirements of the Federal Government, as specified in the Service Vendor's Handbook and Service User's Manual which provides the regulatory, administrative and operational framework for the priority installation and/or restoration of NSEP telecommunications services. These include both Switched and Special Access Services. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

(N)

(x) Issued under authority of Special Permission No. 90-674 of the Federal Communications Commission.

Issued: July 27, 1990

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)10.8 Service Offerings (Cont'd)10.8.1 Type and Description (Cont'd)(D) Telecommunications Service Priority (TSP) System (Cont'd) (N)

- (2) The TSP System's applicability is limited to Switched Access Services which the Telephone Company can discreetly identify for priority provisioning and/or restoration.
- (3) Some of the elements required for the TSP System are included in other sections of this tariff as general service offerings. They have been referenced in this section to reflect the complete TSP System with appropriate references to those other sections of the tariff for regulations, rates and charges.
- (4) The customer for TSP System Service also must be the same customer for the Access Service with which it is associated.
- (5) Under certain conditions it may be necessary to preempt one or more customer services with a lower or no Priority Restoration in order to install or restore NSEP telecommunications service(s) of a higher priority. If such preemption is necessary, and if circumstances permit, the Telephone Company will make reasonable effort to notify the preempted service customer of the action to be taken. Credit allowance for such service preemption shall be made in accordance with the provisions set forth in 2.4.4(E) preceding concerning Temporary Surrender of a Service.
- (6) The customer, in obtaining TSP System service, acknowledges and consents to the provision of certain customer service record information by the Telephone Company to the Federal Government, as specified in the TSP Service Vendor Handbook, in order for the Government to maintain and administer its overall TSP System. This customer service record information will include only TSP Authorization Code and Telephone Company Circuit/Service ID.

(N)

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)10.8 Service Offerings (Cont'd)10.8.1 Type and Description (Cont'd)(D) Telecommunications Service Priority (TSP) System
(Cont'd)

(N)

- (7) When Priority Restoration Maintenance and Administration, as defined in the TSP Service Vendor Handbook, is discontinued (Revocation of Assigned Priority Restoration), and the associated Access Service is continued in service, the charge specified in 10.8.2(D)(2)(C) will not apply for such a discontinuance.
- (8) Credit allowance for service interruption for Priority Restoration Maintenance and Administration shall be the same as for the Access Service with which it is associated as set forth in 2.4.4 preceding.
- (9) Certain activities performed by the Telephone Company in association with the TSP System are as follows:
 - (a) Priority Installation Invocation includes System Development, Verification, Confirmation and Preemption.
 - (b) Priority Restoration Level Implementation includes System Development, Verification and Confirmation.
 - (c) Priority Restoration Level Change includes Verification and Confirmation.
 - (d) Priority Restoration Maintenance and Administration includes Reconciliation and Preemption.
- (10) The customer, in obtaining a Priority Installation and/or Restoration, recognizes that quoting charges and obtaining permission to proceed with the installation or restoration of certain Access Services will cause unnecessary delays and, as a result, would be contrary to the aforementioned Rules and Regulations. In subscribing to Priority Installation and/or Restoration service the customer recognizes this condition and grants the Telephone Company the right to quote charges after the restoration has been completed.

ACCESS SERVICE

10. Federal Government Specialized Service or Arrangements (Cont'd)10.8 Service Offerings (Cont'd)10.8.1 Type and Description (Cont'd)(D) Telecommunications Service Priority (TSP) System
(Cont'd)

- (11) Existing Restoration Priority (RP), as delineated in 13.3.2 following, will remain in effect for thirty (30) months (until March 10, 1993). If RP Service is converted to TSP the customer will incur the Priority Restoration Level Implementation Nonrecurring Charge as specified in 10.B.2(D)(2)(a) following.

(E) Government Emergency Telecommunications Service (GETS)

The Government Emergency Telecommunications Service (GETS) provides authorized federal government end users with a National Security and Emergency Preparedness (NSEP) switched voice and data communications service utilizing the public switched network through a special code(s) in the Telephone Company's end offices. GETS is activated at the request of the Federal Government or its authorized agent. GETS facilities may not be used for non-national security or non-emergency government telecommunications, non-GETS services or by unauthorized end users.

GETS operates in conjunction with Switched Access Services provided under other provisions of this tariff. GETS charges will have a PIU of 100%. The credit allowances for service interruption for GETS is the same as for the Access Service with which it is associated as set forth in 2.4.4 (Credit Allowance for Service Interruptions) and 2.4.5 (Service Assurance Warranty Schedule).

Features

(1) Alternate Carrier Routing (ACR) Feature

GETS Alternate Carrier Routing (ACR) is an advanced network feature and is available where facilities exist in suitably equipped end offices. The GETS ACR feature provides for the routing of the GETS universal access number to a sequence of GETS carriers. GETS ACR allows NSEP end users to use the public switched network to provide enhanced call completion capability on calls made during times of national emergencies or disaster. GETS ACR provides alternate route capability on calls originated from lines served by end offices equipped with the GETS ACR feature to the GETS universal access number.

When the presubscribed carrier is a participating GETS carrier, GETS ACR enables calls first to be routed for completion to the presubscribed carrier of the originating line. When the presubscribed carrier is not a participating GETS carrier, then a table (Selection Order Data Set) determines the GETS carrier. The Selection Order Data Set contains three alternatives for a GETS carrier and is preselected on a per end office basis using data provided by the Federal Government or its authorized agent.

The ACR feature will apply to the originating CBT segment of a GETS call. The GETS access number will cause the activation of a trigger in the applicable end office, using Advanced Intelligent Network (AIN) capabilities to provide a GETS caller with alternate routing in CBT's network to an ordered set of interexchange carrier (IXC) access routes.

10. Federal Government Specialized Service or Arrangements (Cont'd)10. 8 Service Offerings (Cont'd)10.8.1 Type and Description (Cont'd)(E) Government Emergency Telecommunications Service (GETS)
(Cont'd)Features (Cont'd)

An ACR-equipped office can offer up to three IXC route choices to GETS callers. At non-ACR-equipped end offices, GETS calls will be routed to the caller's subscribed carrier or carrier designated by the IC Subscription override code, if dialed. (C)
(C)

(2) GETS Calling Party Number (CPN) Overlay Feature

Where technically feasible and facilities permit, the GETS Calling Party Number (CPN) Overlay Feature is included with GETS ACR in suitably equipped GETS ACR End offices. The CPN feature will not be offered separate from the ACR feature, but may be excluded. The Federal Government or its authorized agent will determine the unique GETS CPN. The GETS CPN Overlay Feature allows the network CPN information to be changed from the value of the actual calling party to a unique GETS number for all GETS ACR calls. The unique GETS CPN, not the actual calling party, is passed to the participating GETS carrier.

Cancellation

Prior to deployment of the GETS service, the Government may terminate performance of work, in whole or in part, if termination is in the Government's interest. Cincinnati Bell Telephone, upon receiving a Notice of Termination, will immediately stop work as specified in the notice; place no further subcontracts or orders for materials, services or facilities except to complete continued portion of the contract; terminate all subcontracts to the extent related to the work terminated; settle all outstanding liabilities and termination settlement proposals; transfer title and deliver to the Government work in progress, plans, information, and any other material which would normally be furnished to the Government if the GETS service had been completed;

complete performance of work not terminated; protect property related to GETS service which Government has interest; and submit a final termination settlement proposal no later than one year from the effective date of termination, unless extended in writing by the Government within the one-year period.

System Modification Charge

Following customer acceptance of the GETS system, any customer-initiated system modifications and enhancements or customer support at the customer's request and not due to system defect, will be billed to the customer with a minimum of one hour.

Billing

CBT shall invoice for the applicable services, in arrears, as follows:

Nonrecurring Charges:

- . ACR-CDR Implementation - Initial Development Charge upon acceptance of service.
- . CDR End Office Setup and Activation or Deactivation upon activation or deactivation. Invoice should include written confirmation of activation/deactivation.

Recurring Charges:

Billed on monthly or annual basis:

- . ACR (per end office)

ACCESS SERVICE

11. Special Facilities Routing of Access Services11.1 Description of Special Facilities Routing of Access Services

The services provided under this tariff are provided over such routes and facilities as the Telephone Company may elect. Special Facilities Routing is involved when, in order to comply with requirements specified by the customer, the Telephone Company provides Switched Access Service, Special Access Service or Federal Government Specialized Service or Arrangements in a manner which includes one or more of the following conditions: (T)
(T)

11.1.1 Diversity

Two or more services, or portions thereof, must be provided over not more than two different routes, e.g., physical geographical routes, separate cable sheaths, different carrier transmission systems, different microwave systems, etc. (T)
(T)

11.1.2 Avoidance

A service must be provided on a route which avoids specified geographical locations.

11.1.3 Cable-Only Facilities

Certain Voice Grades services are provided on Cable-Only Facilities to meet the particular needs of a customer.

Service is provided subject to the availability of Cable-Only facilities. In the event of service failure, restoration will be made through the use of any available facilities as selected by the Telephone Company.

Avoidance and Diversity are available on Switched Access Service as set forth in 6. preceding, Special Access Services as set forth in 7. preceding and Federal Government Specialized Service or Arrangements as set forth in 10.8 preceding. (C)
Cable-Only Facilities are available for Switched Access (T)
Service as set forth in 6. preceding; Voice GradeSpecial Access Services as set forth in 7.2.3 preceding and Federal Government Specialized Service or Arrangements as set forth in 10.8 preceding. (T)

ACCESS SERVICE

11. Special Facilities Routing of Access Services (Cont'd) (M)
- 11.1 Description of Special Facilities Routing of Access Services (Cont'd)
- In order to avoid the compromise of special routing information, the Telephone Company will provide the required routing information for each specially routed service to only the ordering customer. If requested by the customer, this information will be provided when service is installed and prior to any subsequent changes in routing. (M)
- The offering of Special Facilities Routing of Access Services contemplates the use of existing facilities. Should facilities not be available, it may be necessary to construct such facilities, either as (1) normal or (2) Special Construction. If Special Construction is involved, the regulations, as set in the CINCINNATI BELL TELEPHONE COMPANY'S SPECIAL CONSTRUCTION TARIFF F.C.C. No. 39 apply. However, the applicable rates and charges shall be filed in this section of this tariff, not the Special Construction tariff. In either case of (1) or (2) preceding, the rates and charges for administration and any other specific items of cost directly attributable to the provision of this service shall be filed in this section also. (N)
- The rates and charges for Special Facilities Routing of Access Services as set forth in 11.2 following are in addition to all other rates and charges that may be applicable for services provided under other sections of this tariff. (M)
- 11.2 Rates and Charges for Special Facilities Routing of Access Service (T)
- The rates and charges for Special Facilities Routing of Access Services are as follows: (T)
- 11.2.1 Diversity (M)
- For each service provided in accordance with 11.1.1 preceding, the rates and charges will be developed on an individual case basis and filed following:
- | | |
|-------------|-----|
| <u>USOC</u> | |

ACCESS SERVICE

12. Specialized Service Or Arrangements

12.1 General

Specialized Service or Arrangements may be provided by the Telephone Company, at the request of a customer, on an individual case basis if such service or arrangements meet the following criteria:

- (A) The requested service or arrangements are not offered under other sections of this tariff.
- (B) The facilities utilized to provide the requested service or arrangements are of a type normally used by the Telephone Company in furnishing its other services.
- (C) The requested service or arrangements are provided within a LATA.
- (D) The requested service or arrangements are compatible with other Telephone Company services, facilities, and its engineering and maintenance practices.
- (E) This offering is subject to the availability of the necessary Telephone Company personnel and capital resources.

12.2 Move Charges

- (A) When service without a maximum termination liability charge associated with it is moved to new location within the same building or to a different building, all associated nonrecurring charges will apply. (C)

ACCESS SERVICE

12. Specialized Service Or Arrangements (Cont'd) (T)

12.2 Move Charges (Cont'd)

(B) When service with a maximum termination liability charge associated with it is moved and is reinstalled at a new location, the customer may elect:

- to pay the unexpired portion of the maximum termination liability charge for the service, if any, with the application of a nonrecurring charge and the establishment of a new maximum termination liability charge for such service at the new location, or
- to continue service subject to the unexpired portion of the maximum termination liability charge, if any, and pay the estimated costs of moving such service, provided that the customer requests these charges be quoted prior to ordering the service move. Charges for moving such service will be based on estimated costs attributable to the move.

