2. GENERAL REGULATIONS

2.6 DEFINITIONS (Cont'd)

CLEC (Competitive Local Exchange Carrier)

The term "CLEC" denotes a telecommunications company, certified by a state utilities commission, to provide a competitive local exchange service in ILEC Territory.

(N)
—
(N)

C-Message Noise

The term "C-Message Noise" denotes the frequency weighted short term average noise within an idle voice channel. The frequency weighting, called C-message, is used to account for the variations in 500-type telephone set transducer efficiency and user annoyance, to tones as a function of frequency.

C-Notched Noise

The term "C-Notched Noise" denotes the C-message frequency weighted noise on a voice channel with a holding tone, which is removed at the measuring end through a notch (very narrow band) filter.

Commercial Mobile Radio Service (CMRS) Provider

The term "Commercial Mobile Radio Service (CMRS) provider" denotes a common carrier as defined by the Federal Communications Commission subject to the Rules set forth in Section 332 of the Communications Act.

Committed Information Rate (CIR)

The term "Committed Information Rate" denotes the number of bits transmitted per second, under normal conditions, over a Permanent Virtual Connection (PVC).

2. GENERAL REGULATIONS

2.6 DEFINITIONS (Cont'd)

Immediately Available Funds

The term "Immediately Available Funds" denotes a corporate or personal check drawn on a bank account and funds which are available for use by the receiving party on the same day on which they are received and include U.S. Federal Reserve bank wire transfers, U.S. Federal Reserve notes (paper cash), U.S. coins, U.S. Postal Money Orders and New York Certificates of Deposit.

Impedance Balance

The term "Impedance Balance" denotes the method of expressing Echo Return Loss and Singing Return Loss at a 4-wire interface whereby the gains and/or loss of the 4-wire portion of the transmission path, including the hybrid, are not included in the specification.

Impulse Noise

The term "Impulse Noise" denotes any momentary occurrence of the noise on a channel over a specified level threshold. It is evaluated by counting the number of occurrences which exceed the threshold.

Individual Case Basis (ICB)

The term "Individual Case Basis" denotes a condition in which the regulations, if applicable, rates and charges for an offering under the provisions of this Tariff are developed based on the circumstances in each case.

ILEC (Incumbent Local Exchange Carrier)

The term "ILEC" denotes an Incumbent Local Exchange Carrier or telephone company that was providing local service when the Telecommunications Act of 1996 was enacted.

(N)
—
(N)

5. ORDERING OPTIONS FOR ACCESS SERVICES

5.2 ACCESS ORDER

5.2.2 ACCESS ORDER MODIFICATIONS

C. Design Change Charge (Cont'd)

The Company will review the requested change, notify the customer whether the change is a design change, if it can be accommodated and if a new service date is required. If the customer authorizes the Company to proceed with the design change, a Design Change Charge will apply.

A Design Change Charge will apply, on a per order, per occurrence basis. This charge will also apply to change an incorrect address as long as the new address is in the same wire center as the incorrect address and the change is made prior to the issuance of the Design Layout Report (DLR). If a change of end user premises within the same serving wire center is requested, Expedited Order Charges may also apply as detailed in D., following. The applicable design charge is:

1. Rates And Charges

	USOC	CHARGE	
• Design Change Charge, per order	H28	\$50.00[1]	(C)

[1] In wire centers deemed “non-impaired” by the FCC, or for which the FCC has granted the Company forbearance from certain Section 251 unbundling obligations, UNE circuits that remain with the Company must convert to special private line service and will be assessed a Design Change Charge. CLECs who convert these types of UNE circuits to special private line will receive a 50% discount off of the Design Change Charge.

8. ADVANCED COMMUNICATIONS NETWORKS

8.1 GENERAL

8.1.5 TERMINATION LIABILITY AND WAIVER POLICY

B.1.b. (Cont'd)

- Terms and Conditions:
 - Only FRS recurring (whole and partial month) revenues and associated adjustments of these amounts will be used to calculate the annual revenue commitment.
 - The FRS Minimum Service Period (MSP) as set forth in 8.3.4.B., following, applies. The MSP starts with the installation date of each circuit. Should the customer disconnect the circuit prior to the completion of the MSP of six months (PVCs excepted), TLA will apply to the months remaining in the MSP. TLA will not apply beyond the initial six month period.
 - All new circuits added will be coterminous with the termination date of the OMBL fixed period service rate plan with which they are associated.

(T)

(Filed under Transmittal No. 330.)

Issued: August 7, 2007

Effective: August 22, 2007

8. ADVANCED COMMUNICATIONS NETWORKS

8.8 METRO OPTICAL ETHERNET (MOE)

8.8.2 RATE ELEMENTS

E. Optional Features(Cont'd)

3. Protect Routing

Protect Routing provides added reliability to MOE transported over fiber optic facilities. Protect Routing provides a separate facility path for the protection system between the serving wire center and the Company point of termination located in the same building as the customer designated premises when the customer or building owner provides the structure for diverse entrance facilities into the building. The Company will bill a monthly Protect Routing charge as set forth in 8.8.4.E., following.

(T)

This added protection is provided by ensuring that backup electronics and two physically separate facility paths are used in the provisioning of the service. One primary (or working) service path is established between the serving wire center and the customer designated premises. In addition, a protect path is provisioned between the customer designated premises and the serving wire center via a Company designated alternate route. In the event that the working facility or electronics fail or the service performance becomes impaired, the facility automatically switches to the service protect path in order to maintain a near continuous flow of information between locations.

Protect Routing comes with a service guarantee should the continuity between the customer designated premises and serving wire center fail as set forth in Section 2.4.4.B.7., preceding.
