Qwest is filing tariff language in its Tariff F.C.C. No. 1, Section 5 Ordering Options for Access Services, to offer CLECs a 50% discount off of the Design Change Charge in certain wire centers where they must convert to special access private line service. This discount is being offered in wire centers deemed "non-impaired" by the FCC, or for which the FCC has granted Qwest forbearance from certain Section 251 unbundling obligations.

During implementation of the Triennial Review Remand Order (TRRO), Qwest proposed that a Design Change Charge would apply if a CLEC converted from UNEs to private line service (DS1 or DS3). Subsequent negotiations in the context of state TRRO Dockets resulted in the mutually acceptable 50% discount off the Design Change Charge for such conversions. Qwest also extended this discount to CLECs required to convert from UNEs to private line service in wire centers in which the FCC has granted Qwest forbearance from certain Section 251 unbundling obligations.