Move charges include the estimated costs of removal, restoration of service or facilities necessitated by the move, transportation, storage, reinstallation, engineering, labor, supervision, materials, administration, and any other specific items of cost directly attributable to the move.

12.3 Rates and Charges

Rates and charges, and additional regulations if applicable, for specialized service or arrangements provided on an individual case basis are filed following:

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services

In this section normally scheduled working hours applies to the period Monday through Friday from 8:00 a.m. up to and including 5:00 p.m.

Overtime applies to Monday through Friday after 5:00 p.m. and up to but not including 8:00 a.m. and all day Saturday. Premium Overtime applies to all day Sunday and any Telephone Company Scheduled holiday. (Z)

13.1 Additional Engineering

Additional Engineering will be provided by the Telephone Company at the request of the customer only when:

- (A) A customer requests additional technical information after the Telephone Company has already provided the technical information normally included on the Design Layout Report (DLR) as set forth in 6.1.5 and 7.1.6 preceding.
- (B) Additional engineering time is incurred by the Telephone Company to engineer a customer's request for a customized service as set forth in 7.2.1 preceding.

The Telephone Company will notify the customer that additional engineering charges, as set forth in 13.1.1 following, will apply before any additional engineering is undertaken.

13.1.1 Charges For Additional Engineering

The charges for additional Engineering are as follows:

Additional Engineering Periods	USOC	First Half	Each Add'l
		Hour or Fraction Thereof	Half Hour or Fraction Thereof
(A) Basic Time (Monday through Friday from 8:00 a.m. up to and including 5:00 p.m.) #	AEH	\$100.00 (I)	\$75.00 (I)

If more than one engineer is involved with the same additional engineering project, the total amount of time for all engineers involved will be aggregated prior to the distribution of time between the "First Half Hour or Fraction Thereof" and "Each Additional Half Hour or Fraction Thereof" rate categories.

(This page filed under Transmittal No. 738)

201 East Fourth Street
Cincinnati, Ohio 45202

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.1 Additional Engineering (Cont'd)13.1.1 Charges for Additional Engineering (Cont'd)

Additional Engineering Periods	USOC	First Half	Each Additional
		Hour or Fraction Thereof	Half Hour or Fraction Thereof
(B) Overtime (all day Saturday; Monday through Friday, after 5:00 p.m. and up to but not including 8:00 a.m.)#	AEH	\$100.00 (I)	\$75.00 (I)

13.2 Additional Labor

Additional labor is that labor requested by the customer on a given service and agreed to by the Telephone Company as set forth in 13.2.1 through 13.2.5 following. The Telephone company will notify the customer that additional labor charges as set forth in 13.2.6 following will apply before any additional labor is undertaken.

13.2.1 Overtime Installation

Overtime installation is that Telephone Company installation effort outside of normally scheduled working hours (as specified in the beginning of Section 13 of this tariff).

13.2.2 Overtime Repair

Overtime repair is that Telephone Company maintenance effort performed outside of normally scheduled working hours (as specified in the beginning of Section 13 of this tariff).

13.2.3 Stand by

Stand by includes all time in excess of one-half (1/2) hour during which Telephone Company personnel stand by to make cooperative tests with a customer to verify facility repair on a given service.

If more than one engineer is involved with the same additional engineering project, the total amount of time for all engineers involved will be aggregated prior to the distribution of time between the "First Half Hour or Fraction Thereof" and "Each Additional Half Hour or Fraction Thereof" rate categories.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.2 Additional Labor (Cont'd)13.2.4 Testing and Maintenance with Other Telephone Companies

Testing and Maintenance with Other Telephone Companies is that additional testing, maintenance or repair of facilities which connect to facilities of other telephone companies, which is in addition to normal effort required to test, maintain or repair facilities provided solely by the Telephone company.

13.2.5 Other Labor

Other labor is that additional labor not included in 13.2.1 through 13.2.4 preceding and labor incurred to accommodate a specific customer request that involves only labor which is not covered by any other section of this tariff.

13.2.6 Charges For Additional Labor

The charges for additional labor are as follows:

<u>Additional Labor</u> <u>Periods</u>		<u>USOC</u>	<u>First Half</u> <u>Hour or</u> <u>Fraction</u> <u>Thereof</u>	<u>Each Additional</u> <u>Half Hour or</u> <u>Fraction</u> <u>Thereof</u>

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services13.3.1 Maintenance of Service and Diagnostic Service

(T)

- (A) When a customer reports a trouble to the Telephone Company for clearance and no trouble is found in the Telephone Company's facilities, the customer shall be responsible for payment of a Maintenance of Service charge for the period of time from when Telephone Company personnel are dispatched to when the work is completed.

Diagnostic Service is an optional network-based monitoring, (N) testing and maintenance service designed to assist customers of regulated services to identify and correct telecommunications problems that have been determined not to be in the Telephone Company network. Diagnostic Service provides remote Telephone Company assistance in which a technician is not dispatched to the customer's premise.

Diagnostic Service charges also apply when a customer is not reporting trouble but is requesting remote Telephone Company assistance.

(N)

Failure of Telephone Company personnel to find trouble in Telephone Company facilities will result in no charge if the trouble is actually in those facilities, but not discovered at the time.

- (B) When the trouble is in the equipment or communications systems provided by other than the Telephone Company or in detariffed CPE provided by the Telephone Company, the customer shall be responsible for payment of a Maintenance of Service charge when the Telephone Company dispatches personnel or a Diagnostic Service charge when the Telephone Company provides personnel at its office location for remote assistance.

(N)

(N)

In either (A) or (B) preceding, no credit allowance will be applicable for the interruption involved if the Maintenance of Service charge or Diagnostic Service charge (N) applies.

Certain regulations previously found on this page can now be found on Page 211.6.

(D)

(D)

(B) New end users who are served by end offices equipped with Feature Group D will be asked to subscribe to an interLATA and intraLATA IC at the time they place an order with the Telephone Company for Telephone Exchange Service. They may verbally select one of the following options. There will be no charge for this initial selection.

(C)

(C)

(C)

An end user may

(C)

- designate an InterLATA and IntraLATA subscribed IC for all of their lines,
- designate an InterLATA and IntraLATA subscribed IC for each of its lines, or
- designate that they do not want to be subscribed to any IC and chooses to dial 10XXX or 10XXXX for all calls to any IC providing service in the end office.

(C)

(C)

(C)

Only one InterLATA and one IntraLATA subscribed IC may be selected per line. The Telephone Company will confirm such verbal selection by written notice included with the first bill rendered after the customer has selected a subscribed IC. Should new end users respond to confirmation notices identifying primary ICs different from those given verbally, the Telephone Company will process such selections without subscription charges.

(C)

(E) If unable to make a selection at the time they place an order for Telephone Exchange Service, new end users will have thirty (30) days from the ordering date to select a primary IC without charge. If the new end user fails to designate an IC as its subscribed IC by the thirty-first (31st) day after the order was placed for Telephone Exchange Service, the Telephone Company will require the end user to dial an access code (10XXX or 10XXXX) for all interLATA calls. (C)

For any change in selection after the first (30) days from the ordering of Telephone Exchange Service, a nonrecurring charge, as set forth in 13.3.3.(G) following applies. (C)

(F) If an IC elects to discontinue its Feature Group D service offering the IC will notify the Telephone Company of the cancellation. The IC will also notify all end users which selected them that they are canceling their service and that the end user should contact the Telephone Company to select a new primary IC. The IC will also inform the end user that it will pay the subscription change charge. The canceling IC will then be billed by the Telephone Company the appropriate charge for each end user change. (C)

In the event that an IC does not notify their end users that their service is cancelled, the Telephone Company will change residence end users to PIC-none at no charge. The Telephone Company will move then residence end users to another IC at their request at no charge. The Telephone Company will make reasonable efforts to notify affected business customers for selection of a new IC. (C)

Standard jacks are provided by the Telephone company to connect Registered Equipment to those services that are subject to the Registration Program as set forth in Technical Reference Publication AS No. 1. The use of jacks is covered in Part 68 of the F.C.C.'s Rules and Regulations. Specific jacks are described in the document on file with the FCC entitled "Descriptions of Standard Registration Program Connection Configurations Supplementing Configurations Described in Subpart F of Part 68 of the FCC's Rules and Regulations."

These jacks are used to terminate services provided by the Telephone Company. Other services or facilities provided by the Telephone Company or by others may also be terminated in any spare capacity of the jacks remaining after installation without additional charge for the use of such capacity.

The nonrecurring charges, which include installation, for standard jacks and their typical uses are set forth following:

	<u>USOC</u>	<u>Nonrecurring Charges</u>
(A) <u>Standard Voice Jacks</u>		
(1) Miniature six-position jacks for connection of terminal equip- ment as follows:		
(a) Single line tele- phone set, sur- face or flush mounted.	RJ11C	\$00.00
(b) Single line telephone sets, wall mounted.	RJ11W	32.00 (I)

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.5 Testing Services

Testing Services offered under this section of the tariff are optional and subject to rates and charges as set forth in 13.3.5(C) following. Other testing services provided by the Telephone Company in association with Access Services are furnished at no additional charge. These other testing services are described in 6.1.6 and 7.1.7 preceding.

Testing services are normally provided by Telephone Company personnel at Telephone Company locations. However, provisions are made in (A)(5) and (B)(1) and (2) following for a customer to request Telephone Company personnel to perform testing services at the customer's premises.

The offering of Testing Services under this section of the tariff is made subject to the availability of the necessary qualified personnel and test equipment at the various test locations mentioned in (A), (B) and (C) following:

(A) Switched Access Service

Testing Services for Switched Access are comprised of (a) tests which are performed during the installation of a Switched Access Service, and (b) tests which are performed after acceptance of such access services by a customer, i.e., in-service tests. These in-service tests may be further divided into two broad categories of tests: scheduled and nonscheduled.

Scheduled tests are those tests performed by the Telephone Company on a regular basis, e.g., monthly which result in the measurement of Switched Access Service. Scheduled tests may be done on an automatic basis (no Telephone (Z)

Company or customer technicians involved), on a cooperative basis (Telephone Company technician(s) involved at Telephone Company office(s) and customer technician(s) involved at customer's premises), or a manual basis (Telephone Company technician(s) involved at Telephone Company office(s) and at customer's premises).

Nonscheduled tests are performed by the Telephone Company "on demand", which result in the measurement of Switched Access Services. Nonscheduled tests may involve Telephone Company technicians at Telephone Company offices and at the customer's premises.

(1) Additional Cooperative Acceptance Testing

Additional Cooperative Acceptance Testing (ACAT) or Switched Access Service involves the Telephone Company provision of a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required tests.

Additional Cooperative Acceptance Tests may, for example, consists of the following tests:

- . Impulse Noise
- . Phase Jitter
- . Signal to C-Notched Noise Ratio
- . Intermodulation (Nonlinear) Distortion
- . Frequency Shift (Offset)
- . Envelope Delay Distortion
- . Dial Pulse Percent Break

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd) (T)13.3.5 Testing Services (Cont'd) (M)(A) Switched Access Service (Cont'd)(5) Nonscheduled Testing

Nonscheduled Testing (NST) of Switched Access Services is where:

- the customer provides remote office test lines and 105 test lines with associated responders or their functional equivalent ("automatic testing"), or
- the Telephone Company provides a technician at its office(s) and the customer provides a technician at its premises, with suitable test equipment to perform the required test ("cooperative testing"), or
- the Telephone Company provides a technician at its office(s), and/or at the customer's premises with suitable test equipment to perform the required tests ("manual testing")

Nonscheduled Tests may consist of any tests, e.g., loss, noise, slope, envelope delay, which the customer require.

(6) Obligations of the Customer

- (A) The customer shall provide the Remote Office Test Line priming data to the Telephone Company, as appropriate, to support AST as set forth in 13.3.5(a)(2) preceding or NST as set forth in 13.3.5(A)(5) preceding.
- (B) The customer shall make the facilities to be tested available to the Telephone Company at times mutually agreed upon.

Certain regulations on this page formerly appeared in ECA Tariff F.C.C. No. 1 on 1st Revised Page 637.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.3 Miscellaneous Services (Cont'd)13.3.5 Testing Services (Cont'd)(B) Special Access Service

The Telephone Company will, at the request of a customer, provide assistance in performing specific tests requested by the customer.

