With this filing, NBTC is proposing to clarify existing rules and regulations as they relate to the Optical-to-Electrical Add/Drop Capability feature for Dedicated SONET Ring Services. This filing includes the following revisions: 1) Adding clarifying language to the Optical-to-Electrical DS-1 Add/Drop Capability text description which describes at what point a customer is charged this fee per OC-12 or OC-48 node. 2) Adding a change in regulation to the OC-192 Add/Drop Capability text description which states, “Effective 06/15/07, the OC-192 Add/Drop Capability is not applied to CO nodes without drop ports.” This was also added as a footnote to the OC-192 rate section, where applicable. 3) Making text changes and removing of erroneous information from the OC-192 Optical-to-Electrical Add/Drop Capability text description. 4) Adding a Nonrecurring Charge for Subsequent Installation per Add/Drop Capability for OC-192 Rings. 5) Reducing the 60-month rate for the OC-192 DS-3 Transmux Re-Map port feature. None of the revisions included in this filing will adversely affect existing customers.

Supporting information discussed under Section 61.49 of the Commission’s Rules, to the extent applicable, is included with this filing in the attached Description and Justification.
