2. GENERAL REGULATIONS

2.6 DEFINITIONS (Cont'd)

Pricing Flexibility

The Company was granted Phase I and Phase II Pricing Flexibility on April 24, 2002 for Switched Access Services and Private Line Transport Services as set forth in Sections 6, 7 and 15, following. Then on April 20, 2007, the Company was granted additional Phase I Pricing Flexibility for Advanced Communications Networks Services as set forth in Section 8, following.

(C)

Phase I and Phase II Pricing Flexibility relief is dependent upon the classification of the serving wire center(s) for each provisioned service as set forth in Section 23, following. Each rate component may have Phase I relief, Phase I & II relief, or no relief depending upon the wire center in which it is provided. The components having pricing flexibility are subdivided into:

(C)

- CTE EU (Channel Termination Equivalent to the End User)

(C)

Channel Termination Equivalent to the End User location (CTE EU), which depending upon the service include channel terminations, entrance facilities, access links, LAN links, Bandwidth Profiles, ports, and nodes to the end user premises.

(C)

- All Other Components

(C)

All other components which depending upon the service include channel terminations, entrance facilities, access links, LAN links, Bandwidth Profiles, ports and nodes to the carrier POP. Also included are transport mileage, transport channel, multiplexing, and optional features and functions.

(C)

(C)

Since the serving wire center determines the degree of relief, each component of the service is rated based upon its serving wire center. A Direct-Trunked Transport (DTT) or Transport Channel may connect two wire centers with different relief. When this happens, the entire DTT or the Transport Channel is rated based upon the wire center with the lowest level of Pricing Flexibility relief or no-relief. The lowest level of relief is no-relief, the next level is Phase I relief and the highest level is Phase II relief.

For example, if both wire centers are Phase I or no relief, the DTT and Transport Channel are rated out of Sections 6, 7, 8 or 15. If both wire centers are Phase II the DTT and Transport Channel are rated out of Sections 16 or 17. Refer to Diagrams in Sections 16 and 17.

(C)

(M)

(M) Certain material previously found on this page can now be found on Page 2-115.

2. GENERAL REGULATIONS

2.6 DEFINITIONS

Pricing Flexibility (Cont'd)

The relief for each phase and the applicable section of this Tariff are as follows:

(M)

- No-Relief

Many Company wire centers did not qualify for Pricing Flexibility relief. Service out of wire centers with no Pricing Flexibility relief are billed the rates specified in Sections 6, 7, 8 and 15. Those wire centers will not appear in Section 23.

(C-M)

- Phase I

Phase I relief permits the Company to offer volume and term discounts through contract tariffs. The volume and term discounts are based on the rates, term and conditions for the associated service(s) as set forth in Sections 6, 7, 8 and 15, following. All contracts are located in Section 24.

(C)

(C)

- Phase II

Phase II relief permits the Company to offer contract tariffs and some services free of the Commission's rate structure and price cap rules. The associated rates are found in Sections 16 and 17.

(C)

(C)

Primary IC (PIC)

The term "Primary IC" (PIC) denotes the Interexchange Carrier (IC) of choice as designated by an end user for business or residential service or a location provider for a pay telephone.

Prime Service Vendor

The term "Prime Service Vendor" denotes the status of the Company when contracting directly with the user of TSP service.