(1) Additional Cooperative Acceptance Testing (ACAT)

When a customer provides a technician at its premises or at an end user's premises, with suitable test equipment to perform the requested tests, the Telephone Company will provide a technician at its office for the purpose of conducting Additional Cooperative Acceptance Testing on Voice Grade Services. At the customer's request, the Telephone Company will provide a technician at the customer's premises or at the end user premises. These tests may, e.g., consist of the following:

- Attenuation Distortion (i.e., frequency response)
- Intermodulation Distortion (i.e., harmonic distortion)
- Phase Jitter
- Impulse Noise
- Envelope Delay Distortion
- Echo Control
- Frequency Shift

(2) Nonscheduled Testing (NST)

When a customer provides a technician at its premises, with suitable test equipment to perform the required tests, the Telephone Company will provide a technician at its office for the purpose of conducting Nonscheduled Testing. At the customer's request, the Telephone Company will provide a technician at the customer's premises. Nonscheduled tests may consist of any tests, e.g., loss, noise, slope, envelope delay, which the customer may require.

13.3.7 International Blocking Service (IBS)

International Blocking Service (IBS) is an optional end user service that provides end office blocking of 011+ and 10XXX 011+ dialed calls. Originating 011+ and 10XXX or 10XXXX 011+ dialed calls from exchange lines provisioned with IBS will be blocked and routed to a recorded announcement. IBS is available to any Call Aggregator, Nonresidence (C) (Business) and/or Residence service customer with exchange (C) line side services that are subject to either the Single Line End User Common Line (EUCL) or Multiline Business EUCL rates. It is provided where facilities permit as specified in the National Exchange Carrier Association Inc., Tariff FCC No. 4.

The service (IBS) is available and may only be ordered on (C) exchange line side services and only on a per line/trunk (C) basis. No separate nonrecurring charge will apply for the installation of IBS when it is installed coincident with the initial installation of Telephone Company exchange service. A separate nonrecurring charge applies to IBS when it is installed subsequent to the initial installation of Telephone Company Exchange Service.

(Cont'd)

(N)

13.3 Miscellaneous Services (Cont'd)13.3.8 900 Pay-Per-Call Blocking

900-Pay-Per-Call blocking is a service which allows residence and nonresidence customers, Interexchange Carriers (IXC), and Billing and Collection Services (B&CS) as the Information Provider's/Sponsor's agent (and only under the direction of the Information Provider/Sponsor), to request the Telephone Company to block the origination of calls to all direct dialed "dial-it" type services (including, to 900 and 976 services). "Dial-it" services are sponsor-priced recorded and/or live information or entertainment services that allow callers to be connected to sponsor's prerecorded or live program by dialing a 900, or 976 Number. 900-Pay-Per-Call Blocking does not block the dialing of 700 numbers.

(A) Sponsor Requested 900 Pay-Per-Call Blocking

Sponsor Requested 900-Pay-Per-Call Blocking is available only where facilities and conditions permit and where necessary modifications to provide the service can feasibly be made at the Telephone Company's central office.

Sponsor Requested 900-Pay-Per-Call Blocking is permitted on all residence and nonresidence individual and trunk lines, and Centrex and ESSX-1 service lines.

Sponsor Requested 900-Pay-Per-Call Blocking is available only on customer-dialed station-to-station calls.

(N)

13.3 Miscellaneous Services (Cont'd)13.3.8 900 Pay-Per-Call Blocking (Cont'd)(A) Sponsor Requested 900 Pay-Per-Call Blocking (Cont'd)

Sponsor Requested 900-Pay-Per-Call Blocking is available only to block "dial-it" type services as described in A, above, and cannot be implemented to block specific programs. Blocking requested by one IXC, Sponsor or B&CS provides blocking for all "dial-it" type services described above.

Sponsor Requested 900-Pay-Per-Call Blocking may be requested by either an IXC, Sponsor or a B&CS for "dial-it" type services for which no complaint for unpaid charges is under dispute resolution procedures mandated by the Federal Trade Commission.

The IXC, Sponsor or B&CS must certify to the Telephone Company that notification was given to the customer of possible blocking of "dial-it" type services before the Telephone Company will provide the Sponsor Requested 900-Pay-Per-Call Blocking.

Blocking of "dial-it" type services requested by an IXC, Sponsor or B&CS will only be removed by the Telephone Company upon notification from the IXC, Sponsor or B&CS.

Sponsor Requested 900-Pay-Per-Call Blocking will be billed to the IXC, Sponsor or B&CS requesting the blocking service.

13.3 Miscellaneous Services (Cont'd)13.3.8 900 Pay-Per-Call Blocking (Cont'd)(B) Customer Requested 900-Pay-Per-Call Blocking

Customer Requested 900-Pay-Per-Call Blocking is available only where facilities and conditions permit and where necessary modifications to provide the service can feasibly be made at the Telephone Company's central office.

Customer Requested 900-Pay-Per-Call Blocking is permitted on all residence and nonresidence individual and trunk lines, and Centrex and ESSX-1 service lines.

Customer Requested 900-Pay-Per-Call Blocking is available only to block "dial-it" type services as described in above, and cannot be implemented to block specific programs. This blocking service will block direct dialing of all "dial-it" type calls regardless of whether its 900 or 976 service. Dialing of 700 numbers is not blocked.

Customer Requested 900-Pay-Per-Call Blocking is available only on customer-dialed, station-to-station calls.

The nonrecurring charge for Customer Requested 900-Pay-Per-Call Blocking is waived when blocking is provided to residential subscribers. The waiver applies to their initial and all subsequent requests.

The nonrecurring charge to establish Customer Requested 900-Pay-Per-Call Blocking is waived when blocking is provided to a nonresidence subscriber at the same time the associated access line is established and/or when transferred to a new address.

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd) (N)

13.3.9 Local Number Portability (LNP) Query Service (N)

(A) General

Local Number Portability (LNP) Query Service provides the ability (1) of a Telecommunications Carrier's customers to maintain the same Telecommunications Number (TN) when changing from one telecommunications service provider to another while remaining at the same location, and (2) for all Telephone Company customers to complete local calls to numbers that have been ported. LNP capability will be activated in Telephone Company end office switches based on receipt of a Bona Fide Request.

LNP Query Service is a capability that utilizes Advanced Intelligent Network (AIN) technology to query a data base to secure network routing instructions before completion of a call. The database contains information about end users which have ported their service from the donor switch. At a minimum, the database contains the Location Routing Number (LRN) which identifies the Local Service Provider's (LSP) switch serving each ported end user. The LRN is used to direct the call to the correct switch for completion to the end user. Where more than one network is involved in completing the call, the network just before the terminating network (i.e., the N-1 Network) is responsible for querying a LNP data base to secure the LRN.

N-1 wireline and wireless telecommunications carriers ('Carriers') will be assessed a LNP query charge as set forth in 13.3.9(E) following where they deliver calls for termination by the Telephone Company for which a query has not been performed. (N)

ACCESS SERVICE

13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)

13.3 Miscellaneous Services (Cont'd)

13.3.9 Local Number Portability (LNP) Query Service

(N)

(B) LNP Query Service Application

Terminating calls from N-1 Carriers upon which a query has not been performed to numbers in the Telephone Company's network with NXX codes that have been designated as number portable may require a query to the LNP data base. There are three applications of the LNP network capability available through the Telephone Company's network.

(1) Prearranged LNP Query

N-1 Carriers may arrange in advance to have the Telephone Company query the LNP data base for terminating a call into the Telephone Company's network. This query is initiated on behalf of the Carrier in the performance of its N-1 responsibility. In this scenario, the Telephone Company's end office or access tandem switch will suspend call processing and launch a query to the LNP data base. When the routing information is returned to the switch, call processing is resumed and the call is routed to the correct switch for completion to the called party. The Carrier will be assessed either an end office or a tandem LNP Query depending upon where the query is launched.

(2) Default LNP Query

Carriers who have not arranged in advance to have the Telephone Company query the LNP data base or otherwise do not qualify for the prearranged query rate and terminate calls into the Telephone Company's network without having performed the appropriate data base query will be assessed a Default LNP Query. This query is initiated on behalf of the N-1 Carrier in the performance of its N-1 responsibility, and may require the Telephone Company to assume extraordinary measures to meet the demand of unforecasted default queries. The Carrier will be assessed either an end office or a tandem LNP Default Query depending upon where the query is launched.

13.3 Miscellaneous Services (Cont'd)

13.3.9 Local Number Portability (LNP) Query Service (Cont'd) (N)
(N)

(B) LNP Query Service Application (cont)

(3) LNP Database Query

This rate element applies to wireless and wireline N-1 telecommunications carriers who make a number portability database query to CBT's number portability database, utilizing CBT's Common Channel Access Service as specified in section 6 of this Tariff.

(C) Service Provisioning

LNP Query Service is deployed in all of Cincinnati Bell Telephone switches.

LNP Query Service procedures will be applied uniformly to all users of the Telephone Company's LNP Query Service except as stated in 3, following. The Telephone Company's LNP database will receive and respond to all queries, including the Telephone Company's queries in accordance with accepted industry technical standards.

(1) Manner of Provisioning

LNP Query Service will be provisioned using the LRN. LRN associates an NPA-NXX-XXXX number with each central office switch that serves ported lines. This number will be known as the LRN for that switch. The LRN will be used as a network routing number for calls to ported numbers served by that switch. All switching equipment types will utilize LRN functionality using Advanced Intelligent Network capability (AIN).

13.3 Miscellaneous Services (Cont'd)

13.3.9 Local Number Portability (LNP) Query Service (Cont'd) (N)
Service Provisioning (Cont'd)

(2) Limitations

LNP Query Service is to be used only on a call-by-call basis for routing calls to number portable NXX codes and cannot be used for purposes other than those functions described herein.

Information residing in the Telephone Company's LNP database is protected from unauthorized access and may not be stored in a carrier's data base or elsewhere for any reason.

(3) Network Management

The Telephone Company will administer its network with the objective of the provision of acceptable service levels to all users of LNP query service.

The Telephone Company maintains the right to block traffic upon which it is assessing the Default LNP Query rate in a nondiscriminatory manner, if the processing of default queries should result in congestion or overload of its network. The Telephone Company may also block traffic received on a prearranged basis where the query volume is 125 percent or more of the forecasted busy hour level and the processing of these queries should result in congestion or overload of its network.

(D) Rate Regulations

The rates and charges associated with LNP Query Service are "query" based and will be billed on a monthly basis, based on recorded usage. Query charges will be applied by the Telephone Company based upon the recordings of carrier queries to the database. If such recordings are not available, the Telephone Company will develop monthly charges based on an average number of queries per month.

Query charges will not apply for an NXX until a TN has been ported from that NXX. After an NXX is open, Query rate element apply for each query received at the Telephone Company's database, regardless of whether or not the TN is actually ported.

Specific rates and charges are set forth in section 13.3.9(E).

ACCESS SERVICE

17. Optical Collocation and Interconnection Services to OCIS

Rates and regulations in this section are applicable to Optical Collocation and Interconnection Services ("OCIS"), and are in addition to applicable rates and regulations in other sections of this tariff and other Telephone Company tariffs. Failure to pay OCIS charges or failure to comply with the regulations, terms, and conditions specified in this tariff will give the Telephone Company the right to discontinue service as specified in this tariff and/or terminate the arrangement as provided herein.

17.1 General

Section 17 contains regulations, terms and conditions for the Telephone Company's offerings of Expanded Interconnection under Physical Collocation and Virtual Collocation arrangements for Special Access Services and for Switched Transport Services and associated services. This section does not apply to any other service offered by the Telephone Company.

OCIS provides for Serving Wire Center Physical Collocation and Expanded Interconnection of Telephone Company-provided transport facilities.

Virtual Interconnection Services (VIS) provides Virtual Collocation and Expanded Interconnection of Telephone Company-provided transport facilities.

(N)
|
(N)

The services described in this section is provided subject to availability of space and facilities in each Serving Wire Center designated in Sections 17.4.3, preceding, and 17.11.6, following.

ACCESS SERVICE

17. Optical Collocation and Interconnection Services (OCIS)

(N)

17.2 Service Description17.2.1 General

(A) OCIS is a Physical Collocation service providing for the interconnection of Telephone Company facilities and tariffed services to Interconnector-provided fiber optic Facilities and equipment which are terminated at Telephone Company Serving Wire Centers.

(B) OCIS consists of two primary components:

(1) Collocation

This provides Partitioned Space within a Serving Wire Center where Interconnector Facilities are located and terminated with Telephone Company facilities or services required to support said collocation; and

(2) Interconnection

This establishes a connection at a Telephone Company-designated Point of Interconnection.

(C) OCIS will be provided to Customers who agree to the terms set forth in this tariff and then only so long as the Interconnector adheres to the terms and conditions thereof. The Telephone Company may terminate an OCIS arrangement before its date of expiration in the event that the Interconnector is in violation of the terms of this tariff.

17.2.2 Rate Definitions

Rates for OCIS are defined in this tariff for:

(A) The establishment and maintenance of Partitioned Space, accommodation of Interconnector's facilities within a Serving Wire Center, use of conduit or other Telephone Company facilities, and Interconnector-specific requirements;

ACCESS SERVICE

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)17.2 Service Description (Cont'd)17.2.2 Rate Definitions (Cont'd)

- (B) All applicable nonrecurring and/or monthly charges for services interconnected through OCIS, unless otherwise specified in this section; and
- (C) The Electronic Cross-Connect Charge (ECC) provides for the communications path between the collocated Interconnector-provided Facilities, and the Telephone Company Serving Wire Center. The ECC will apply in lieu of the Channel Termination rate described in Section 7.1.2, or in lieu of the Switched Transport Entrance Facility Charge set forth in Section 6.1.3 (B)(1)(a). The rates for the ECC are set forth in Section 17.10.2.

17.2.3 Service Interconnection

Interconnection is offered to the following services and options (Electrical Only):

- (A) Special Access (Section 7)
 - 1.544 Mbps High Capacity Service (MercNET 1.5) (DS1)
 - MercNET 45 High Capacity Service (44.736 Mbps) (DS3)
- (B) Switched Access Feature Groups A, B and D (Section 6) (C)
 - Switched Transport:
 - Tandem-Switched Transport
 - MercNET 1.5 (DS1) Direct-Trunked Transport
 - MercNET 45 (DS3) Direct-Trunked Transport

ACCESS SERVICE

Regulations17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)17.3 General Regulations

- (A) OCIS is provided for the sole purpose of connecting Interconnector Facilities to Telephone Company facilities or services. Connection may be made only with the provisions of OCIS and only to the Point of Interconnection.
- (B) Provision of OCIS to an Interconnector does not create or vest any easements or ownership or property rights in the Interconnector.
- (C) The Interconnector may not provide or make available to any third party, any portion of space or any location within the Partitioned Space.
- (D) The provision of OCIS does not constitute a joint undertaking between the Telephone Company and Interconnector or any other party.
- (E) None of the provisions of this section apply or extend to any subscriber to service offered by the Interconnector.
- (F) The Interconnector shall be responsible for all costs associated with the rearrangement of all other parties' facilities or equipment necessary to provide access to the Partitioned Space or to accommodate the Interconnector's facilities.
- (G) The Telephone Company will not be responsible or have any obligation to provide communication or notices to any subscriber to services offered by the Interconnector. (D)

ACCESS SERVICE

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)17.3 General Regulations (Cont'd)

- (H) Upon expiration of the OCIS term or termination of OCIS in accordance with this tariff, the Interconnector shall, within thirty (30) days, and at its expense, disconnect and remove all of the Interconnector's Facilities from the Partitioned Space and from all other Telephone Company-owned or controlled areas in which the Telephone Company has allowed the Interconnector to place the Interconnector's Facilities. If the Interconnector fails to remove such facilities the Telephone Company may have the Interconnector's Facilities removed at the Interconnector's expense.
- (I) When special construction is reasonably required for the provision of OCIS, Special Construction Charges as specified in the Telephone Company's FCC Tariff No. 39, shall apply.
- (J) Allowance credits for service interruptions will be applied as specified in Section 2.4.4 of this tariff. (C)
(T)
- (K) The Telephone Company reserves the right to reclaim and reallocate Partitioned Space that an Interconnector does not begin to use for the purposes intended in this tariff within sixty (60) days after completion of the construction of the Partitioned Space.
- (L) The Telephone Company reserves the right, upon reasonable notification, to modify technical, administrative or environmental procedures as they apply to the provision of OCIS.
- (M) The Interconnector will be responsible for all nonrecurring costs incurred by the Telephone Company that are attributable to the Interconnector, and not otherwise covered by rates in this tariff, for the provision of OCIS for the Interconnector. Such costs will be calculated on a fully allocated time-and-materials basis.
- (N) Interconnector will at all times be subject to the provisions for liability, damages, and insurance as specified in Sections 2 and 17, and elsewhere in this tariff.

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)17.3 General Regulations (Cont'd)

- (O) An Interconnector may not directly interconnect to a different Interconnector's equipment or facilities.
- (P) Shared Service and Facilities arrangements are permitted with High-Capacity Expanded Interconnection and Collocation arrangements. Refer to Sections 6.7.14 and 7.4.8, preceding, for regulations regarding Shared Use. (D)
(N)
|
(N)
- (Q) The Interconnector's Partitioned Space, Conduit Space, and Cable Space will not be considered Customer Premises.
- (R) Interconnector may not construct improvements or make alterations or repairs to the Partitioned Space without the prior written approval of the Telephone Company.
- (S) OCIS is provided for a minimum term of one (1) month.
- (T) Equipment included in the Interconnector's Facilities shall be limited to equipment necessary to terminate basic transmission facilities.
- (U) The Interconnection Charge for Switched Transport as set forth in Section 6.1.3 (B)(4) will always be charged when Expanded Interconnection and Collocation arrangements for Switched Transport Services are utilized, in addition to other charges for Expanded Interconnection and Collocation. (N)

ACCESS SERVICE

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd) (S)(Y)17.4 Availability and Allocation of Assignable Space17.4.1 Initial Request For Space

(A) The Telephone Company will provide OCIS only where suitable facilities exist and then only to the extent that there exists adequate space within the Serving Wire Center for the Telephone Company to offer suitable Partitioned Space. The Telephone Company will not be liable for any claim should Partitioned Space, or any associated requirement, not be available. A listing of Serving Wire Centers where OCIS is available is found in Section 17.4.3 following.

(B) The Telephone Company is not required to purchase additional plant or equipment, relinquish space or facilities for which it has forecast a need, undertake the construction of new quarters or construct additions to existing quarters in order to satisfy an Interconnector's request for Partitioned Space or any associated requirements. In determining availability, the Telephone Company will consider and give preference to its present and foreseeable space needs.

(C) In those instances where the Telephone Company, in the exercise of its sole discretion, determines that Partitioned Space and associated requirements are available, the Telephone Company will permit the Interconnector to occupy Partitioned Space and will provide conduit or an equivalent path for Interconnector's Facilities. A maximum of 200 square feet of Partitioned Space per Serving Wire Center will be available to each Interconnector. The Telephone Company will designate the floor space within each Serving Wire Center which will constitute the Interconnector's Partitioned Space. Rates shown in Section 17.10.2 are for a 100-square-foot Partitioned Space. Upon request, Partitioned Spaces for less than 100 square feet can be negotiated on an Individual Case Basis (ICB). Such agreements will then be tariffed and become generally available. (S)(Y)

ACCESS SERVICE

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd) (N)17.4 Availability and Allocation of Assignable Space (Cont'd)17.4.1 Initial Request For Space (Cont'd)

- (D) If space is not available for Physical Collocation, the Telephone Company will make reasonable efforts to negotiate a mutually agreeable Virtual Collocation arrangement with the Interconnector on an Individual Case Basis (ICB) only.
- (E) Interconnection of microwave transmission facilities will be negotiated between the Telephone Company and the Interconnector only on an Individual Case Basis (ICB).
- (F) Access to the Partitioned Space shall be provided subject to the terms and conditions contained in this tariff, including, but not limited to, the Interconnector's compliance with the Telephone Company's policies regarding fire protection, safety and security
- (G) The Interconnector will provide the Telephone Company with access to the Partitioned Space to allow the Telephone Company to react to emergencies, provide services, and inspect for compliance with fire, safety, health, or other regulations or standards.
- (H) In the event of a Telephone Company work stoppage, the Interconnector will comply with Telephone Company operating procedures regarding security as set forth in Section 17.8.
- (I) The Telephone Company reserves the right to move the Interconnector to a reasonably equivalent Partitioned Space or to reclaim Partitioned Space or other Telephone Company facility, or any portion thereof, for good cause. When the move is at the request of the Telephone Company, the Telephone Company will be responsible for the costs associated with the removal, transportation, and reinstallation of the Interconnector's equipment and the preparation of the new (replacement) Partitioned Space at the new location. (D) Interconnector Facilities to be interconnected to the Point of Interconnection shall be provided using standard electrical interface levels of 1.544 Mbps or 44.736 Mbps on channels that meet the technical description of the interface as specified in the Bellcore publication for High Capacity Digital Special Access Service (TR-INS-000342) and Bellcore Fundamental Generic Requirements for Digital Signal Cross-Connect Systems DSX-1, 1C, 2, and 3 (TR-NPL-000320). The Interconnector is responsible for optical-to-electrical conversions, speed conversions, multiplexing, or any other change(s) required to connect Interconnector Facilities to Telephone Company equipment and facilities at compatible interfaces, levels or speeds.

(E) The Telephone Company will provide 48V DC Power from a power board or Battery Distribution Fuse Board (BDFB) fuse position. The Telephone Company will run battery and ground return circuits to the Partitioned Space and mark them as "battery" and "ground return". The Telephone Company will run a frame ground cable from the nearest central office ground bar on the same floor as the Partitioned Space, to the Partitioned Space and mark it as "frame ground". Battery, ground return and frame ground cables will be of the same insulation type as used in all Telephone Company DC Power circuits. Cable sizes will be determined by fuse size and length of the cable run, as in Telephone Company power Circuits. The Interconnector is responsible for connecting the power circuits to its fuse panels, and connecting the frame ground to its equipment bays. The Telephone Company will make connections at the power board, BDFB, and central office ground bar.

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd) (N)17.5 Network Compatibility and Standards (Cont'd)

- (F) The Interconnector is responsible for ensuring continued technical compatibility of Interconnector Facilities with the Telephone Company network. When changes in standards occur or differences exist between technical references, as defined in this tariff, the Interconnector shall follow the standards the Telephone Company specifies.
- (G) The Telephone Company may conduct Periodic Inspections and Subsequent Inspections. If at any time the Telephone Company reasonably determines that Interconnector Facilities do not meet the standards specified or identified in this tariff, the Interconnector shall be responsible for bringing such facilities into compliance with the standards within thirty (30) days, and for the costs associated with the modification, removal or re-installation of the Interconnector Facilities required to render them in compliance with the referenced standards.
- (H) The Interconnector will work cooperatively with the Telephone Company, on an as-needed basis, to forecast the Interconnector's use of Telephone Company facilities. (N)

ACCESS SERVICE

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)17.6 Service Requests and Provisioning17.6.1 Requests for Service and Construction of the Partitioned Space

- (A) To apply for OCIS, an Interconnector must send a letter with the details of its request (the "Application") and an Application Fee to:

Director-Intermediary Marketing
Cincinnati Bell Telephone Co.
201 East Fourth St. Room 102-920
Cincinnati, Ohio 45202

Each application for collocation at a Serving Wire Center must contain at least the following information to be considered a "completed" application:

- The Serving Wire Center(s) where OCIS is requested.
- The amount of Partitioned Space requested.
- DC Power requirements.
- Environmental requirements.
- Requested completion date.
- One-year Forecast of DS1 and DS3 Cross-Connects

Applications will be processed on a First-Come, First-Served basis upon receipt of both the completed application and the Application Fee specified in Section 17.6.1(B), below. (T) (T)

- (B) An Application Fee of \$7,500.00 will be required per collocation request, per Serving Wire Center. The application fee is not a deposit. If space is unavailable for Physical Collocation or an Interconnector withdraws its request after the Telephone Company has notified the Interconnector that adequate space and associated requirements are available, the application

fee, less the costs the Telephone Company has incurred, will be refunded to the Interconnector. The Telephone Company's costs include, but are not limited to the Pre-Construction Survey costs. If the Interconnector orders OCIS, the application fee paid, less the costs the Telephone Company incurs, will be applied against the Partitioned Space Design & Construction nonrecurring charge shown in Section 17.10.2. Costs the Telephone Company incurs in connection with the Interconnector's application in excess of \$7,500.00 will be borne by the Interconnector.

(C) The Telephone Company will conduct a Pre-Construction Survey for each application and notify the Interconnector as to the availability of space and associated requirements within fourteen (14) Business Days of receipt of the completed application and Application Fee.

(D) Following the Pre-Construction Survey, if adequate space and associated requirements are available for Physical Collocation, the Telephone Company will begin further processing of the application and will work cooperatively with the Interconnector to develop an optimal equipment layout for the Partitioned Space. The Telephone Company and the Interconnector will negotiate with the purpose of obtaining a mutually acceptable arrangement.

(E) The Interconnector shall provide the Telephone Company with all information necessary for the Telephone Company to develop architectural, mechanical, electrical, structural or other plans to complete construction of the Partitioned Space. When the Interconnector and the Telephone Company have jointly approved the plans, the Telephone Company will make reasonable efforts to construct the Partitioned Space within forty-five (45) Business Days after the Telephone Company receives all necessary building and other permits. The Partitioned Space will be constructed based upon the approved plans. (N)

The Interconnector will meet with the Telephone Company, as needed, to review Design and Construction work. Construction shall conform with all of the Telephone Company's applicable standards (including but not limited to health, safety and security standards) within a central office environment and with all applicable federal, state and local building codes and other requirements.

(F) The first Interconnector Physically Collocating in a Serving Wire Center will be responsible for the "Building Preparation Design and Construction" charge, which includes all costs the Telephone Company incurs associated with modifying a Serving Wire Center to provide Physical Collocation for Interconnectors. These costs include, but are not limited to general construction, mechanical and environmental work, electrical work, card access and security system work, and architectural and engineering fees. Subsequent Interconnectors must pay a prorated fee based on the number of Interconnectors collocating at the particular Serving Wire Center, and a prorated share will be refunded to earlier Interconnectors. The rates for each Serving Wire Center are set forth in Section 17.10.2.

(G) Upon occupancy of the Partitioned Space, Interconnector requests for OCIS connections to the Telephone Company's facilities and tariffed services will be processed using standard ordering procedures.

(H) OCIS shall be provided by connecting Interconnector Facilities to Telephone Company facilities through the Point of Interconnection as defined herein, unless modified for good cause.

(I) The Telephone Company may prohibit all equipment and facilities, other than cable, from its Manholes. No splicing will be permitted in the Manhole. The Telephone Company shall specify the point of

attachment on each Manhole wall. Interconnector must receive authorization from the Telephone Company before opening Manholes or conducting work therein. Interconnector is also responsible for obtaining all necessary governmental or regulatory permits pertaining to entering and working in Manholes before entering or working in such Manholes.

17.6.2 Work Outside Partitioned Space

(A) For all Interconnector work efforts or installations in Telephone Company conduit systems, in Serving Wire Center space outside the Partitioned Space, or other Telephone Company locations used by other parties, the Telephone Company may:

- (1) Require, at the Telephone Company's sole discretion, a Telephone Company-provided Security Escort Service chargeable to the Interconnector at rates set forth in Section 13.2.6(B).
- (2) Prohibit the placement of any or all equipment or facilities other than cable in Telephone Company-owned or controlled areas;
- (3) Designate the location of cable splices or equipment;
- (4) Approve all installations;
- (5) Require the Interconnector to obtain any necessary rights-of-way or other permits; and
- (6) Conduct and charge the Interconnector for Post-Installation Inspections at rates set forth in Section 13.1.1.

- (B) At the Telephone Company's option, the Telephone Company may provide facilities or equipment, including, but not limited to, conduit, riser supports, racking and termination frames, in such a fashion that the facilities or equipment are shared or used in common with other parties. Dedicated or special arrangements may result in additional charges.

17.6.3 Obligations of the Interconnector

- (A) The Interconnector is responsible for providing and bringing its fiber optic cable to the Serving Wire Center Manhole or other Telephone Company-designated location and providing sufficient cable length to extend the cable into the Serving Wire Center Cable Vault. The Telephone Company shall designate the particular duct(s) or inner duct(s) the Interconnector's cable will occupy.
- (B) The Interconnector will extend its fiber optic cable from the Manhole or other designated location into the Serving Wire Center Cable Vault and splice the cable to the Interconnector-provided fire-retardant riser cable. The Interconnector shall provide a secure dedicated fire-retardant splice enclosure and shall tag all facilities to indicate ownership. The charges for the occupancy of the Conduit Space are set forth in Section 17.10.2.
- (C) The Interconnector shall provide fire-retardant fiber optic riser cable of sufficient length, jointly determined by the Telephone Company and the Interconnector, to extend from the Cable Vault to the designated Partitioned Space.
- (D) The Interconnector will pull the Interconnector-provided fiber-optic riser cable through the Serving Wire Center and deliver it to the Partitioned Space. The Telephone Company will be responsible for providing Cable Space at the rates set forth in Section 17.10.2. (N)

Maintenance17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)

(N)

17.7 Maintenance of Services

- (A) The use of OCIS and its restoration after a service interruption shall be in accordance with Section 2 of this tariff. To meet emergency requirements, the Telephone Company may rearrange conduit, manhole, cable entrances, riser system or other Telephone Company facilities occupied by the Interconnector's Facilities. The Telephone Company will make reasonable efforts to notify the Interconnector prior to any such rearrangements. If an emergency is caused by an act or omission of the Interconnector or by Interconnector Facilities, such rearrangement will be at the Interconnector's expense.
- (B) Except as provided in Section 17.6 of this tariff, the Interconnector will be responsible for providing, installing, testing and isolating trouble, maintaining, and repairing its fiber optic cable(s), other cable(s), cable splices and any other associated equipment located in a Serving Wire Center, Manhole, Telephone Company conduit system or other Telephone Company facility; and providing, installing, testing and isolating trouble, maintaining and repairing its equipment located in the Partitioned Space, Serving Wire Center or other Telephone Company location. In addition, the Interconnector will be responsible for monitoring the performance of all Interconnector Facilities on the Interconnector's side of the Point of Interconnection, and reporting failures of Telephone Company services to the Telephone Company. The Interconnector is responsible for the initial testing to isolate trouble. Should the Telephone Company require assistance in isolating trouble between the Interconnector's Facilities and the Telephone Company network, the Interconnector will cooperatively test with the Telephone Company, as required.

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd) (N)17.8 Security Requirements and Arrangements

- (A) The Telephone Company will permit the Interconnector's employees, agents and contractors approved by the Telephone Company (such approval will not be unreasonably withheld) to have access to the areas within the Serving Wire Centers where the Interconnector's Facilities are located. Access to such areas where card readers are required will be permitted at reasonable times as requested by the Interconnector. Access to areas where a Telephone Company Security Escort is required will be permitted with reasonable notification to the Telephone Company. Interconnector must receive authorization from the Telephone Company before opening Manholes or conducting work therein.
- (B) Interconnector agrees to abide by all Telephone Company security policies and procedures for non-Telephone Company personnel access to Telephone Company Serving Wire Centers. The Telephone Company will provide a copy of such security policies and procedures to each Interconnector. Any violation of this Section shall be deemed a material violation of this tariff, for which the Telephone Company may exercise any and all rights and remedies available to it, including but not limited to termination of OCIS to the Interconnector.
- (C) At the time the Interconnector places the order for OCIS, the Interconnector shall supply the Telephone Company with a list of those persons who require access and the locations where access is requested. The list will include social security numbers of all such individuals and a password or other verification factor (such as mother's maiden name). No former employee of the Telephone Company will be given access to Telephone Company Serving Wire Centers by the Interconnector without the expressed written approval of the Telephone Company's Director of Security.
- (D) The Telephone Company will issue non-employee photo identification cards for each Interconnector employee listed in accordance with Section 17.8(C), above at the rate specified in Section 17.10.3. These cards will permit access to the Interconnector's

Partitioned Space. The Interconnector must return all access cards to the Telephone Company upon termination of the Collocation arrangement. Interconnector will be charged a fee as shown in Section 17.10.3 for lost or unrecovered cards.

(E) The Interconnector's employees, agents, and contractors must display identification cards at all times while on Telephone Company premises.

(F) The Telephone Company will provide access cards to those persons the Telephone Company approves for access. The Telephone Company may at all times reasonably limit the number of access cards issued. Rates for the access cards are set forth in Section 17.10.3.

(G) The Interconnector must notify the Telephone Company when a security-approved person is no longer in its employ, and when its agents and contractors whose authority to have access to Telephone Company Serving Wire Centers has been revoked. The Interconnector must return all access cards of such persons to the Telephone Company. The Interconnector will be charged the fee set forth in Section 17.10.3 for access cards not returned to the Telephone Company.

(H) Interconnector's employees, agents, and contractors may be restricted to a specific access route, designated by the Telephone Company, from the designated Serving Wire Center exterior door to the Partitioned Space. Interconnector's employees, agents, and contractors will not be permitted in any other Telephone Company area unless accompanied by an authorized Telephone Company representative or unless otherwise authorized by the Telephone Company.

(I) If Interconnector requires Security Escort access after normal Telephone Company working hours, on weekends or on holidays, Interconnector will give reasonable notification to the Telephone Company.

- (J) During the construction of the Interconnector's Partitioned Space and installation of Interconnector Facilities, or for subsequent maintenance thereof, Interconnector will have access to its Partitioned Space and to any room or area reasonably required by the Interconnector for such installation or maintenance. Interconnector may be escorted in areas outside its Partitioned Space by authorized Telephone Company employees on such occasions.
- (K) In the event of either Telephone Company or Interconnector work stoppages, separate entrances will be established for Interconnector, where possible, to assure that one party's work stoppage does not impinge upon other parties' normal work operations. Failure to provide such separate entrances shall not render the Telephone Company liable for any claim for damages. The Interconnector will notify the Telephone Company as soon as reasonably practical, first by telephone, followed by written confirmation, of any work stoppages by the Interconnector's employees or agents. Such notifications should be made to the Telephone Company's Director of Security.
- (L) The Telephone Company may deny security clearance to those persons who do not meet the Telephone Company's established security standards.
- (M) The Telephone Company may withdraw or cancel security clearance for those persons who falsify records or violate fire, safety, security, or other Telephone Company practices or policies.

- (C) In no event shall the Telephone Company or any of its directors, officers or employees or agents be liable for any loss of profit or revenue by Interconnector or for any loss of AC or DC Power, heating, ventilation and air conditioning interruptions, consequential, incidental, special, punitive or exemplary damages incurred or suffered by Interconnector, even if the Telephone Company has been advised of the possibility of such loss or damage. Interconnector shall indemnify, defend, and hold harmless the Telephone Company, its directors, officers and employees, servants, agents, affiliates and parent, from and against any and all claims, cost, expenses or liability arising out of Interconnector's installation and operation of its Facilities and equipment within the Partitioned Space.
- (D) Interconnector represents, warrants and covenants that it shall not cause or permit any other party to cause any environmental conditions in, at or affecting the Serving Wire Center which violate any Federal, state or local law, ordinance, rule or regulation. Interconnector shall indemnify, defend, and hold harmless the Telephone Company from and against any and all liability, damage, claim or cost of any kind, including reasonable attorneys' fees, resulting from or arising out of any breach of the foregoing sentence. 17. Optical Collocation and Interconnection Services (OCIS) (Cont'd) (N)17.10 Rate Element Descriptions, Rates and Charges17.10.1 Rate Element Descriptions

This section contains the specific regulations governing the rates and charges applicable to OCIS.

(A) Application Fee

An Application Fee is a charge associated with each request for Partitioned Space in each Serving Wire Center more particularly described in Section 17.6.1(B).

(B) Partitioned Space Design and Construction

A nonrecurring charge per 100 square-foot area enclosed by a steel wire cage to provide an Interconnector Partitioned Space as defined in Section 2.6. Rates for construction other than steel caging (such as drywall) will be considered "Additional Design and Construction" and will be charged to the Interconnector on an Individual Case Basis (ICB).

(C) Electronic Cross-Connect Charge (ECC)

The rate, per DS1 or DS3 termination, for connecting Interconnector Facilities to Telephone Company Facilities. The rates include the cable and other facilities and equipment provided by the Telephone Company necessary to provide the connection.

(D) Building Preparation Design and Construction

The nonrecurring charge, per Serving Wire Center, for the Serving Wire Center modifications described in Section 17.6.1(F) required to provide Physical Collocation. This charge will be prorated as specified in Section 17.6.1.(F).

17.10 Rate Element Descriptions, Rates and Charges (Cont'd)17.10.1 Rate Element Descriptions(E) Partitioned Space

The monthly recurring rate, per square foot, per Serving Wire Center, for the Interconnector's use of the Partitioned Space. The rate includes the items specified in Section 17.6.4(B).

(F) Cable Space

The monthly rates (per foot) for the Interconnector's use of Cable Space.

(G) Conduit Space

The monthly rates (per duct-foot) for the Interconnector's use of Conduit Space.

(H) D.C. Power |

The monthly rate, per AMP for the Interconnector's usage of D.C. Power.

(I) Security Access Card

The charge, per access card, to provide an Interconnector access to Serving Wire Center areas, as specified in Section 17.8.

(J) Filing Fee |

This charge (per filing) recovers the costs the Telephone Company incurs to file tariff changes resulting from an Interconnector's request to add Serving Wire Center(s) to the list shown in Section 17.4.3.

(K) Security Escort Service

Where card access is not available, Telephone Company personnel may be required to accompany the Interconnector's employees, agents, or contractors to the Interconnector's Partitioned Space or other area(s) within the Serving Wire Center.

17.11 Virtual Interconnection Services (VIS)17.11.1 General

Virtual Interconnection Service (VIS), following, is available in offices specifies in Section 17.11.6. VIS provides the means to interconnect to specifies inter-state Switched Access and/or Special Access services (see Section 17.11.3 following). VIS provides:

- (a) connection between Interconnector-provided and Telephone Company-provided fiber optic transport facilities at a Point of Interconnection and,
- (b) interconnection of Interconnector-provided fiber optic transport facilities and Interconnector-designated optical terminating equipment with other specifies interstate Telephone Company services.

The Cross-Connection Service for Interconnection described in Section 17.11.2 following must be used in conjunction with VIS to cross-connect the electrical signals (see (b) above) to Telephone Company Switched Access and/or Special Access services.

VIS permits the Interconnector, subject to terms mutually acceptable to the Telephone Company and the Interconnector to:

- (a) specify the optical terminating and other transmission equipment necessary to terminate the Interconnector's facilities and circuits, which equipment may be different from the equipment normally used by the Telephone Company to provide interstate Switched Access and/or Special Access services. Such equipment is restricted to the standards set forth in 17.11.7.
- (b) assume certain additional responsibilities and privileges relates to engineering, provisioning, monitoring, and remote control of such facilities and their configuration.

ACCESS SERVICE

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)

(N)

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.1 General

The Telephone Company will not accept any new applications for Physical Collocation arrangements, but will, at the discretion of the Interconnector, proceed with the implementation until the end of December 14, 1994. The Telephone Company will not provide any changes, additions, moves, or arrangements of existing Partitioned Space under Physical Collocation.

The Telephone Company will provide service for all firm orders for Physical Collocation received prior to June 11, 1994. In addition, all existing Physically Collocated arrangements will begin transitioning to Virtual Interconnection Service (i.e., Virtual Collocation) commencing December 15, 1994, through June 30, 1995.

Regulations described herein are in addition to the general regulations specified in Section 2 and elsewhere in this tariff.

The Telephone Company is responsible for providing the Interconnector-designated basic optical terminating transmission equipment necessary to terminate the Interconnector's facilities and circuits, and the installation and maintenance of such equipment and related fiber optic facilities, except as noted in this tariff, between the Point of Interconnection and the Telephone Company Wire Center used to provide VIS to the Interconnector.

17. Optical Collocation and Interconnection Services (OCIS) (Cont'd)17.11 Virtual Interconnection Service (VIS) (Cont'd)17.11.2 Service Functions

Rates for VIS are defined in this tariff for:

- (A) The installation, maintenance, and repair of the Interconnector-designated optical terminating transmission equipment and the related Telephone Company-provided fiber optic facilities necessary to provide Virtual Collocation/Interconnection pursuant to Section 17.11.
- (B) All applicable nonrecurring and/or monthly charges for services interconnected through VIS, unless otherwise specified in this section; and
- (C) The Virtual Electronic Cross-Connect Charge (VECC) provides for the communications path between the Interconnector-designated equipment and Interconnector facilities, and the Telephone Company services set forth in 17.11.3 below, within the same Serving Wire Center. The VECC will apply in lieu of the Channel Termination rate described in Section 7.1.2, or in lieu of the Switched Transport Entrance Facility Charge set forth in Section 6.1.3 (B)(1)(a). The rates for the VECC are set forth in Section 17.11.13.

17.11.3 Service Interconnection

Interconnection is offered to the following services and options (Electrical Only):

(A) Special Access (Section 7)

- 1.544 Mbps High Capacity Service (MercNET 1.5) (DS1)
- 44.736 Mbps High Capacity Service (MercNET 45) (DS3)

(B) Switched Access Feature Groups A, B and D (Section 6)

(C)

Switched Transport:

- Tandem-Switched Transport
- MercNET 1.5 (DS1) Direct-Trunked Transport
- MercNET 45 (DS3) Direct-Trunked Transport

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.4 General Regulations

- (A) VIS is provided for the sole purpose of connecting Interconnector Facilities to Telephone Company facilities or services. Connection may be made only under the provisions of VIS and only to the Point of Interconnection.
- (B) The provision of VIS does not constitute a joint undertaking between the Telephone Company and the Interconnector or any other party.
- (C) None of the provisions of this Section apply or extend to any subscriber to service offered by the Interconnector.
- (D) The Telephone Company will not be responsible or have any obligation to provide communication or notices to any subscriber to services offered by the Interconnector.
- (E) When special construction is reasonably required for the provision of VIS, Special Construction Charges as specified in the Telephone Company's FCC Tariff No. 39, shall apply.
- (F) Credit allowances for service interruptions will be applied as specified in Section 2.4.4 of this tariff.
- (G) The Telephone Company reserves the right, upon reasonable notification, to modify technical, administrative or environmental procedures as they apply to the provision of VIS.
- (H) The Interconnector will be responsible for all non-recurring costs incurred by the Telephone Company that are attributable to the Interconnector, and not otherwise covered by rates in this tariff, for the provision of VIS for the Interconnector. Such costs will be calculated on a fully allocated time-and-materials basis.

(N)

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.5.1 Ordering Procedures for Virtual Interconnection Services (VIS)

- (A) To apply for VIS, an Interconnector must send a letter with the details of its request (the "Application") and an Application Fee to:

Director-Intermediary Marketing
Cincinnati Bell Telephone Co.
201 East Fourth St. Room 102-920
Cincinnati, Ohio 45202

Each application for VIS at a Serving Wire Center must contain at least the following information to be considered a "completed" application:

- The Serving Wire Center(s) where VIS is requested.
- Types of Equipment
- Requested completion date.
- One-year Forecast of DS1 and DS3 Cross-Connects

Applications will be processed on a First-Come, First-Served basis upon receipt of both the completed application and the Application Fee specified in Section 17.11.5.1(B), below.

- (B) An Application Fee of \$5,000.00 will be required per collocation request, per Serving Wire Center. The application fee is an advance payment and not a deposit. If the Telephone Company is not able to provide Virtual Interconnection Service, or an Interconnector withdraws its request after the Telephone Company has notified the Interconnector that VIS is available, the application fee, less the costs the Telephone Company has incurred, will be refunded to the Interconnector. If the Interconnector orders VIS, the application fee paid, less the costs the Telephone Company incurs, will be applied against the nonrecurring charges shown in Section 17.11.13. Costs the Telephone Company incurs in connection with the Interconnector's application in excess of \$5,000.00 will be borne by the Interconnector.

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.7 Network Compatibility and Standards

- (A) The operating characteristics of the Interconnector's Facilities and Interconnector-designated equipment shall not interfere with the Telephone Company's or another Interconnector's or another party's facilities or services, and shall not:
- (1) Endanger the safety of Telephone Company employees, other Interconnectors or the public;
 - (2) Damage or require change or alteration of Telephone Company equipment or facilities;
 - (3) Interfere with the proper functioning of Telephone Company equipment or facilities; or
 - (4) Impair the operation of the Telephone Company network or otherwise injure any party in its use of Telephone Company services.

The Telephone Company may, with or without notice to the Interconnector, disconnect any Interconnector's Facilities which, in the Telephone Company's sole judgement, are in violation of the provisions in Section 17.11.7.

- (B) Upon the request of the Telephone Company, the Interconnector shall provide the Telephone Company with documents and specifications defining the environmental and transmission standards of the Interconnector's Facilities and Interconnector-designated equipment to be located within the Telephone Company's Wire Center and facilities.
- (C) The Interconnector-designated equipment and the Interconnector's Facilities shall meet the Telephone Company's environmental, safety and transmission standards as in effect at the time of equipment installation and as thereafter modified and shall comply with the most recent issues of the following:

* Bellcore Network Equipment Building System Generic Equipment Requirements (TR-NWT-000063);

(N)

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.8 Obligations of the Interconnector

- (A) The Interconnector is responsible for providing fiber optic cable to the Serving Wire Center Manhole or other Telephone Company-designated location and providing sufficient cable length to extend the cable into the Serving Wire Center Cable Vault. The Interconnector is responsible for maintaining the Interconnector-provided cable. The Interconnector is responsible for providing replacement cable as such cable degrades.
- (B) The Interconnector is responsible for designating the basic optical terminating transmission equipment, including optical line terminating equipment, terminating multiplexers, and Data-Over-Voice (DOV) equipment, dedicated to the exclusive use of the Interconnector. Such equipment must meet the network compatibility and standards set forth in Section 17.11.7. The Interconnector shall be responsible for ordering sufficient quantities of maintenance spares to allow the Telephone Company to maintain and repair the Interconnector-designated equipment under the same time intervals and with the same failure rates as the Telephone Company applies to its comparable equipment.
- (C) The Interconnector will be responsible for payment of all reasonable costs incurred by the Telephone Company resulting from the Interconnector's choice of equipment. The costs include, but are not limited to, the training of Telephone company employees for the installation, maintenance, repair, and operation of the Interconnector's designated equipment if the designated equipment is different from the equipment the Telephone Company uses in the particular Wire Center.
- (D) The Interconnector may remotely monitor and control the Interconnector-designated equipment and its circuits that terminate on such equipment.

(N)

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.9 Obligations of the Telephone Company

- (A) The Telephone Company will extend the Interconnector-provided fiber optic cable from the Manhole or other Telephone Company-designated location into the Cable Vault of the Telephone Company's Dire Center and splice the cable to the Telephone Company-provided fire-retardant riser cable. The Telephone Company shall designate the particular duct(s) or inner duct(s) the Interconnector's cable will occupy. The Telephone Company will provide a secure dedicated fire-retardant splice enclosure. The charges for the occupancy of the Conduit Space are set forth in Section 17.11.13.
- (B) The Telephone Company will provide fire-retardant fiber optic riser cable of sufficient length to extend from the Cable Vault to the LGX Panel and the Interconnector-designated transmission equipment.
- (C) The Telephone Company will pull the fiber-optic riser cable through the Wire Center and deliver it to the LGX Panel. The Telephone Company will provide the riser cable and Cable Space at the rates set forth in Section 17.11.13.
- (D) The Telephone Company will purchase, own or lease, and install, maintain and repair the Interconnector-designated optical terminating transmission equipment. The Telephone Company will install, maintain, and repair such equipment to at least the same standards as the Telephone Company performs these functions on its own comparable equipment, when feasible or except as negotiated with the Interconnector. The Telephone Company will designate the location within the Wire Center for placement of such equipment. Rates pertaining to such equipment are set forth in Section 17.11.13.
- (E) The Telephone Company will connect the Interconnector-designated equipment to the Virtual Electronic Cross-Connect for interconnection with the Telephone Company services set forth in Section 17.11.3.

(N)

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.9 Obligations of the Telephone Company (Cont'd)

- (F) Provided space is available for new facilities at each cable entrance, whenever a Serving Wire Center has two (2) separate cable entrance facilities for Telephone Company cable, the Telephone Company will permit the Interconnector to use the two (2) cable entrance facilities, if the Interconnector requests such an arrangement. Rates set forth in Section 17.11.13 shall apply.
- (G) At the Telephone Company's option, the Telephone Company may provide facilities or equipment, including, but not limited to, conduit, riser supports, racking and termination frames, in such a fashion that the facilities or equipment are shared or used in common with other parties. Dedicated or special arrangements may result in additional charges.

(N)

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.10 Maintenance of Services

- (A) The use of VIS and its restoration after a service interruption shall be in accordance with Section 2 of this tariff. To meet emergency requirements, the Telephone Company may rearrange conduit, Manhole, cable entrances, riser system or other Telephone Company facilities. If an emergency is caused by an act or omission of the Interconnector or by Interconnector Facilities, such rearrangement will be at the Interconnector's expense.
- (B) The Interconnector will be responsible for providing, installing, testing and isolating trouble, maintaining, and repairing its fiber optic cable(s), other cable(s), cable splices and any other associated equipment located on the Interconnector's side of the Point of Interconnection. The Interconnector is also responsible for maintaining the Interconnector-provided fiber optic cable described in Section 17.11.8(A). The Telephone Company will not be responsible for any degradation of such cable, and the Interconnector is responsible for providing replacement cable, if necessary. In addition, the Interconnector will be responsible for monitoring the performance of all Interconnector Facilities on the Interconnector's side of the Point of Interconnection, and reporting failures of Telephone Company services to the Telephone Company. The Interconnector is responsible for the initial testing to isolate trouble. Should the Telephone Company require assistance in isolating trouble between the Interconnector's Facilities and facilities on the Telephone Company's side of the Point of Interconnection facilities, the Interconnector will cooperatively test with the Telephone Company, as required.

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.12 Rate Categories and Descriptions

Some rates and charges are contingent upon the Interconnector and the Telephone Company having mutually agreed to the Interconnector designating specific equipment as described in Section 17.11.9, preceding.

There an Interconnector and the Telephone Company mutually agree upon different equipment and/or different terms and conditions, new rates and charges will be developed and tarified herein as set forth in Section 17.11.5.1.

The Rate Categories for VIS include:

1. Application Fee
2. Fiber Optic Facilities (Optical Line)
3. Equipment Bay
4. Optical Line Terminating Multiplexer (OLTM) system
5. OLTM Channel Plug-ins
6. Digital Cross-Connection Panel (DSX Panel)
7. Test Equipment and Maintenance Spare Plug-ins

(A) Application Fee

The Application Fee provides for the processing of the service order associated with each request for VIS in each Serving Wire Center. The Application Fee is a nonrecurring charge more particularly described in Section 17.11.5.1(B).

17.11.12 Rate Categories and Descriptions (Cont'd)

(B) Optical Line - the optical line comprises six rate elements:

- (1) The Conduit Space consists of the conduit space for the Interconnector-provided fiber optic cable from the Point of Interconnection outside the wire Center to a splice location in the Wire Center Cable Vault.
- (2) The Riser Cable Space consists of the use of the Cable Space from the Cable Vault to an LGX Panel at the Interconnector-designated equipment.
- (3) The Cable Vault Splicing consists of the actual fusion splicing of the Interconnector-provided fiber to the Telephone Company-provided fire-retardant riser cable in the Cable Vault.
- (4) Splice Testing is the testing of the fusion splice(s) in the Cable Vault.
- (5) Cable Pulling from the Serving Wire Center Manhole to the Cable Vault consists of the time and labor necessary for a technician to pull the Interconnector-provided fiber optic cable through the Conduit Space.
- (6) Riser Cable and Termination includes the time and labor necessary for a technician to pull the riser cable from the Cable Vault through the Riser Cable Space. The riser cable and the termination of the riser cable on the LGX Panel are included. A 24-fiber pre-terminated shelf is included.

(C) Equipment Bay

The Equipment Bay provides mounting space for OLTM shelves and fuse panel. Each bay includes the 7 foot bay, its installation, all necessary environmental supports such as floor space, heat, lighting, etc. and 48-volt DC power. Mounting space on the bay, including space for the fuse panel and air gaps necessary for heat dissipation is limited to 78 inches. Physical dimensions of shelves are listed with the OLTM common equipment to be mounted on the bay.

(D) Optical Line Terminating Multiplexer (OLTM) System

The OLTM System includes all necessary common equipment shelves and associated wiring, common equipment plug-ins, fiber optic, coastal and twisted-pair cabling, and fiber cross-connect jumpers, including fixed attenuators, to establish an optical system. System capacity and configurations vary according to the type of equipment installed. The following configuration is available:

- (1) AT&T DDM-2000, OC-12, 622 Megabit Per Second (Mbps)

This SONET OLTM provides twelve DS3 channels and channels and occupies 23 inches of equipment space.

(E) AT&T DDM-2000, OC-12, 622 Mbps Channel Plug-Ins

Channel Plug-ins provide DS3 (44.736 Mbps) channels. One 3DS3 channel plug-in is required for the triple DS3 function unit to provide three of the possible twelve DS3 channels. AT&T DDM-2000 documentation displays two of the triple DS3 function units equipped with the 3DS3 plug-ins for the initial turn-up and fully populating the remaining two function units when additional channels are needed.

Technical Specifications for DS3 signal format is as specified for DS3 service as described in Section 7.2.9, preceding.

(N)

17.11 Virtual Interconnection Services (VIS) (Cont'd)17.11.12 Rate Categories and Descriptions (Cont'd)

(F) Digital Cross-Connection Panel

The Digital Cross-Connection (DSX) Panel provides a termination field for DS1 or DS3 OLTM derived channels from which cross-connections for Virtual Interconnection Service (VIS) may be made. For DS3 channels requested in the OLTM System configuration, one DSX-3 panel is required for each 18 DS3 channels. For DS1 channels requested in the OLTM System configuration, one DSX-1 panel is required for each 56 DS1 channels.

Cross-Connections for Virtual Interconnection Service (VIS) provide for the connection of Interconnector-provided 1.544 Mbps and 44.736 Mbps channels to specified Telephone Company interstate Switched Access and/or Special Access services.

Interconnectors may cross-connect their channels to the Telephone Company services set forth in Section 17.11.3, preceding.

(G) Test Equipment and Maintenance Spare Equipment

Test equipment consists of a Craft Interface Terminal Unit (terminal), cart-mounted and equipped with a connector cord compatible with the OLTM. The terminal will be located in a Telephone Company Wire Center and will be used exclusively for cooperative VIS testing with the Interconnector.

Maintenance Spare Equipment consists of an OLTM shelf installed, but not wired, in an equipment bay for storage of spare OLTM plug-ins, and placement and storage of maintenance spare plug-in units within the OLTM storage shelf. The Interconnector must order sufficient OLTM storage shelf capacity for the quantity and type of maintenance spare plug-ins ordered.

ACCESS SERVICE

18. LAN Advantage Frame RelaySM Service18.1 Service Description

LAN Advantage Frame RelaySM Service known as Frame Relay is a packet network that permits the transmission of data at speeds of 56 Kbps, 64 Kbps, 112 Kbps, 128 Kbps, 192 Kbps, 256 Kbps, 320 Kbps, 384 Kbps, 512 Kbps, 768 Kbps and 1.536 Mbps using Permanent Virtual Connections (PVCs). (C)

PVCs refers to as a permanent, software defined communication path established through a frame or packet network. The connection is analogous to a dedicated wire route. Frames or packets are routed through the connections.

When in operation, customer premises equipment (CPE), such as routers, encapsulate arriving data into variable length frames. These frames contain information identifying which PVC in the network should be used to forward the frame to the proper destination. The CPE then sends the frame into the Frame Relay network. The Frame Relay Switch reads identifying the information routes the frame to the proper destination based on a pre-established PVC.

Frame Relay Service conforms to Consultative Committee for International Telegraph and Telephone (CCITT) and American National Standards Institute (ANSI) publications T1.602, T1.606, T1.617, and T1.618.

18.2 Service Provisioning

LAN Advantage Frame RelaySM Service known as Frame Relay is a transport service that facilitates the exchange of variable length information units (frames) between end customer connections by way of assigned Permanent Virtual connections (PVCs).

Frame Relay also ensures network efficiency by means of the Committed Information Rate (CIR). Frame Relay is offered at CIR using 0% to 100% of the physical interface speed. The CIR specifies the percentage of the physical rate that is guaranteed to go through the network. CIR at 100% means that all traffic sent to the network is guaranteed to go through the network. The other is marked as Discard Eligible and will be sent through the network as space is available. CIR at 0% means that all data transmitted to the network is relying on the extra space available in the network. Because of the nature of data traffic, space will general become available, but it may take some retransmission over the network.

(This page filed under Transmittal No. 741)

Issued: October 11, 1999

Effective: October 26, 1999

Senior Vice President
201 East Fourth Street
Cincinnati, Ohio 45202

ACCESS SERVICE

18. LAN Advantage Frame RelaySM Service (Cont'd)18.2 Service Provisioning (Cont'd)

Variable frame length capability is useful in communications between synchronous Local Area Networks (LAN) and for transport of synchronous data traffic. Frame Relay is capable of handling the requirements of bursty data sources because of the ability of the service to allocate additional bandwidth when not in use by other sources.

CBT does not undertake to originate data, but offers the use of its service components, where available, to customers for the purpose of transporting customer originated data.

Frame Relay is provided to the customer in the form of the Frame Relay User-to-Network Interface (UNI) Port with Access Line, or Frame Relay UNI Port Only, Frame Relay Network-to-Network (NNI) Port only, and Permanent Virtual Connections. The Frame Relay Access Line forms the component which provides the customer access to the Customer's serving wire center and interoffice transport from the customer's serving wire center to the Frame Relay Switch. The Frame Relay Access line is provided for use only with Frame Relay Service. The Frame Relay UNI and NNI Port Only are provided for Digital and High Capacity connections to the network supporting Frame Relay Service. The Digital and High Capacity connections are available from Section 7.

PVCs are provisioned on either 56 Kbps, 64 Kbps, 112 Kbps, 128 Kbps 192 Kbps, 256 Kbps, 320 Kbps, 384 Kbps, 512 Kbps, 768 Kbps and 1.536 Mbps ports, depending upon the customer's networking requirements. The actual throughput of aggregated PVC bandwidths in use at the same time on the same port cannot exceed the port speed. Since all PVCs need not be in use at the same time, it is possible for the total bandwidth of all PVCs associated with one Frame Relay Access Line to exceed the bandwidth of that Frame Relay Access Line. This relationship is referred to as over-subscription and when this occurs, there can be no guarantee that the bandwidth defined for that PVC will be available at any point in time. Bandwidth refers to the sum of Committed Information Rate (CIR) and Excess Information Rate (EIR). The CIR is ordered and billed. EIR equals the bit rate of the access line minus the CIR, except when connecting to an NNI, where the EIR is specified by the customer.

(C)

No PVC can have a greater bit rate than the bit rate of the associated access line.

ACCESS SERVICE

18. LAN Advantage Frame RelaySM Service (Cont'd)

(N)

18.2 Service Provisioning (Cont'd)

A customer subscribing to a Frame Relay port or port with access line will be referred to as the Controller of the Frame Relay Port. A customer may request data transmission capability to another customer. Both customers must have a Frame Relay Access Line and Frame Relay Port. The Controller of each Frame Relay Access Line that says "ordering PVC's" must have written permission from the Controller(s) of each of the Frame Relay Access Lines to which a PVC is requested.

Frame Relay Port and PVC may be ordered independently and can have different customers as Controllers.

Frame Relay Service is available only where facilities and conditions permit.

18.3 Undertaking of the Telephone Company

In addition to the general regulations described in Section 2, when a customer orders a PVC which is relayed to other Local Exchange Carriers, Interexchange Carriers or other Frame Relay networks, the Telephone Company will provide assistance in establishing this PVC.

CBT has the service responsibility up to and including the demarcation point.

18.4 Obligations of the Customer

In addition to the general regulations described in Section 2, the following regulation will also apply.

The customer shall be responsible for obtaining permission for CBT employees to enter the premises of the customer at any reasonable hour for the purpose of installing, inspecting, repairing or upon termination of the service, removing the components of CBT.

The customer, upon request, shall furnish such information as may be required to permit CBT to design and maintain the Frame Relay Service it offers and to assure that the service arrangement is in compliance with the regulations contained herein.

It shall be the responsibility of the customer to ensure the continuing compatibility of the customer provided equipment that is used in conjunction with the Frame Relay Service.

ACCESS SERVICE

18. LAN Advantage Frame RelaySM Service (Cont'd)18.5 Rate Regulations

Regulations in this section are applicable to Frame Relay Service and are in addition to regulations in other sections of the tariff.

Frame Relay Service optional payment plan (OPP) and minimum period charge is specified in 7.4.9.

When PVCs and CIRs per Kilobit are added to existing Frame Relay Service, the minimum period for the added PVCs is coterminous to the payment plan.

Frame Relay will be available 24 hours per day, 7 days per week, except for preventive maintenance, enhancements, and/or repair. CBT reserves the right to perform these tasks as needed, on off peak hours, generally on Sundays from 2:00 a.m. to 6:00 a.m.

Frame Relay Service consist of the following Rate Elements:

(A) Frame Relay UNI Port and Access Line

A monthly rate based on the speed of the port connection
(i.e., 56 Kbps, 64 Kbps, 112 Kbps, 128 Kbps, 192 Kbps, (C)
256 Kbps, 320 Kbps, 384 Kbps, 512 Kbps, 768 Kbps, (C)
or 1.536 Mbps), apply per port for each physical connec-
tion to the network supporting Frame Relay Service.

(B) Frame Relay UNI or NNI Port only

A monthly rate based on the speed of the port connection
(i.e. 56 Kbps, 64 Kbps, 112 Kbps, 128 Kbps, 192 Kbps (C)
256 Kbps, 320 Kbps, 384 Kbps, 512 Kbps, 768 Kbps, (C)
or 1.536 Mbps), apply per port for each Frame Relay Access
Line to the network supporting Frame Relay Service.

(C) Frame Relay PVC and CIR

A monthly rate apply for each PVC and for each CIR/Kilobit.

ACCESS SERVICE

18. LAN Advantage Frame RelaySM Service (Cont'd)

(N)

18.5 Rate Regulations (Cont'd)

Frame Relay Service rate application is as follows:

- (A) A customer may access Frame Relay Service via a Frame Relay Access Line or via Telephone Company provided digital access facilities offered under Section 7. If a customer utilizes a special access line to access Frame Relay Service, the associated regulations, rates and charges for such facilities shall apply in addition to the rates and charges associated with the Frame Relay Service rate elements.
- (B) A customer utilizing special access facilities to access Frame Relay Service would incur the monthly rate associated with the Frame Relay UNI or NNI Port Only charge set forth under 18.6.B or 18.6.C respectively for standard arrangements. The UNI Port provides for a user to carrier connection; the NNI Port provides for a carrier-to-carrier connection.
- (C) The Frame Relay Access Line and PVC may be ordered and billed independently and can have different Controllers, as discussed under 18.2. A request by one customer to discontinue a PVC does not result in the disconnection of the Frame Relay Access Line may authorize a disconnect of that line.

ACCESS SERVICE

19. LAN Advantage19.1 Service Description

LAN Advantage Service is an end-to-end high-speed data transport service which customers use for LAN interconnection and/or high-speed Internet access.

19.2 Service Provisioning

CBT will provide LAN Advantage service for one or more of the following types of Ethernet LANs: Ethernet LANs operating at speeds of 10 Mbps, 100 Mbps and 1000 Mbps (Gigabit).

The Quality of Service (QoS) optional feature enables the Customer to specify the level of delay, delay variation (jitter), bandwidth packet loss and availability. (N)

LAN Advantage will be available 24 hours per day, 7 days per week, except as required to update, enhance, maintain and/or repair LAN Advantage. CBT reserves the right to perform these tasks, as needed, during off-peak hours, normally on Sundays from 12:00 a.m. to 6:00 a.m.

At the request of Customer CBT will interconnect one or more additional LANs owned by Customer to the LANs interconnected pursuant to this Tariff so long as such additional LANs are of the same type as the LANs interconnected hereunder. (e.g., An Ethernet LAN may only be extended to another Ethernet LAN but may be at a different speed.)

Unless otherwise agreed in writing, CBT will provide LAN Advantage service for data transmission only.

The electrical signals of LAN Advantage operate in compliance with the following American National Standard Institute ("ANSI") or IEEE standards for Ethernet LANs operating at speeds of 10 Mbps, 100 Mbps and 1000 Mbps (Gigabit), IEEE Standards 802.3 and 802.3u (Carrier Sense Multiple Access with Collision Detection (CSMA/CD) Access Method and Physical Layer Specifications).

LAN Advantage supports the following interfaces: (i) for Ethernet LANs operating at speeds of 10 Mbps, 10 Base T and AUI or 100 Mbps, 100 Base T; and (ii) for Ethernet LAN's operating at a Native Mode of 1000 Mbps (Gigabit), SX or LX Gigabit Interface Connectors.

ACCESS SERVICE

19. LAN Advantage

(N)

19.2 Service Provisioning (Cont)

CBT will use its best efforts to repair any inoperable LAN Advantage port within 4 hours after Customer has notified CBT that such port is inoperable. If such port remains inoperable for more than 8 hours after Customer has notified CBT that such port is inoperable, CBT will credit Customer's account for an amount equal to one-thirtieth (1/30) of the applicable monthly charge for such port. The same credit will apply for each additional 8-hour period that the port remains inoperable. The total amount of all credits for any one inoperable port will not exceed the monthly port charge for such inoperable port. The credit referred to herein shall be CBT's entire liability and Customer's exclusive remedy for any damages resulting from such inoperable port.

Without the prior written consent of CBT, Customer will not access, or attempt to access, any equipment or facilities furnished by CBT in connection with this Tariff. Customer will indemnify and hold harmless CBT, its officers, directors, employees and agents, from and against any loss or expense, of whatever nature, arising out of any unauthorized access to any equipment or facilities furnished by CBT in connection with this Tariff.

All equipment and facilities used by CBT in providing LAN Advantage hereunder will remain the sole property of CBT, whether or not attached to or embedded in reality, unless otherwise agreed to in writing by the parties with respect to specific equipment.

Customer agrees that any technical, financial or business information of CBT furnished to Customer in connection with this Agreement is confidential and proprietary to CBT, shall remain the property of CBT at all times and shall be returned to CBT upon request.

ACCESS SERVICE

19. LAN Advantage19.3 Obligations of the Customer

(N)

CBT will not be responsible for damages, malfunctions or failures caused by (a) Customer's failure to follow any operation or maintenance instructions provided by CBT to Customer; (b) Customer's repair, modification to or relocation of equipment used to provide service hereunder, or attachment of equipment not approved by CBT; and (c) abuse, misuse or negligent acts of Customer. Customer may request CBT to perform repair service for Customer in such instances on a time-and-materials basis.

Customer will furnish, at its expense, such space, electrical power and environmental conditioning at Customer's premises as CBT may reasonably require in connection with performing its obligations hereunder. Customer will permit CBT reasonable access to Customer's premises, in accordance with Customer's normal security procedures, in connection with providing service hereunder.

Customer will provide, install and maintain, at its expense, all equipment and facilities necessary for LAN interconnection on the Customer's side of the Demarcation Point. Customer shall be responsible for insuring that the operating characteristics of such equipment and facilities are compatible with CBT's LAN Advantage and conform to the Technical Reference Specifications furnished by CBT to Customer in connection with this Tariff.

Customer will cause its electrical signals at the Demarcation Point to conform to the applicable ANSI or IEEE standards set forth in Section 8, above. Any additional equipment or facilities necessary to comply with such standards shall be furnished by Customer at its expense.

Prior to requesting repair service from CBT, Customer will use its best efforts, including but not limited to performing reasonable diagnostic tests, to verify whether any trouble with The LAN Advantage service is a result of the Customer's equipment or facilities. Customer shall be responsible for any such trouble resulting from the Customer's equipment or facilities. Customer will cooperate with any joint testing of LAN Advantage reasonably requested by CBT.

ACCESS SERVICE

19. LAN Advantage

(N)

19.4 Rate Regulations

The rates and charges set forth for LAN Advantage Service provide for the furnishing of service where suitable facilities are available. Where special construction of facilities is necessary, special construction charges may apply.

At locations where Customer provides power to CBT, CBT is not responsible for out of service conditions caused by power outages.

Customer shall pay CBT for LAN Advantage service at the applicable monthly rate for the type of LAN Advantage service, selected by the Customer, as indicated in Section D. In addition, Customer shall pay to CBT the applicable per port nonrecurring charge set forth in Section D.

If Customer cancels, in whole or in part, any requested addition, rearrangement, relocation or other modification to LAN Advantage prior to completion thereof, Customer will reimburse CBT for the actual expenses incurred by CBT in connection with such modification prior to CBT's receipt of notice of cancellation; provided, however, the amount of such reimbursement will not exceed the service, construction, installation, termination and other charges for which Customer would have otherwise been responsible.

LAN Advantage is available for a minimum term of 12 months or under a term payment plan of 36, or 60 months. If a Customer terminates a service, without cause, prior to the expiration of the term, the Customer will pay to CBT a termination charge equal to all remaining amounts due or to become due, including but not limited to all monthly charges for which Customer would have been responsible if the Customer had not terminated prior to the end of the applicable 12, 36, or 60-month term payment plan.

If Customer removes one or more ports from service prior to the expiration of the term hereof, Customer will pay to CBT a termination charge equal to all monthly charges for such port(s) for which Customer would have been responsible had Customer not removed such port(s).

ACCESS SERVICE

19. LAN Advantage

(N)

19.4 Rate Regulations

Upon completion of the term payment plan contract the customer may renew their contract at the current, tariffed rates. If customer does not renew their contract prior to the expiration date and does not elect to discontinue LAN Advantage service, CBT will furnish LAN Advantage to the Customer as specified in the contract on a month-to-month basis at the current, monthly tariffed rates (which will be subject to company initiated rate changes).

If customer elects a new term payment plan, prior to the expiration of their current contract, the monthly charges will be adjusted to the current tariffed rates in effect at the time of renewal. There will be no credits or refunds made to the Customer for payments made under the previous contract term, but nonrecurring charges will not be reapplied. If Customer reduces the number of ports in service, then termination charges will be applied for the removed service. Customer may not elect a term payment plan that is shorter than the remainder of the current term payment plan.

Within like service types, customer may upgrade to a higher speed service or downgrade to a lower speed service without incurring termination charges.

Customer may add additional ports to its LAN Advantage service at the rates in effect at the time of such addition pursuant to the LAN Advantage tariff, respectively, provided CBT has sufficient existing equipment. If sufficient equipment capacity or outside plant facilities are not available, Customer will be responsible for any special construction or other charges required to add such additional port(s) to its LAN Advantage service.

If the customer adds additional ports to its LAN Advantage service and the contract period for the initial port has not expired, then the following applies: a) the contract period selected for an additional port must be equal to or shorter than the remaining contract for the initial port or b) the contract period for the initial port will be extended to be coterminous with the contract period selected for the additional port.

19.4 Rate Regulations

The customer must subscribe to the initial port in order to subscribe to an additional port. If the initial port is terminated at a customer's location, then all LAN Advantage service will be terminated at that location unless customer wants to re-specify one of the additional ports as the initial port with the appropriate rates applied. An additional port can be terminated without terminating the initial port to a customer's location.

Additional port discounts do not apply to different customers at the same location.

Customer may move the location of its LAN Advantage service to a location where sufficient central office capacity and outside plant facilities are available and retain the current monthly rates, but initial nonrecurring charges will be reapplied. The termination charges specified in Paragraph 17, are applicable if Customer terminates because of a move to a location where sufficient central office capacity or outside plant facilities are not available.

Customer has the option of purchasing Diverse Central Office capability for LAN Advantage service.

Customer has the option of providing their own premises Equipment or purchasing the Premises Equipment from the Company. Rates are shown in Section 19.5 following.

Customer has available option of purchasing redundant Premise Equipment if the Customer has purchased Premise Equipment from the Company. Rates are shown in Section 19.5 following.

Protected LAN Advantage gives customers protection from equipment and network failure by designating a circuit with primary and secondary fiber pairs and network facing equipment redundancy. Each fiber pair terminates into its own individual port both at the central office switch and at the Company owned customer-premises equipment, giving each fiber pair its own connection to the LAN Advantage network. In the event of a primary connection failure, traffic will automatically reroute to the secondary connection. The customer-owned equipment plugs directly into the LAN Advantage circuit by a standard, single Ethernet port. The design does not include geographic fiber route diversity, location, or dual customer hand-offs.

Unprotected Lan Advantage is the standard LAN Advantage service.
